

Submission of this form constitutes notice that the party identified in Section I of this form intends to be authorized to install/operate a source of air pollution according to the permit-by-rule provisions of OAC 3745-31-03(A)(4)(a) and (k) or (l). By submitting this form, the applicant agrees to operate and maintain the facility and equipment in accordance with the applicable permit-by-rule provisions. An original signature is needed and forms transmitted by fax will not be accepted. Complete all information as indicated by the instructions.

I. Applicant Information / Mailing Address

Company (Applicant) Name: _____

Mailing (Applicant) Address: _____

City: _____ State: _____ Zip Code: _____

Contact Person: _____ Phone: _____ Fax: _____ E-mail: _____

II. Facility / Site Location Information

Facility Name: _____

Facility Address / Location: _____ County: _____

City: _____ State: _____ Zip Code: _____

Facility Contact: _____ Phone: _____ Fax: _____ E-mail: _____

Ohio EPA Facility ID Number (10-digit) if known – *See Instructions*: _____

III. Reason for Submitting Notification:

Initial request Equipment modification Ownership change

Request for revocation of current permit - *See Instructions and complete additional information below*

Permit to install (PTI) or Permit to operate (PTO) number

Emission Unit ID (4-digit)

IV. Permit-by-Rule Provision Requested:

Small Printing Facility per OAC 3745-31-03(A)(4)(k)

Midsize Printing Facility per OAC 3745-31-03(A)(4)(l)

V. Printing Press Information:

Manufacturer of press

Model

Printing Method (e.g., flexographic, screen, lithographic, etc.)

I certify under penalty of law that all statements or assertions of fact made in this notification are true and complete, and shall subject the signatory to liability under state laws forbidding false or misleading statements.

Applicant Name (Print): _____ Title: _____

Applicant Signature: _____ Date: _____

RETAIN A COPY OF THIS FORM FOR YOUR RECORDS

Mail the original, signed form to the appropriate Air Permit Review Agency (District Office/Local Air Agency) for your county. (Please refer to the Agency map in the attached instructions for mailing addresses).

Rev 12/10

For Ohio EPA Use Only:

FAC ID: _____
Date received : _____

INSTRUCTIONS: Permit-by-Rule Supplemental Form Small / Midsize Printing Facility

GENERAL INSTRUCTIONS:

Provide complete responses to all applicable questions. Submittal of an incomplete form will delay review and processing. If you need assistance, contact your Ohio EPA District Office or Local Air Agency for assistance. Contact the Ohio EPA, Division of Air Pollution Control at (614) 644-2270 for more information on contacting your local district office or go to <http://www.epa.ohio.gov/dapc> and select the topic "District Offices and Local Air Agencies". For more information on the permit-by-rule process, including online tracking of your notification form, go to <http://www.epa.ohio.gov/dapc/pbr/permitbyrule.aspx>

This is a notification form for a small or midsize printing facility which is intended to be installed and/or operated according to the permit-by-rule provisions of OAC 3745-31-03(A)(4)(a) and (k) or (l). Each permit-by-rule provision covers all pressroom equipment, including all press operations (makeready, printing runs, and press cleaning), in-line or off-line coating, adhesive/binding operations, and any other press-related activities which involve the use of materials that contain volatile organic compounds (VOCs). The PBR covers all of these operations at the facility but does not cover other types of air pollution sources at the facility such as boilers, pneumatic trim handling systems, solvent reclaiming units, etc., that may require air pollution permits. The facility may also claim as exempt from permit-to-install requirements any individual nonheat-set or sheet-fed press having an organic compound potential to emit of less than three tons per year per OAC 3745-31-03(A)(1)(s). See Ohio EPA Engineering Guide #68, <http://www.epa.ohio.gov/dapc/engineer/eguides.aspx> for guidance on this exemption. For copies of these regulations, contact your Ohio EPA District Office or Local Air Agency. State regulations may also be viewed and downloaded from the Ohio EPA website at <http://www.epa.ohio.gov/dapc/regs/regs.aspx>

