**RE: Proposed Title V Chapter 3745-77 Permit
15-76-00-0301 Marathon Ashland Petroleum LLC,
Canton Refinery**

Attn: Genevieve Damico AR-18J
United States Environmental Protection Agency
Region V
77 West Jackson Blvd.
Chicago, IL 60604-3590

Dear Ms. Damico:

The proposed issuance of the Title V permit for Marathon Ashland Petroleum LLC, Canton Refinery, has been created in Ohio EPA's State Air Resources System (STARS) on 05/28/03, for review by USEPA. This proposed action is identified in STARS as  3-Title V Proposed Permit +C covering the facility specific terms and conditions, and  Title V Proposed Permit covering the general terms and conditions. This proposed permit will be processed for issuance as a final action after forty-five (45) days from USEPA's receipt of this certified letter if USEPA does not object to the proposed permit. Please contact me at (614) 644-3631 by the end of the forty-five (45) day review period if you wish to object to the proposed permit.

Very truly yours,

Michael W. Ahern, Supervisor
Field Operations and Permit Section
Division of Air Pollution Control

cc: Canton Division of Air Pollution Control
File, DAPC PMU

State of Ohio Environmental Protection Agency

PROPOSED TITLE V PERMIT

Issue Date: 05/28/03

Effective Date: To be entered upon final issuance

Expiration Date: To be entered upon final issuance

This document constitutes issuance of a Title V permit for Facility ID: 15-76-00-0301 to:
Marathon Ashland Petroleum LLC, Canton Refinery
2408 Gambrinus Avenue SW
Canton, OH 44706

Emissions Unit ID (Company ID)/Emissions Unit Activity Description

J001 (Gasoline/Kerosene/Diesel Loading Rack)
Gasoline/Kerosene/Diesel Loading Rack with

Vapor Recovery Unit

You will be contacted approximately eighteen (18) months prior to the expiration date regarding the renewal of this permit. If you are not contacted, please contact the appropriate Ohio EPA District Office or local air agency listed below. This permit and the authorization to operate the air contaminant sources (emissions units) at this facility shall expire at midnight on the expiration date shown above. If a renewal permit is not issued prior to the expiration date, the permittee may continue to operate pursuant to OAC rule 3745-77-08(E) and in accordance with the terms of this permit beyond the expiration date, provided that a complete renewal application is submitted no earlier than eighteen (18) months and no later than one-hundred eighty (180) days prior to the expiration date.

Described below is the current Ohio EPA District Office or local air agency that is responsible for processing and administering your Title V permit:

Canton Division of Air Pollution Control
420 Market Avnue N.
Canton, OH 44702-1544
(330) 489-3385

OHIO ENVIRONMENTAL PROTECTION AGENCY

Christopher Jones
Director

PART I - GENERAL TERMS AND CONDITIONS

A. State and Federally Enforceable Section

1. Monitoring and Related Record Keeping and Reporting Requirements

a. Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall maintain records that include the following, where applicable, for any required monitoring under this permit:

- i. The date, place (as defined in the permit), and time of sampling or measurements.
- ii. The date(s) analyses were performed.
- iii. The company or entity that performed the analyses.
- iv. The analytical techniques or methods used.
- v. The results of such analyses.
- vi. The operating conditions existing at the time of sampling or measurement.

(Authority for term: OAC rule 3745-77-07(A)(3)(b)(i))

b. Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

(Authority for term: OAC rule 3745-77-07(A)(3)(b)(ii))

c. The permittee shall submit required reports in the following manner:

i. Reports of any required monitoring and/or record keeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.

(Authority for term: OAC rule 3745-77-07(A)(3)(c))

ii. **All reporting required in accordance with the OAC rule 3745-77-07(A)(3)(c) with respect to emission limitations, operational restrictions, and control device operating parameter limitations shall be submitted in the following manner:**

- (a) Written reports of (i) any deviations from federally enforceable emission limitations, operational restrictions, and control device operating parameter limitations ; (ii) the probable cause of such deviations; and (iii) any corrective actions or preventive measures taken, shall be promptly made to the appropriate Ohio EPA District Office or local air agency. Except as may otherwise be provided in the terms and conditions for a specific emissions unit, i.e., in Part III of this Title V permit, the written reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year, and shall cover the previous calendar quarters. In identifying each deviation, the permittee shall specify the applicable requirement for which the deviation occurred, describe each deviation, and provide the magnitude and duration of each deviation. These written reports shall satisfy the requirements (in part) of OAC rule 3745-77-

07(A)(3)(c)(i) and (ii) pertaining to the submission of monitoring reports every six months and the requirements (in part) of OAC rule 3745-77-07(A)(3)(c)(iii) pertaining to the prompt reporting of all deviations. See B.6 below if no deviations occurred during the quarter.

(Authority for term: OAC rules 3745-77-07(A)(3)(c)(i), (ii) and (iii))

- (b) Any malfunction, as defined in OAC rule 3745-15-06(B)(1), shall be promptly reported to the Ohio EPA in accordance with OAC rule 3745-15-06. In addition, to fulfill the deviation reporting requirements for this Title V permit, written reports that identify each malfunction that occurred during each calendar quarter shall be submitted, at a minimum, quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year, and shall cover the previous calendar quarters.

In identifying each deviation caused by a malfunction, the permittee shall specify the applicable requirement for which the deviation occurred, describe each deviation, and provide the magnitude and duration of each deviation. For a specific malfunction, if this information has been provided in a written report that was submitted in accordance with OAC rule 3745-15-06, the permittee may simply reference that written report to identify the deviation. Also, if a deviation caused by a malfunction is identified in a written report submitted pursuant to paragraph (a) above, a separate report is not required for that malfunction pursuant to this paragraph. Nevertheless, all malfunctions, including those reported only verbally in accordance with OAC rule 3745-15-06, must be reported in writing, at a minimum, on a quarterly basis.

Any scheduled maintenance, as defined in OAC rule 3745-15-06(A)(1), that results in a deviation from a federally enforceable emission limitation, operational restriction, and control device operating parameter limitation shall be reported in the same manner as described above for malfunctions. These written reports for malfunctions (and scheduled maintenance projects, if appropriate) shall satisfy the requirements (in part) of OAC rule 3745-77-07(A)(3)(c)(iii) pertaining to the prompt reporting of all deviations.

(Authority for term: OAC rules 3745-77-07(A)(3)(c)(iii))

iii. **For monitoring, record keeping, and reporting requirements:**

Written reports that identify any deviations from the federally enforceable monitoring, record keeping, and reporting requirements contained in this permit shall be submitted to the appropriate Ohio EPA District Office or local air agency every six months, i.e., by January 31 and July 31 of each year, for the previous six calendar months. In identifying each deviation, the permittee shall specify the applicable requirement for which the deviation occurred, describe each deviation, and provide the magnitude and duration of each deviation. These semi-annual written reports shall satisfy the requirements of OAC rule 3745-77-07(A)(3)(c)(i) and (ii) pertaining to the reporting of any deviations related to the monitoring, record keeping, and reporting requirements. If no deviations occurred during a six-month period, the permittee shall submit a semi-annual report which states that no deviations occurred during that period.

(Authority for term: OAC rules 3745-77-07(A)(3)(c)(i) and (ii))

- iv. Each written report shall be signed by a responsible official certifying that, "based on information and belief formed after reasonable inquiry, the statements and information in the report (including any written malfunction reports required by OAC rule 3745-15-06 that are referenced in the deviation reports) are true, accurate, and complete."
(Authority for term: OAC rule 3745-77-07(A)(3)(c)(iv))

2. **Scheduled Maintenance/Malfunction Reporting**

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions unit(s) or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in OAC rule 3745-15-06, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).
(Authority for term: OAC rule 3745-77-07(A)(3)(c)(iii))

3. **Risk Management Plans**

If applicable, the permittee shall develop and register a risk management plan pursuant to section 112(r) of the Clean Air Act, as amended, 42 U.S.C. § 7401 et seq. ("Act"); and, pursuant to 40 C.F.R. 68.215(a), the permittee shall submit either of the following:

- a. a compliance plan for meeting the requirements of 40 C.F.R. Part 68 by the date specified in 40 C.F.R. 68.10(a) and OAC 3745-104-05(A); or
- b. as part of the compliance certification submitted under 40 C.F.R. 70.6(c)(5), a certification statement that the source is in compliance with all requirements of 40 C.F.R. Part 68 and OAC Chapter 3745-104, including the registration and submission of the risk management plan.

(Authority for term: OAC rule 3745-77-07(A)(4))

4. **Title IV Provisions**

If the permittee is subject to the requirements of 40 CFR Part 72 concerning acid rain, the permittee shall ensure that any affected emissions unit complies with those requirements. Emissions exceeding any allowances that are lawfully held under Title IV of the Act, or any regulations adopted thereunder, are prohibited.

(Authority for term: OAC rule 3745-77-07(A)(5))

5. **Severability Clause**

A determination that any term or condition of this permit is invalid shall not invalidate the force or effect of any other term or condition thereof, except to the extent that any other term or condition depends in whole or in part for its operation or implementation upon the term or condition declared invalid.

(Authority for term: OAC rule 3745-77-07(A)(6))

6. **General Requirements**

- a. The permittee must comply with all terms and conditions of this permit. Any noncompliance with the federally enforceable terms and conditions of this permit constitutes a violation of the Act, and is

grounds for enforcement action or for permit revocation, revocation and reissuance, or modification, or for denial of a permit renewal application.

- b. It shall not be a defense for the permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the federally enforceable terms and conditions of this permit.
- c. This permit may be modified, reopened, revoked, or revoked and reissued, for cause, in accordance with A.10 below. The filing of a request by the permittee for a permit modification, revocation and reissuance, or revocation, or of a notification of planned changes or anticipated noncompliance does not stay any term and condition of this permit.
- d. This permit does not convey any property rights of any sort, or any exclusive privilege.
- e. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon request, the permittee shall also furnish to the Director or an authorized representative of the Director, copies of records required to be kept by this permit. For information claimed to be confidential in the submittal to the Director, if the Administrator of the U.S. EPA requests such information, the permittee may furnish such records directly to the Administrator along with a claim of confidentiality.

(Authority for term: OAC rule 3745-77-07(A)(7))

7. Fees

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78.

(Authority for term: OAC rule 3745-77-07(A)(8))

8. Marketable Permit Programs

No revision of this permit is required under any approved economic incentive, marketable permits, emissions trading, and other similar programs or processes for changes that are provided for in this permit.

(Authority for term: OAC rule 3745-77-07(A)(9))

9. Reasonably Anticipated Operating Scenarios

The permittee is hereby authorized to make changes among operating scenarios authorized in this permit without notice to the Ohio EPA, but, contemporaneous with making a change from one operating scenario to another, the permittee must record in a log at the permitted facility the scenario under which the permittee is operating. The permit shield provided in these general terms and conditions shall apply to all operating scenarios authorized in this permit.

(Authority for term: OAC rule 3745-77-07(A)(10))

10. Reopening for Cause

This Title V permit will be reopened prior to its expiration date under the following conditions:

- a. Additional applicable requirements under the Act become applicable to one or more emissions units covered by this permit, and this permit has a remaining term of three or more years. Such a reopening shall be completed not later than eighteen (18) months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions has been extended pursuant to paragraph (E)(1) of OAC rule 3745-77-08.
- b. This permit is issued to an affected source under the acid rain program and additional requirements (including excess emissions requirements) become applicable. Upon approval by the Administrator, excess emissions offset plans shall be deemed to be incorporated into the permit, and shall not require a reopening of this permit.
- c. The Director of the Ohio EPA or the Administrator of the U.S. EPA determines that the federally applicable requirements in this permit are based on a material mistake, or that inaccurate statements were made in establishing the emissions standards or other terms and conditions of this permit related to such federally applicable requirements.
- d. The Administrator of the U.S. EPA or the Director of the Ohio EPA determines that this permit must be revised or revoked to assure compliance with the applicable requirements.

(Authority for term: OAC rules 3745-77-07(A)(12) and 3745-77-08(D))

11. Federal and State Enforceability

Only those terms and conditions designated in this permit as federally enforceable, that are required under the Act, or any of its applicable requirements, including relevant provisions designed to limit the potential to emit of a source, are enforceable by the Administrator of the U.S. EPA, the State, and citizens under the Act. All other terms and conditions of this permit shall not be federally enforceable and shall be enforceable under State law only.

(Authority for term: OAC rule 3745-77-07(B))

12. Compliance Requirements

- a. Any document (including reports) required to be submitted and required by a federally applicable requirement in this Title V permit shall include a certification by a responsible official that, based on information and belief formed after reasonable inquiry, the statements in the document are true, accurate, and complete.
- b. Upon presentation of credentials and other documents as may be required by law, the permittee shall allow the Director of the Ohio EPA or an authorized representative of the Director to:
 - i. At reasonable times, enter upon the permittee's premises where a source is located or the emissions-related activity is conducted, or where records must be kept under the conditions of this permit.
 - ii. Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit, subject to the protection from disclosure to the public of confidential information consistent with paragraph (E) of OAC rule 3745-77-03.

- iii. Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit.
 - iv. As authorized by the Act, sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit and applicable requirements.
- c. The permittee shall submit progress reports to the appropriate Ohio EPA District Office or local air agency concerning any schedule of compliance for meeting an applicable requirement. Progress reports shall be submitted semiannually, or more frequently if specified in the applicable requirement or by the Director of the Ohio EPA. Progress reports shall contain the following:
- i. Dates for achieving the activities, milestones, or compliance required in any schedule of compliance, and dates when such activities, milestones, or compliance were achieved.
 - ii. An explanation of why any dates in any schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.
- d. Compliance certifications concerning the terms and conditions contained in this permit that are federally enforceable emission limitations, standards, or work practices, shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) and the Administrator of the U.S. EPA in the following manner and with the following content:
- i. Compliance certifications shall be submitted annually on a calendar year basis. The annual certification shall be submitted on or before April 30th of each year during the permit term.
 - ii. Compliance certifications shall include the following:
 - (a) An identification of each term or condition of this permit that is the basis of the certification.
 - (b) The permittee's current compliance status.
 - (c) Whether compliance was continuous or intermittent.
 - (d) The method(s) used for determining the compliance status of the source currently and over the required reporting period.
 - (e) Such other facts as the Director of the Ohio EPA may require in the permit to determine the compliance status of the source.
 - iii. Compliance certifications shall contain such additional requirements as may be specified pursuant to sections 114(a)(3) and 504(b) of the Act.

(Authority for term: OAC rules 3745-77-07(C)(1),(2),(4) and (5) and ORC section 3704.03(L))

13. Permit Shield

- a. Compliance with the terms and conditions of this permit (including terms and conditions established for alternate operating scenarios, emissions trading, and emissions averaging, but excluding terms and conditions for which the permit shield is expressly prohibited under OAC rule 3745-77-07) shall be deemed compliance with the applicable requirements identified and addressed in this permit as of the date of permit issuance.
- b. This permit shield provision shall apply to any requirement identified in this permit pursuant to OAC rule 3745-77-07(F)(2), as a requirement that does not apply to the source or to one or more emissions units within the source.

(Authority for term: OAC rule 3745-77-07(F))

14. Operational Flexibility

The permittee is authorized to make the changes identified in OAC rule 3745-77-07(H)(1)(a) to (H)(1)(c) within the permitted stationary source without obtaining a permit revision, if such change is not a modification under any provision of Title I of the Act [as defined in OAC rule 3745-77-01(JJ)], and does not result in an exceedance of the emissions allowed under this permit (whether expressed therein as a rate of emissions or in terms of total emissions), and the permittee provides the Administrator of the U.S. EPA and the appropriate Ohio EPA District Office or local air agency with written notification within a minimum of seven days in advance of the proposed changes, unless the change is associated with, or in response to, emergency conditions. If less than seven days notice is provided because of a need to respond more quickly to such emergency conditions, the permittee shall provide notice to the Administrator of the U.S. EPA and the appropriate District Office of the Ohio EPA or local air agency as soon as possible after learning of the need to make the change. The notification shall contain the items required under OAC rule 3745-77-07(H)(2)(d).

(Authority for term: OAC rules 3745-77-07(H)(1) and (2))

15. Emergencies

The permittee shall have an affirmative defense of emergency to an action brought for noncompliance with technology-based emission limitations if the conditions of OAC rule 3745-77-07(G)(3) are met. This emergency defense provision is in addition to any emergency or upset provision contained in any applicable requirement.

(Authority for term: OAC rule 3745-77-07(G))

16. Off-Permit Changes

The owner or operator of a Title V source may make any change in its operations or emissions at the source that is not specifically addressed or prohibited in the Title V permit, without obtaining an amendment or modification of the permit, provided that the following conditions are met:

- a. The change does not result in conditions that violate any applicable requirements or that violate any existing federally enforceable permit term or condition.
- b. The permittee provides contemporaneous written notice of the change to the Director and the Administrator of the U.S. EPA, except that no such notice shall be required for changes that qualify as insignificant emission levels or activities as defined in OAC rule 3745-77-01(U). Such written notice shall describe each such change, the date of such change, any change in emissions or pollutants emitted, and any federally applicable requirement that would apply as a result of the change.
- c. The change shall not qualify for the permit shield under OAC rule 3745-77-07(F).
- d. The permittee shall keep a record describing all changes made at the source that result in emissions of a regulated air pollutant subject to an applicable requirement, but not otherwise regulated under the permit, and the emissions resulting from those changes.
- e. The change is not subject to any applicable requirement under Title IV of the Act or is not a modification under any provision of Title I of the Act.

