

Asset Management 2017 Webinar Series

Division of Drinking and Ground Water (DDGW)

In preparation for Ohio EPA's proposed requirement for all PWSs in Ohio to develop an Asset Management Program, RCAP is pleased to present this series to provide a background on better understanding Asset Management.

Friday
September 8th

Completing an Asset Inventory

10:00-11:00 a.m.

This first webinar of the series, will cover the basics of asset inventory - where to look for and find the data needed to complete an inventory of your water utility assets. [Click Here To Register](#)

Friday
September 15th

Completing a Condition Assessment

10:00-11:00 a.m.

This webinar, second in the series, covers methods used to evaluate and rate the condition of your water utility assets. [Click Here To Register](#)

Friday
September 22nd

Completing a Capital Improvement Plan

10:00-11:00 a.m.

This webinar, third in the series, explains the basics of developing and maintaining a Capital Improvement Plan. Proactive planning rather than reactive planning will be discussed. [Click Here To Register](#)

Wednesday
September 27th

Completing a Preventative and Predictive Maintenance Plan

10:00-11:00 a.m.

This webinar, fourth in the series, will cover how utilities can formalize the best management practices (BMPs) they are already using and expand them to extend the useful life of their assets to reduce emergency repairs and allow for planned replacement. [Click Here To Register](#)

Friday
September 29th

Budgeting for P&P, CIPs, & Sustainability

10:00-11:00 a.m.

This webinar, fifth and last in the series, will cover how to incorporate asset management plan costs into the budget—including preventative and predictive maintenance costs, capital improvement projects, reserve funds, annual cost of living prices and other costs to be considered for sustainability of your utility.
