**RE: Administrative Permit Change Request for Correction to PTI 04-708
BP-Husky Refining LLC, Toledo Refinery
Facility ID: 04-48-02-0007**

Dear Mr. Park:

BP-Husky Refining LLC herewith submits this application to correct PTI 04-708, last issued on August 5, 1998. PTI 04-708 was originally issued on March 18, 1992 for the modification and installation of equipment to meet the regulation restricting the sulfur content of diesel fuel for on-highway uses. At this time we are requesting that the permit be updated to correct references to 40 CFR Part 60 Subpart K_b (NSPS K_b), based on changes that occurred in the applicability of NSPS K_b since the issuance of the original PTI. We are also requesting two other minor corrections. These changes need to be made prior to finalizing our renewed Title V Permit so that our Title V Permit can correctly reference the subject regulation for those tanks included in PTI 04-708.

The attached application includes the details of these requested changes and how these changes affect PTI 04-708. This application is also being submitted to Ohio EPA through Air Services (Application Number M0001680).

If you have any questions or concerns regarding this permit application, please contact either Bill Rupert at 419-697-6011 or Allen Ellett at 419-697-6064.

Sincerely,
BP-Husky Refining LLC