Paragraph (I) of rule 3745-77-07 of the Administrative Code applies only to modification or amendment of the permittee's Title V permit. The change made may require a permit to install under Chapter 3745-31 of the Administrative Code if the change constitutes a modification as defined in that Chapter. Nothing in paragraph (I) of rule 3745-77-07 of the Administrative Code shall affect any applicable obligation under Chapter 3745-31 of the Administrative Code.

(For purposes of clarification, the permittee can refer to Engineering Guide #63 that is available in the STARSHIP software package.) *(Authority for term: OAC rule 3745-77-07(I))*

17. Compliance Method Requirements

Nothing in this permit shall alter or affect the ability of any person to establish compliance with, or a violation of, any applicable requirement through the use of credible evidence to the extent authorized by law. Nothing in this permit shall be construed to waive any defenses otherwise available to the permittee, including but not limited to, any challenge to the Credible Evidence Rule (see 62 Fed. Reg. 8314, Feb. 24, 1997), in the context of any future proceeding.

(This term is provided for informational purposes only.)

18. Insignificant Activities

Each insignificant activity that has one or more applicable requirements shall comply with those applicable requirements.

(Authority for term: OAC rule 3745-77-07(A)(1))

19. Permit to Install Requirement

Prior to the “installation” or “modification” of any “air contaminant source,” as those terms are defined in OAC rule 3745-31-01, a permit to install must be obtained from the Ohio EPA pursuant to OAC Chapter 3745-31.

(Authority for term: OAC rule 3745-77-07(A)(1))

20. Air Pollution Nuisance

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

(Authority for term: OAC rule 3745-77-07(A)(1))

B. *State Only Enforceable Section*

1. Reporting Requirements Related to Monitoring and Record Keeping Requirements

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or record keeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (i) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and record keeping requirements specified in this permit, (ii) the probable cause of such deviations, and (iii) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. In identifying each deviation, the permittee shall specify the applicable requirement for which the deviation occurred, describe each deviation, and provide the magnitude and duration of each deviation. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

2. Records Retention Requirements

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

3. Inspections and Information Requests

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

4. Scheduled Maintenance/Malfunction Reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with

paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

5. Permit Transfers

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

6. Additional Reporting Requirements When There Are No Deviations of Federally Enforceable Emission Limitations, Operational Restrictions, or Control Device Operating Parameter Limitations (See Section A of This Permit)

If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters.

Part II - Specific Facility Terms and Conditions

A. State and Federally Enforcable Section

None

B. State Only Enforceable Section

1. The following insignificant emissions units are located at this facility:

T128 - 20,244-gallon gasoline additive storage tank number 236;
T161 - 28,644-gallon ethanol storage tank number 249;
T170 - 28,770-gallon ethanol storage tank number 259;
T171 - 28,770-gallon ethanol storage tank number 260; and
T176 - 29,610-gallon ethanol storage tank number 261.

Each insignificant emissions unit at this facility must comply with all applicable State and federal regulations, as well as any emission limitations and/or control requirements contained within a permit to install for the emissions unit.

Part III - Terms and Conditions for Emissions Units

Emissions Unit ID: Gasoline/Kerosene/Diesel Loading Rack (J001)

Activity Description: Gasoline/Kerosene/Diesel Loading Rack with Vapor Recovery Unit

A. State and Federally Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

- The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
J001 - This emissions unit is a bulk gasoline terminal used for the transfer of gasoline, diesel, and kerosene to and from trucks and storage vessels. This emissions unit is designated as J001 and is equipped with a John Zink activated carbon vapor processing unit.	40 CFR Part 63, Subpart R	See sections A.I.2.a and A.I.2.b.
	40 CFR Part 63.650	The control measures specified in 40 CFR Part 63.650 are as stringent than those specified in 40 CFR Part 63, Subpart R.
	40 CFR Part 60.18b	See section A.I.2.g and A.I.2.h
	40 CFR Part 63.11b	The control measures specified in 40 CFR Part 63.11b are as stringent than those specified in 40 CFR Part 60.18b.
	40 CFR Part 63, Subpart A	See section A.I.2.c.
	40 CFR Part 60.104(a)(1) (Subpart J)	See section A.I.2.g
	40 CFR Part 60.105(a)(3) (Subpart J)	See section A.I.2.g
	40 CFR Part 60.427	See section A.III.1
	OAC rule 3745-21-09(Q)	The control measures specified in OAC rule 3745-21-09(Q) are less stringent than those specified in 40 CFR Part 63, Subpart R.
	OAC rule 3745-31-05(A)(3) (PTI 15-0384)	See section A.I.2.f.

