

## Public Notice – Request for Comment

### Draft Amended Ohio Administrative Code (OAC) Rule 3745-21-09 “Control of emissions of volatile organic compounds from stationary sources and perchloroethylene from dry cleaning facilities”

Please note that the Ohio Environmental Protection Agency, Division of Air Pollution Control has reviewed Ohio Administrative Code (OAC) Rule 3745-21-09, “Control of emissions of volatile organic compounds from stationary sources and perchloroethylene from dry cleaning facilities” and is recommending changes.

Ohio EPA has prepared draft rule language in paragraph (DDD) of this rule which would allow and set forth procedures through which existing Gasoline Dispensing Facilities (GDFs) could decommission their Stage II vapor recovery systems. The draft amendments also call for all existing GDFs to decommission their Stage II systems by January 1, 2017.

As part of the rule-making process, Ohio EPA is required by Section 121.39 of the Ohio Revised Code to consult with organizations that represent political subdivisions, environmental interests, business interests, and others affected by the rules. The Ohio EPA is offering your organization the opportunity to comment on these rules before the division formally proposes them.

These rules, the draft business impact analysis (BIA) Form, and supporting documentation are available electronically for review on Ohio EPA’s website at: See the information under interested party review tab for OAC Rule 3745-21-09. We request that you provide us with any comments you may have to the changes that have been recommended **by October 8, 2013**.

Please submit your comments or suggestions to the following addresses. Persons submitting comments electronically are encouraged to follow-up with a hard copy via regular mail:
