Re: Lead Redesignation Request and Maintenance Plan for the 2008 Lead Standard for the Partial Logan County Area

Dear Administrator Hedman:

I am writing to formally request a redesignation to attainment of the partial Logan County area (Sections 27, 28, 33 and 34 of Lake Township) with respect to the 2008 lead standard. The enclosed submittal combines the redesignation request and the required maintenance plan for this area.

Monitoring of existing air quality indicates that the 2008 National Ambient Air Quality Standard (NAAQS) for lead has been attained throughout this area based on 2010-2012 air quality data. There was only one source of lead emissions in this area, Daido. Daido was a producer of bearing sleeves for the automotive industry. In June of 2009, the Daido facility permanently shutdown all lead operations. Emissions projections indicate that current controls, existing State rules, existing federal rules, and Ohio's PSD program will be more than sufficient to maintain the NAAQS indefinitely into the future as no new sources of lead emissions are expected in this area. These programs will, therefore, constitute the attainment and maintenance plan for the partial Logan County area.

Ohio EPA notified the public of the draft and the opportunity to provide comments on August 21, 2013. The public hearing for this package was held on September 25, 2013 in Bellefontaine, Ohio. No comments were received and no testimony was provided.

This submittal consists of one (1) hard copy of the required documentation. An exact duplicate electronic version of the submittal in PDF format is available at <http://www.epa.ohio.gov/dapc/SIP/lead.aspx> under the heading "Redesignations and Maintenance Plans."

If you have questions, please contact Jennifer Van Vlerah in our Division of Air Pollution Control at (614) 644-3696.

Sincerely,

A handwritten signature in black ink, appearing to read "Scott J. Nally". The signature is stylized with a large initial "S" and a long horizontal stroke.
