**RE: STATEWIDE RECYCLING AND DISPOSAL FACILITY (RDF), STARK COUNTY  
CORRECTIVE MEASURES ALTERNATE SOURCE DEMONSTRATION  
CORRECTIVE MEASURES WELL MW5C-1**

Dear Mr. Haaf:

On January 22, 2010, the Ohio Environmental Protection Agency (Ohio EPA), Division of Solid and Infectious Waste Management (DSIWM), Northeast District Office (NEDO) received a document titled *2009 Second Semiannual Corrective Measures Activities Report, Alternate Source Demonstration*, dated January 20, 2010, for the Statewide RDF (Facility) located in Stark County. This document was submitted by Eagon and Associates, Inc., on behalf of Statewide RDF and contains an alternate source demonstration for a verified statistically significant increase (SSI) in corrective measures well MW5C-1.

According to the January 20, 2010 submittal, analysis of the ground water detection monitoring data indicated an SSI of ammonia in ground water samples from corrective measures well MW5C-1. The submittal concluded that the SSI for ammonia in ground water samples from MW5C-1 was a false positive due to natural variation in ground water quality and is not as a result of impact from the landfill.

In accordance with Section 9.2 of the owner or operator's approved Corrective Measures Plan (CMP), journalized on March 22, 2007, the owner or operator is requesting the Director, or an authorized representative, find that the verified SSI is due to natural variation and may continue to be evaluated as being below background. The owner or operator did not receive approval to continue to evaluate ammonia at MW5C-1 as below background by June 8, 2010, which is 135 days from the date of notification, therefore, MW5C-1 will need to be sampled for the Appendix II parameters contained in Ohio Administrative Code (OAC) Rule 3745-27-10, and a new rate, extent, and concentration determination will need to be established.

Ted Strickland, Governor  
Lee Fisher, Lieutenant Governor  
Chris Korleski, Director

Tim Haaf  
Waste Management, Inc.

Ohio EPA has reviewed the January 20, 2010 submittal, and does not concur with the demonstration for corrective measures well MW5C-1. Therefore, in accordance with Section 9.2 of the Facility's approved Corrective Measures Plan (CMP), the owner or operator should sample corrective measures well MW5C-1 for the Appendix II constituents contained in Ohio Administrative Code (OAC) Rule 3745-27-10; establish a concentration goal for ammonia; initiate a new rate, extent, and concentration determination for ammonia and any other Appendix II constituents identified; and, evaluate the effectiveness of the corrective measures in place relative to the newly identified waste derived constituent(s).

You are hereby notified that this action of the Director is final and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00, made payable to "Ohio Treasurer Kevin Boyce," which the Commission, in its discretion, may reduce if by affidavit you demonstrate that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission  
309 South Fourth Street, Room 222  
Columbus, OH 43215

If you have any questions concerning this letter, please contact Joshua Adams of Ohio EPA, DSIWM-NEDO at (330) 963-1103 or [joshua.adams@epa.ohio.gov](mailto:joshua.adams@epa.ohio.gov).

Sincerely,

Chris Korleski  
Director, Ohio EPA
