**Re: County Environmental of Wyandot Landfill, Wyandot County
Ohio Administrative Code (OAC) Rule 3745-27-10(E)(9)(b) Approval**

Dear Mr. Traub:

On November 17, 2010, the Ohio Environmental Protection Agency (Ohio EPA), Division of Solid and Infectious Waste Management (DSIWM), Northwest District Office (NWDO) received a document titled "OAC 3745-27-10(D)(7)(c)(ii) Alternate Source Demonstration for Copper in SW-11 and Cobalt in SW-12 And Request for Directors Approval County Environmental of Wyandot Landfill Wyandot County," dated November 16, 2010. This document was submitted by Eagon and Associates, Inc., on behalf of the County Environmental of Wyandot Landfill (Facility), pursuant to OAC Rule 3745-27-10(D)(7)(c)(ii), for continuation of detection monitoring at the County Environmental of Wyandot Landfill. However, since the time limits in accordance with OAC Rule 3745-27-10(D)(7)(c)(ii) were exceeded, Ohio EPA has reviewed this request pursuant to OAC Rule 3745-27-10(E)(9)(b).

Pursuant to OAC Rule 3745-27-10(E)(9)(b), the owner or operator may demonstrate that a source other than the sanitary landfill facility caused the contamination, or that the statistically significant change resulted from error in sampling, analysis, or statistical evaluation or from natural variation in ground water quality and request that the Director of Environmental Protection (Director) approve reinstatement of the detection monitoring program.

The November 16, 2010, document concluded that the statistically significant changes for copper at monitoring well SW-11 was due to an error in the use of interwell statistical methods, and not as a result of impact from the landfill. The document also concluded that the statistically significant changes for cobalt at monitoring well SW-12 was due to natural variability in ground-water quality combined with an error in the use of interwell statistical methods, and not as a result of impact from the landfill. Ohio EPA has reviewed the applicable information and concurs with this conclusion.

Therefore, pursuant to OAC Rule 3745-27-10(E)(9)(b), I hereby approve reinstatement of the ground water detection monitoring program for the monitoring wells in the ground water quality assessment monitoring program, noted above, and release the owner or operator from the obligation to comply with this assessment monitoring program at the Facility. This approval of reinstatement of the detection monitoring program applies to monitoring wells SW-11 and SW-12.

Should future or existing ground water sampling results indicate statistically significant changes in ground water monitoring parameters, the owner or operator will be required to either enter into the ground water quality assessment monitoring program in accordance with OAC Rule 3745-27-10(E) or obtain approval to remain in the detection monitoring program pursuant to OAC Rule 3745-27-10(D)(7)(c).

This approval shall not be construed to release the owner or operator from the obligation to comply with the requirements of any other ground water quality assessment monitoring program being conducted at the Facility.

You are hereby notified that this action of the Director is final and may be appealed to the Environmental Review Appeals Commission pursuant to Ohio Revised Code Section 3745.04. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00 made payable to "Treasurer, State of Ohio." The Commission, in its discretion, may reduce the fee if by affidavit it is demonstrated that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

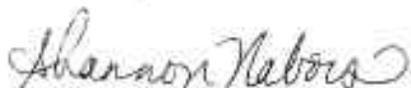

Environmental Review Appeals Commission
309 South Fourth Street, Room 222
Columbus, Ohio 43215

A detailed account of Ohio EPA's review of the request will be sent to you under separate cover.

Mr. Randy Traub