- I. Enter the company name, corporate name or other name and mailing address for the legal entity which owns or operates the facility specified in the permit-by-rule notification (example: Smith Printing, Inc. or Benson's Quick Press Co.). Provide the name of the individual to be contacted concerning questions about the notification form being submitted.
- II. Enter the name and address for the facility at which the permit-by-rule units (equipment) operate (example: 45th Street Store, Smith Printing, Plant #4). This could be the same as the applicant name if the facility has no independent name. This address information is the location of the facility and not the mailing address, unless they are the same. Provide the name of the individual at the facility to be contacted concerning questions about the operation of the facility. Please specify the 10-digit Ohio EPA facility ID number if the facility has been issued air pollution permits from the Ohio EPA. If no permits exist, leave this blank. The facility ID number is contained in permits to install, permits to operate, or fee emission reports sent to the facility by Ohio EPA. If not known, contact the District Office or Local Air Agency with jurisdiction in the area the facility is located to confirm the facility ID number.
- III. Check all applicable boxes. Check "Initial" if this is a new installation or the first request to operate under a permit-by-rule provision. Check "Permit-by-Rule Status Change" if the facility is switching from the Small Printing Facility PBR to the Midsize Printing Facility PBR or vice-versa. Check "Ownership change" if the facility has changed names, contact person, or has a new owner intending to operate under a permit-by-rule provision. If using this form to also request the revocation of existing permits, specify the permit numbers and all applicable 4-digit emission unit IDs (K001, K002, R001, etc.) These numbers are contained in permits to install, permits to operate, or fee emission reports sent to the facility by Ohio EPA. If not known, contact the District Office or Local Air Agency with jurisdiction in the area the facility is located to confirm the permit numbers and emission unit ID numbers.
- IV. Check the appropriate box to indicate which PBR provision is being requested. The PBR provisions for small and mid-size printing facilities are different and contain different emission limitations, usage limits and record keeping requirements. The qualifying criteria for the small and midsize printing facility PBRs are included in these instructions.
- V. Complete the appropriate information for each press at the facility. Consult the press manufacturer for model information if needed. Under "Printing Method", use any of the following designations:

Flexographic, water- based	Lithographic, heatset
Flexographic, solvent-based	Lithographic, non-heatset
Flexographic, UV-cured	Screen
Letterpress	Digital

Attach additional pages if reporting more than four presses.

Signature Requirements – This notification will be deemed incomplete if it is not signed by the appropriate signatory. Please see the following guidance at http://www.epa.ohio.gov/portals/27/title_v/respoff.pdf for more information on who is authorized to sign this form or contact your Ohio EPA District Office or Local Air Agency.

Permit-by-Rule Requirements: Small/Midsize Printing Facility

Excerpts from applicable sections of Ohio Administrative Code 3745-31-03(A)(4) are included with these Instructions for convenience. An owner or operator of a small or midsize printing facility that intends to install and/or operate according to the permit-by-rule provisions must comply with all applicable requirements specified in paragraphs (A)(4)(a) – General Provisions, and (A)(4)(k) – Small printing facility or (A)(4)(l) – Midsize printing facility.

(4) Permit-by-rule exemptions

The following air contaminant sources are exempt from the requirement to obtain a permit to install. These exemptions are valid only as long as the owner or operator complies with all of the permit-by-rule general provisions, meets the qualifying criteria defined in the applicable permit-by-rule and complies with all of the requirements under the applicable permit-by-rule specific provisions. Upon request by the director, the owner or operator of a facility that has exceeded the permit-by-rule thresholds or that the director finds is causing or may cause a public nuisance in violation of rule 3745-15-07 of the Administrative Code shall submit an application for a permit to install.

These exemptions do not, however, exempt any air contaminant source from requirements of the federal Clean Air Act, including being considered for purposes of determining whether a facility constitutes a major source or is otherwise regulated under Chapter 3745-77 of the Administrative Code or any requirement to list insignificant activities and emission levels in a Title V permit application. In addition, this rule does not relieve the owner or operator from the requirement of including the emissions associated with the exempt sources into any major new source review permitting action.

