OAC Rule 3750-30-25, “Identification of Hazardous Chemicals”**

Notice is hereby given that on behalf of the State Emergency Response Commission (SERC), the Ohio Environmental Protection Agency, Division of Air Pollution Control (DAPC) proposes the following changes to Ohio Administrative Code (OAC) rule 3750-30-25, Identification of Hazardous Chemicals.

DAPC is proposing these changes due to USEPA recently amending its hazardous chemical reporting regulations to conform to the revisions of OSHA’s Hazard Communication Standard due to its adoption of the Global Harmonizing System (GHS) classification and labeling of chemicals. USEPA replaced the existing five hazard categories to two hazard categories as they listed and four hazards that were not specifically addressed (simple asphyxiant, combustible dust, pyrophoric gas and hazard not otherwise classified).

As part of the rule-making process, DAPC is required by Section 121.39 of the Ohio Revised Code to consult with organizations that represent political subdivisions, environmental interests, business interests, and others affected by the rules. The DAPC is offering your organization the opportunity to comment on these rules before the division formally proposes them.

These rules and supporting documentation are available electronically for review at: <http://epa.ohio.gov/dapc/regs/regs.aspx>. See the information under the drafts and notices for OAC 3750-30-25, “Identification of Hazardous Chemicals” We request that you provide us with any comments you may have to the changes that have been recommended by **Friday, July 7, 2017**.

Please submit your comments or suggestions to the following addresses. Persons submitting comments electronically are encouraged to follow-up with a hard copy via regular mail:
