

3745-31-02 Requirements.

(A) Permit to *install*.

- (1) Except as provided in rule 3745-31-03 of the Administrative Code, no person shall cause, permit, or allow the *installation* of a new source of air pollutants or a new *disposal system* as defined in division (G) of section 6111.01 of the Revised Code, or cause, permit, or allow the *modification* of an air contaminant source or a *disposal system*, or establish or modify a *solid waste disposal facility*, without first obtaining a permit to *install* from the director. With regard to *disposal systems* as defined in division (G) of section 6111.01 of the Revised Code, application for a permit to *install* shall include plans for the *disposal system*, and issuance of a permit to *install* shall constitute approval of plans for the *disposal system* pursuant to sections 6111.44 and 6111.45 of the Revised Code.
- (2) The owner or operator of any *air contaminant source* may apply for a permit to *install* to voluntarily limit the *allowable emissions* from the *air contaminant source* or limit the type of *air contaminants* authorized to be emitted from the *air contaminant source*. The director shall act upon such application in accordance with the requirements of rule 3745-31-05 of the Administrative Code, provided that paragraphs (A)(3) and (C) of that rule shall not apply unless the application is for the *installation* of a new source as defined by paragraph (NN) of rule 3745-31-01 of the Administrative Code or is for a *modification* of an *air contaminant source* as defined by paragraph (KK) of rule 3745-31-01 of the Administrative Code.

(B) Land application of sludge.

In the case of land application of sludge, no person shall cause, permit, or allow sludge to be applied to land without first submitting and obtaining approval of detail plans from the director. Any plan approval issued for land application of sludge shall specifically describe the type, character, and composition of such sludge and shall specifically designate the method, terms and conditions of its application.

- (C) The director, in his discretion, may issue an order requiring any person planning to *install* or *modify*, or in

the process of installing or modifying, any air contaminant source and/or disposal system as these terms are defined in paragraphs (D) and (I) of rule 3745-31-01 of the Administrative Code, which are otherwise exempted, to obtain a permit to install or plan approval, before proceeding with installation or modification, if in the director's judgment, operation of the air contaminant source and/or disposal system after installation or modification might result in a violation of the criteria established in paragraph (A) of rule 3745-31-05 of the Administrative Code.

- (D) The director, in his discretion or where required to do so by federal laws or regulations, may issue a single permit to install or plan approval having application to all pollutants of any kind emanating from any air contaminant source, disposal system, or solid waste disposal facility, or issue a single permit to install or plan approval having applicability to more than one air contaminant source, disposal system or solid waste disposal facility, controlled by a common owner or operator, located in the same county.