(a) General provisions

These general provisions apply to all owner or operators who are utilizing one or more of the permit-by-rule exemptions listed in paragraphs (A)(4)(b) through (A)(4)(l).

(i) Recordkeeping requirements

The owner or operator shall collect and maintain the records described for each air contaminant source exempted under paragraph (A)(4) of this rule and these records shall be retained in the owner or operator's files for a period of not less than five years, unless otherwise specified in each exemption. These records shall be made available to the director or any authorized representative of the director for review during normal business hours.

(ii) Notification requirements for new installations

For the purposes of this paragraph, a new permit-by-rule air contaminant source is an air contaminant source installed after the promulgation date of any new applicable permit-by-rule or July 29, 2005, whichever comes later. The owner or operator of a new permit-by-rule air contaminant source electing to use an applicable permit-by-rule exemption shall submit a written notification in a form and manner prescribed by the director prior to installation of the air contaminant source. This notification, or form, shall be submitted to the appropriate Ohio environmental protection agency district office or local air agency, and shall contain the following information:

(a) The owner or operator's and the facility contact's name;

(b) The facility mailing address and telephone number;

(c) The location of the air contaminant source(s);

(d) A description of the air contaminant source, including any pollution control(s); and

(e) A statement by the owner or operator that indicates which permit-by-rule applies to the air contaminant source.

(iii) Notification requirements for existing permitted sources

The owner or operator of an air contaminant source which is operating under an existing permit to install and/or permit to operate may continue to operate in compliance with that permit or may submit a written request to the Ohio EPA to revoke any such individual permit or permits and to allow the air contaminant source to operate under the permit-by-rule provisions. The director may revoke a permit to install and/or permit to operate if the permittee requests revocation, agrees to meet all permit-by-rule qualifying and operating conditions, and the director determines that the revocation will not result in the violation of any applicable laws. When a permittee requests a revocation pursuant to this paragraph, the director, without prior hearing, shall make a final determination on the request and inform the permittee in writing. If the director agrees with the request to operate under the permit-by-rule, then the permit-by-rule becomes applicable to the permittee on the date the existing permit to install and/or permit to operate are revoked.

(iv) Notification requirements for existing permit-by-rule sources

The owner or operator of an air contaminant source that is operating under one of the permit-by-rules that existed prior to July 29, 2005 (emergency electrical generators, injection and compression molding, crushing and screening plants, soil-vapor extraction and soil-liquid extraction) and desires to continue operating under the permit-by-rule shall submit a written notification which contains all of the elements required in paragraph (A)(4)(a)(ii) of this rule. This notification shall be submitted to the appropriate Ohio environmental protection agency district office or local air agency and shall be submitted by July 29, 2006.

(v) Records retention requirements

Each record of any monitoring data, testing data, and support information required pursuant to a specific permit-by-rule shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by the specific permit-by-rule. Such records may be maintained in computerized form.

(vi) Reporting requirements

The owner or operator shall submit required reports in the following manner:

(a) Reports of any monitoring and/or record keeping information required by a specific permit-by-rule shall be submitted to the appropriate Ohio environmental protection agency district office or local air agency.

(b) Except as otherwise may be provided in a permit-by-rule specific reporting requirements paragraph of a specific permit-by-rule, a written report of any deviations (excursions) from emission limitations, operational restrictions, qualifying criteria, and control equipment operating parameter limitations that have been detected by the testing, monitoring, and record keeping requirements specified in the permit-by-rule shall be submitted to the appropriate Ohio environmental protection agency district office or local air agency within thirty days of the date the deviation occurred. The report shall describe the specific limitation and/or operational restriction exceeded, the probable cause of such deviation, and any corrective actions or preventive measures that have been or will be taken.

(vii) Scheduled maintenance/malfunction reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of rule 3745-15-06 of the Administrative Code. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio environmental protection agency district office or local air agency in accordance with paragraph (B) of rule 3745-15-06 of the Administrative Code. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is served by such control system(s).

Note: Paragraphs (b) through (j) are not included since they do not apply to the printing facility PBRs

(k) Small printing facility permit-by-rule

(i) Qualifications

A printing facility that meets the following qualifications is eligible to use this permit-by-rule:

(a) The facility has one or more printing lines which utilize only the screen, digital, flexographic, letterpress, non-heatset lithographic, or heatset lithographic printing processes, and which do not utilize add-on emission control equipment.

(b) The facility emits no more than ten tons of VOCs, five tons of a single HAP and ten tons of combined HAPs in any calendar year as demonstrated by either calculating actual facility-wide emissions, using methods approved by the Ohio environmental protection agency, or by electing to comply with the material usage limitations specified in paragraph (A)(4)(k)(i)(c) of this rule.

(c) In lieu of calculating emissions to demonstrate compliance with the annual facility emission limitations specified in paragraph (A)(4)(k)(i)(b) of this rule, the owner or operator may elect to qualify the facility for this permit-by-rule by meeting the following material usage limitations for all materials employed at the facility in any calendar year:

(i) Uses no more than one thousand three hundred thirty-three gallons of materials containing the same single HAP and no more than two thousand six hundred sixty-seven gallons of materials containing any HAPs.

- (ii) Operates only heatset offset lithographic printing lines and uses no more than twenty thousand pounds of ink, cleaning solvent, and fountain solution additives combined; or
- (iii) Operates only non-heatset offset lithographic printing lines and uses no more than two thousand eight hundred fifty gallons of cleaning solvent, and fountain solution additives combined; or
- (iv) Operates only digital printing lines and uses no more than two thousand four hundred twenty-five gallons of solvent from inks and clean-up solutions and other solvent-containing materials combined; or
- (v) Operates only screen or letterpress printing lines and uses no more than two thousand eight hundred fifty gallons of solvent from inks and clean-up solutions and other solvent-containing materials combined; or
- (vi) Operates only water-based or ultraviolet (UV)-cured material flexographic printing lines and uses no more than eighty thousand pounds of water-based inks, coatings, and adhesives, combined; or
- (vii) Operates only solvent based material flexographic printing lines and uses no more than twenty thousand pounds of solvent from inks, dilution solvents, coatings, cleaning solutions and adhesives, combined; or
- (viii) Operates any combination of screen, digital, flexographic, letterpress, non-heatset lithographic, or heatset lithographic printing lines and the facility uses no more than the most stringent of the material usage limitations contained in paragraphs (A)(4)(k)(iii) to (A)(4)(k)(viii) of this rule for the type of air contaminant source(s) at the facility.

(ii) Applicable emission limitations and/or control requirements

- (a) The applicable rules, emission limitations and control requirements that apply to the facility subject to this permit-by-rule are defined in the following table:

Applicable Rule(s)	Applicable Emissions Limitations/Control Requirements
Paragraph (A)(3) of rule 3745-31-05 of the Administrative Code	Facility emissions shall not exceed ten tons of VOC, five tons of a single HAP and ten tons of combined HAPs for any calendar year.
Paragraph (Y)(2)(b) of rule 3745-21-09 of the Administrative Code (flexographic presses only)	Exempt from the requirements of paragraph (Y)(1) of rule 3745-21-09 of the Administrative Code since the qualifying criteria ensure that the combined maximum usage of coatings and inks in all presses at the facility is less than one hundred forty eight tons per year.

(iii) Monitoring and/or recordkeeping requirements

- (a) The owner or operator of the printing facility shall maintain annual records at the facility that list the following information for each graphic arts material (ink, fountain solution additives, clean-up solvents, etc.) employed in the facility during each calendar year:
 - (i) The name and identification number of each material employed.
 - (ii) The quantity of each material employed, in gallons or pounds.
 - (iii) The OC content of each material, in pounds per gallon, or per cent, by weight.
 - (iv) The individual HAP content for each HAP-containing material, in pounds of individual HAP per gallon of material.
 - (v) The total combined HAP content of each material, in pounds of total HAP per gallon of material.
 - (vi) The annual summation of usage in gallons, or pounds, of each graphic arts material if the facility elects to demonstrate compliance with the material usage limitations specified in paragraph (A)(4)(k)(c) of this rule; or
 - (vii) The annual summation of total facility emissions of VOC, individual HAP, and combined HAP from all graphic arts materials employed if the facility elects to calculate actual emissions to demonstrate compliance with the emission limitations specified in paragraph (A)(4)(k)(b) of this rule.

(iv) Permit-by-rule specific reporting requirements

- (a) If a small printing facility exempt under this paragraph (A)(4)(k) of this rule should elect to operate under the permit-by-rule provisions for a midsize printing facility specified by paragraph (A)(4)(l) of this rule, the owner or operator of such facility shall comply with the notification requirements of paragraph (A)(4)(a)(ii) of this rule prior to operating under the permit-by-rule provisions for midsize printing facilities.

(v) Testing Requirements

- (a) Compliance with the annual material usage limitations shall be based upon the recordkeeping requirements specified in paragraph (A)(4)(k)(iii)(a) of this rule.
- (b) For screen, letterpress, and non-heatset lithographic printing, compliance with the annual VOC emission limitation is based on the annual material usage limitations, in gallons, multiplied by a maximum VOC content of 7.0 pounds per gallon, and divided by two thousand pounds per ton. For digital printing, compliance with the annual VOC emission limitation is based on the annual material usage limitations, in gallons, multiplied by a maximum VOC content of 7.5 pounds per gallon, and divided by two thousand pounds per ton. For water-based or ultraviolet (UV)-cured flexographic printing, compliance with the annual VOC emission limitation is based on the annual material usage limitation, in pounds, multiplied by an assumed maximum VOC content of twenty-five per cent, and divided by two thousand pounds per ton. For solvent-based flexographic printing and heatset lithographic printing, compliance with the annual VOC emission limitation is based on the annual material usage limitation, in pounds, multiplied by an assumed maximum VOC content of one hundred per cent, and divided by two thousand pounds per ton. For all printing types, compliance with the annual HAP emission limitations is based on the annual material usage limitations specified in paragraph (A)(4)(k)(i)(c)(i) of this rule, in gallons, multiplied by a maximum HAP content of 7.5 pounds per gallon, and divided by two thousand pounds per ton.
- (c) An owner or operator of the facility electing to demonstrate compliance with the annual VOC, HAP, and combined HAP emission limitations by calculating the actual facility emissions may use the actual material VOC contents and usage rates from records required by paragraph (A)(4)(k)(iii) of this rule. The calculations shall be performed annually using methods approved by the Ohio environmental protection agency.

(l) Mid-size printing facility permit-by-rule

(i) Qualifications

A printing facility that meets the following qualifications is eligible to use this permit-by-rule:

- (a) The facility has one or more printing lines which utilize only the screen, digital, flexographic, letterpress, non-heatset lithographic, or heatset lithographic printing processes, and which do not utilize add-on emission control equipment.
- (b) The facility emits no more than twenty-five tons of VOCs, five tons of a single HAP and 12.5 tons of combined HAPs in any rolling, twelve-month period as demonstrated by either calculating actual facility-wide emissions, using methods approved by the Ohio environmental protection agency, or by electing to comply with the material usage limitations specified in paragraph (A)(4)(l)(i)(c) of this rule.
- (c) In lieu of calculating emissions to demonstrate compliance with the facility emission limitations specified in paragraph (A)(4)(l)(i)(b) of this rule, the facility may elect to qualify for this permit-by-rule by meeting the following material usage limitations for all materials employed at the facility in any rolling, twelve-month period:
 - (i) Uses no more than one thousand three hundred thirty-three gallons of materials containing the same single HAP and no more than three thousand three hundred thirty-three gallons of materials containing any HAPs.
 - (ii) Operates only heatset offset lithographic printing lines and uses no more than fifty thousand pounds of ink, cleaning solvent, and fountain solution additives combined; or
 - (iii) Operates only non-heatset offset lithographic printing lines and uses no more than seven thousand one hundred gallons of cleaning solvent and fountain solution additives combined; or
 - (iv) Operates only digital printing lines and uses no more than six thousand gallons of solvent from inks and clean-up solutions and other solvent containing materials combined; or
 - (v) Operates only screen or letterpress printing lines and uses no more than seven thousand one hundred gallons of solvent from inks and clean-up solutions and other solvent containing materials combined; or
 - (vi) Operates only water-based or ultraviolet (UV)-cured material flexographic printing lines and uses no more than two hundred thousand pounds of water-based inks, coatings, and adhesives, combined; or
 - (vii) Operates only solvent based material flexographic printing lines and uses no more than fifty thousand pounds of solvent from inks, dilution solvents, coatings, clean-up solutions and adhesives, combined; or

