**RE: COUNTYWIDE LANDFILL
STARK COUNTY
CELL 8C CERTIFICATION
CONCURRANCE**

Dear Mr. Hamilton:

On March 18, 2008, Ohio EPA received the "Cell 8C-Interim Cell Composite Liner Construction, Countywide Recycling and Disposal facility, Stark County, Ohio" dated March 18, 2008. On April 22, 2008, Ohio EPA received "Cell 8C-Interim Cell Construction Certification Report, Addenda for LCS and Separation Berm" dated April 22, 2008. Also, on April 24, 2008, Ohio EPA received the "Cell 8C-Interim Structural Fill Construction Certification Report" dated March 12, 2008. The reports were prepared by Golder and Associates on behalf of Countywide Recycling and Disposal Facility (Countywide RDF), which is owned and operated by Republic Services of Ohio II, LLC and located in Stark County.

The certification reports document the construction of structural fill, and 4.28 acres of the composite liner and leachate collection system in cell 8C in accordance with the approved permit to install (PTI) and construction of the separation berm between Cells 8A and 8C as approved on April 14, 2008. In addition, the certification reports request approval of one alteration. The remaining 3.86 acres of cell 8C construction (a portion of the side slope) not included in the above noted reports will be submitted at a later date.

A review of the documents has been completed and the certification reports indicate that Cell 8C and the 8A/8C separation berm were constructed in compliance with the approved PTI, the approved separation berm construction design, subsequent approved alterations, and the alterations requested in the certification report. Therefore, Ohio EPA concurs with construction of Cell 8C and Cell 8A/8C separation berm.

Waste placement in Cell 8C may commence upon receipt of this letter.
