

ChoicePlus: Introducing a More Convenient E✓Check.

About ChoicePlus

E✓Check, administered by Ohio EPA, is now more convenient—with ChoicePlus, offering more testing sites in the seven-county E✓Check testing area!

ChoicePlus allows you to choose the easiest way to get your E✓Check.

- 23 existing Full-Service E✓Check stations, where ALL vehicles can be tested.
- 53 new testing locations, including 37 Lube Stops and 16 independent repair facilities, where most newer vehicles—1996 and newer gasoline vehicles and 1997 and newer diesel vehicles—can be tested.
- 16 self-service kiosks located outside many of the existing E✓Check stations, where you can conduct your own On-Board Diagnostic (OBD) test on newer vehicles. Open 24 hours a day, 365 days a year!

Self-Service Kiosk

Get an E✓Check at any time of day with one of our 16 self-service kiosks, located at selected E✓Check stations throughout Northeast Ohio. These easy-to-use kiosks walk you through the simple process of conducting your own OBD emissions test 24 hours a day, 365 days a year.

RapidScreen

This is only applicable for the five percent of the vehicles that are really clean. The new RapidScreen vans will travel throughout Northeast Ohio and can remotely scan your car as you drive by to diagnose your exhaust emissions. If your vehicle is really clean and has passed RapidScreen's emissions qualifications, you'll receive a notification in the mail. For the few vehicles that pass this, they will not be required to go to an emissions testing facility. Visit www.ohiocheck.org for the schedule and locations of the vans.

Vehicles must be tested prior to registration in seven Ohio E✓Check counties

Vehicles between four and 25 years old are subject to emissions testing. Those with odd-number model years are tested in odd years (2001, 2003, etc.). Vehicles with even-number model years are tested in even years (2002, 2004, etc.). Also, vehicles powered by alternative fuels are exempt from testing (see www.ohiocheck.org). For example, a model year 2008 begins testing in 2012 and the oldest vehicle tested in 2012 would be a 1988. Motorists purchasing a used vehicle must obtain a valid E✓Check certificate for registration. A passing certificate is good for one year and is transferable to a new owner. To protect yourself when purchasing a used vehicle four years old or older, be sure to ask for a passing E✓Check certificate before purchasing the vehicle.

Vehicle test history

A vehicle's test history can be obtained at www.ohiocheck.info using the Vehicle Identification Number (VIN). If there is a valid test, a copy can be obtained at any one of the E✓Check testing locations.

Watch the mail for notification

Motorists will receive a courtesy reminder of the required test at least 60 days prior to registration renewal. However, motorists can get vehicles tested up to 365

days before your required registration renewal date.

Engine and catalytic converter should be at their normal operating temperatures

Vehicles older than model year 1996 need to be driven for at least 15–20 minutes prior to testing in order for the engine to be at the proper operating temperature.

Avoid the busiest times

Ohio E✓Check Full-Service stations are usually less busy before 9 a.m. and after 4 p.m.

Call 1-800-CAR-TEST

Ohio E✓Check testing locations are served by a single customer service hotline. Operators are trained to assist you with your questions.

23 Full-Service Station Hours:

Monday-Friday – 8 a.m. to 6 p.m.,
Saturday – 8 a.m. to 1 p.m.,
Closed Sundays and select state holidays.

See new ChoicePlus details for other convenient options

For more information, and hours of operation of the NEW 53 OBD-only testing locations or self-service kiosks, call: 1-800-CAR-TEST or visit our website at www.ohiocheck.org or www.ohiocheck.info.