(viii) Operates any combination of screen, digital, flexographic, letterpress, non-heatset lithographic, or heatset lithographic printing processes and the facility uses no more than the most stringent of the material usage limits contained in paragraphs (A)(4)(I)(iii) to (A)(4)(I)(viii) of this rule for the type of air contaminant source(s) at the facility.

(d) The facility employs cleanup solutions which meet all of the following standards:

- (i) Cleanup solutions either shall not exceed thirty per cent VOC, by weight, as applied, or shall have a VOC composite partial pressure of ten millimeters of mercury (mmHg) or less at twenty degrees Celsius (sixty-eight degrees Fahrenheit).
- (ii) Cleanup solutions shall be kept in covered containers during transport and storage.
- (iii) Shop towels contaminated with cleanup solution shall be kept, when not in use, in covered containers.
- (iv) The use of cleanup solutions not meeting the condition in paragraph (A)(4)(I)(d)(i) of this rule shall not exceed a combined total of one hundred ten gallons in any rolling, twelve-month period.

(ii) Applicable emission limitations and/or control requirements

(a) The applicable rules, emission limitations, and control requirements that apply to the facility subject to this permit-by-rule are defined in the following table:

Applicable Rule(s)	Applicable Emissions Limitations/Control Requirements
Paragraph (A)(3) of rule 3745-31-05 of the Administrative Code	Facility emissions shall not exceed twenty-five tons of VOC, five tons of a single HAP and 12.5 tons of combined HAPs for any rolling, twelve-month period.
Paragraph (Y)(2)(b) of rule 3745-21-09 of the Administrative Code (flexographic presses only)	Exempt from the requirements of paragraph (Y)(1) of rule 3745-21-09 of the Administrative Code since the qualifying criteria ensure that the combined maximum usage of coatings and inks in all presses at the facility is less than one hundred forty eight tons per year.

(iii) Monitoring and/or recordkeeping requirements

(a) The owner or operator of the printing facility shall maintain monthly records at the facility that list the following information for each graphic arts material (ink, fountain solution additives, cleanup solvents, etc.) employed in the facility:

- (i) The name and identification number of each material employed.
- (ii) The quantity of each material employed, in gallons or pounds.
- (iii) The OC content of each material, in pounds per gallon, or per cent by weight.
- (iv) The individual HAP content for each HAP-containing material, in pounds of individual HAP per gallon of material.
- (v) The total combined HAP content of each material, in pounds of combined HAP per gallon of material.
- (vi) The rolling, twelve-month summation of usage in gallons of each graphic arts material employed if the facility elects to demonstrate compliance with the material usage limitations specified in paragraph (A)(4)(I)(c) of this rule; or
- (vii) The rolling, twelve-month summation of total facility emissions of VOC, individual HAP, and combined HAP from all graphic arts materials employed if the facility elects to calculate actual emissions to demonstrate compliance with the emission limitations specified in paragraph (A)(4)(I)(b) of this rule.

(iv) Testing requirements

(a) Compliance with the rolling, twelve-month material usage thresholds and/or emission limitations shall be based upon the recordkeeping requirements specified in paragraph (A)(4)(I)(iii)(a) of this rule.

