Ohio EPA Issues Air Permits for Seven Rover Compressor Stations

Ohio EPA has issued seven air permits for compressor stations intended to facilitate delivery of natural gas along the Rover pipeline.

The permits were issued as final for facilities at the following locations:

| <u>Facility Name</u> | <u>Location</u> |
|----------------------|-----------------------------------|
| Rover Mainline CS1 | Sherrodsville (Carroll Co.) |
| Rover Mainline CS3 | Chatfield Township (Crawford Co.) |
| Rover Defiance | Defiance (Defiance Co.) |
| Rover Cadiz | Cadiz (Harrison Co.) |
| Rover Clarington | Beallsville (Monroe Co.) |
| Rover Seneca | Summerfield (Noble Co.) |
| Rover Mainline CS2 | Wooster (Wayne Co.) |

Before issuing the air permits as final, Ohio EPA reviewed the company's application to ensure that emissions would comply with federal and state air pollution control standards, laws and regulations. The Agency also held public information sessions and hearings, and received and responded to comments from the public. Copies of the permits and responses to citizen comments may be viewed at: <http://epa.ohio.gov/pic/respond.aspx>.

An Ohio EPA fact sheet detailing the Agency's role in issuing air permits and considerations related to natural gas compressor station emissions may be viewed at: <http://epa.ohio.gov/Portals/47/nt/CompressorStations.pdf>.

Issuance of final permits can be appealed to the [Ohio Environmental Review Appeals Commission](#) (ERAC). Appeals generally must be filed within 30 days of issuing a final action; therefore, anyone considering filing an appeal should contact ERAC at (614) 466-8950 for more information.
