RE: Statewide RDF, Stark County
Ohio Administrative Code (OAC) Rule 3745-27-10(C)(7)(g) Approval

Dear Mr. Haaf:

The Ohio EPA Division of Solid and Infectious Waste Management (DSIWM) Northeast District Office (NEDO) received a document from Statewide RDF (Facility) titled *Statistical Analysis Program for Ground-Water Quality Detection Monitoring, Statewide Recycling and Disposal Facility, Stark County, Ohio.* It is dated June 2009 and was received by NEDO on July 8, 2009.

The revised document was submitted to Ohio EPA as an OAC Rule 3745-27-10(C)(7)(g) request to update background data for chloride at the Facility's ground water monitoring well MWU-6. Historically the statistical analysis of ground water monitoring data acquired at the Facility had indicated a statistically significant increase (SSI) of chloride at MWU-6. As provided by OAC Rule 3745-27-10(D)(7)(c)(ii), the Facility has demonstrated that the SSI's for choride at MWU-6 were due to a shift in background concentrations as a result of natural variability in ground water quality and that the SSI's for chloride at MWU-6 were false positives.

Pursuant to OAC Rule 3745-7-10(C)(7)(g), background data can only be added in blocks of data resulting from the analysis of four or more statistically independent samples after the data have been statistically compared to current background data and no statistical differences are detected, unless another method is deemed acceptable by the director. The chloride concentration at ground water monitoring well MWU-6 was below the control chart limit during the April 2009 first semi-annual ground water detection monitoring event. No SSI in chloride was detected or reported at monitoring well MWU-6 for this most recent ground water detection monitoring event which utilized the current background data set of June 1994 through May 2006.

Ohio EPA has reviewed the information provided and concurs that this data can be added to the background data group. Therefore, pursuant to OAC Rule 3745-27-10(C)(7)(g), the Facility is hereby authorized to update the background database as detailed in the June 2009 document.

You are hereby notified that this action of the Director of Ohio EPA (Director) is final and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of $70.00 which the Commission, in its discretion, may reduce if by affidavit you demonstrate that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
309 South Fourth Street
Room 222
Columbus, Ohio 43215

If you have any questions concerning this letter, please contact Joshua Adams of Ohio EPA DSIWM-NEDO at (330) 963-1103, or joshua.adams@epa.ohio.gov.

Sincerely,

William T. Skowronski
District Chief, Northeast District Office