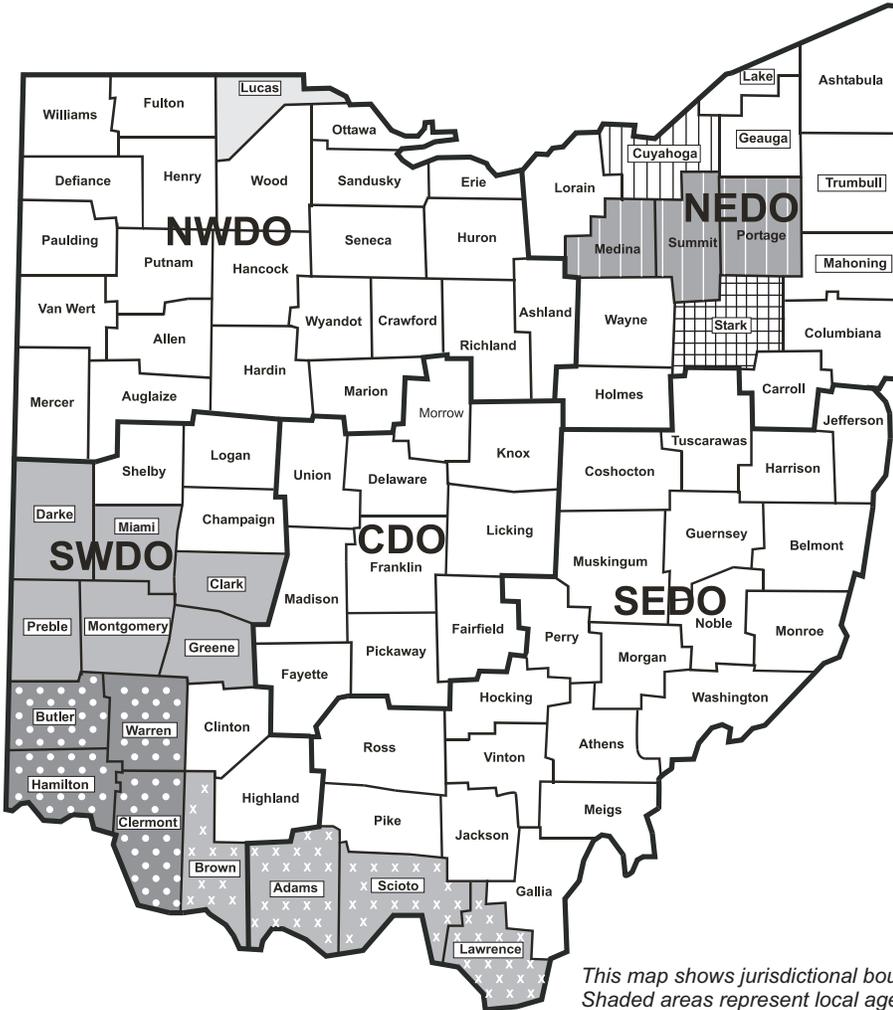

(b) For screen, letterpress, and non-heatset lithographic printing, compliance with the annual VOC emission limitation is based on the annual material usage limitations, in gallons, multiplied by a maximum VOC content of 7.0 pounds per gallon, and divided by two thousand pounds per ton. For digital printing, compliance with the annual VOC emission limitation is based on the annual material usage limitations, in gallons, multiplied by a maximum VOC content of 7.5 pounds per gallon, and divided by two thousand pounds per ton. For water-based or UV-cured flexographic printing, compliance with the annual VOC emission limitation is based on the annual material usage limitation, in pounds, multiplied by an assumed maximum VOC content of twenty-five per cent, and divided by two thousand pounds per ton.

For solvent-based flexographic printing and heatset lithographic printing, compliance with the annual VOC emission limitation is based on the annual material usage limitation, in pounds, multiplied by an assumed maximum VOC content of one hundred per cent, and divided by two thousand pounds per ton. For all printing types, compliance with the annual HAP emission limitations is based on the annual material usage limitations specified in paragraph (A)(4)(1)(i)(c)(i) of this rule, in gallons, multiplied by a maximum HAP content of 7.5 pounds per gallon, and divided by two thousand pounds per ton.

(c) An owner or operator of the facility electing to demonstrate compliance with the annual VOC, HAP, and combined HAP emission limitations by calculating the actual facility emissions may use the actual material VOC contents and usage rates from records required by paragraph (A)(4)(1)(iii) of this rule. The calculations shall be performed using methods approved by the Ohio environmental protection agency.
