Re: Supplement to Ohio's Recommended Designations for the 2010 1-hour SO₂ Standard

Dear Administrator Hedman:

I am writing to submit additional information regarding Ohio's designations recommendation for the new sulfur dioxide (SO₂) 1-hour primary standard of 75 ppb originally submitted to you on June 3, 2011.

This supplement incorporates an additional set of comments from Sierra Club regarding Ohio's draft recommendation that was available for public comment. Sierra Club's comments were submitted prior to the closing of Ohio EPA's comment period but received after submitting our original recommendation. Upon review of the comments, Ohio EPA determined additional changes were not necessitated to our recommendation. However, we have revised our Responsive Summary to Comments contained in Appendix F of our submittal. You will find this revised document attached along with the comments submitted by Sierra Club.

If you have any questions concerning this supplement, please feel free to contact Jennifer Hunter of the Division of Air Pollution Control at (614) 644-3696.

Sincerely,

Scott Nally
Director
