Chemicals	Monitoring Requirements
TOTAL COLIFORM - SEASONAL STARTUP	At least 1 negative Total Coliform Bacteria sample prior to serving water to the public

\*\*\* Seasonal start-up sample does not count for routine compliance requirements. Collect at least one special purpose (SP) sample for total coliform (TC) analysis at the service connection considered to be most susceptible to contamination. The sample must be TC negative before the system may serve water to the public. If the sample is positive, contact your Ohio EPA District Representative for additional requirements. If your start date is different from last year, please contact your Ohio EPA District Representative.\*\*\*