2. Additional Terms and Conditions

- 2.a** [40 CFR Part 63.422(b)]
Emissions from the vapor collection and processing system due to the loading of gasoline cargo tanks (tank trucks or railroad cars) shall not exceed 10 milligrams of total organic compounds (OC) per liter of gasoline loaded (0.083 pound of OC per 1000 gallons of gasoline loaded). The averaging time for this emission limitation is 6 hours pursuant to 40 CFR Part 60.503.
- 2.b** [40 CFR Part 60.502(a) and 40 CFR Part 60.502(d)]
The permittee shall employ a vapor processing system designed to collect all of the OC vapors displaced from cargo tanks during loading. Each vapor processing system shall be designed to prevent any OC vapors collected at one loading rack from passing to another.
- 2.c** 40 CFR Part 63, Subpart A provides applicability provisions, definitions, and other general provisions that are applicable to 40 CFR Part 63, Subpart R.
- 2.d** [40 CFR Part 60.502(h) and 40 CFR Part 60.502(i)]
The vapor collection and liquid loading equipment shall be designed and operated to prevent the gauge pressure in the delivery tank from exceeding 4,500 pascals (450 mm of water) during loading. No pressure-vacuum vent in the terminal's vapor collection system shall begin to open at a system pressure less than 4,500 pascals.
- 2.e** [40 CFR Part 63.427(b)]
[40 CFR Part 63.427(b)]
The permittee shall operate the vapor processing system in a manner that will not cause an exceedance of the OC concentration in the exhaust air stream from the carbon absorption system as determined during the most recent stack test that demonstrated compliance.
- 2.f** The requirements established pursuant to this rule are equivalent to the requirements of 40 CFR Part 63, Subparts A and R.
- 2.g** The permittee may utilize an R.A. Nichols portable equalizer/vapor burner system(VBS) during planned or unplanned VRU maintenance downtime as specified in section A.II.9 and in accordance with the Alternative Monitoring Plan approved by US EPA July 17, 2002.
- 2.h** The permittee shall comply with all applicable emission limitations and requirements specified in this permit during the operation of the VBS control device. The vapor burner system shall be used only as a temporary control measure for VOC emissions. The use of a vapor burner system to control VOC emissions from this emissions unit may be re-evaluated at any time, based on information provided by MAP as specified in sections A.III or A.IV or as requested by the Canton LAA.
- 2.i** This emissions unit shall be designed for and operated with no visible emissions except for periods not to exceed a total of 5 minutes during any 2 consecutive hours when using a VBS for control of emissions.

II. Operational Restrictions

- 1.** [40 CFR Part 60.502(e)(1) and 40 CFR Part 60.502(e)(6)]
The permittee shall load liquid product into vapor-tight gasoline cargo tanks. All gasoline loading lines, unloading lines and vapor lines shall be equipped with vapor tight fittings. Alternate procedures to those described in these terms and conditions for assuring vapor-tight operation of a gasoline cargo tank shall be approved by the Administrator and the City of Canton Health Department, Division of Air Pollution Control (CCHD, DAPC).
- 2.** [40 CFR Part 60.502(f) and 40 CFR Part 60.502(g)]
The permittee shall load only gasoline cargo tanks at the affected facility that are equipped with vapor collection equipment that is compatible with the terminal's vapor collection system. The permittee shall assure that the terminal and cargo tank vapor collection systems are connected during each loading of a gasoline tank truck at the affected facility.
- 3.** The permittee shall not permit gasoline to be spilled, discarded in sewers, stored in open containers or handled in any other manner that would result in evaporation.

II. Operational Restrictions (continued)

4. [40 CFR Part 60.502(e)(5) referenced from 40 CFR Part 63.422(c)]
The permittee shall take steps to assure that the non-vapor-tight gasoline cargo tank will not be reloaded at the facility until vapor tightness documentation for that gasoline cargo tank is obtained which documents that:
 - a. the gasoline cargo tank meets the applicable test requirements in 40 CFR Part 63.425(e); and
 - b. for each gasoline cargo tank failing the test in 40 CFR Part 63.425(f) or (g) at the facility, the cargo tank either:
 - i. meets the test requirements in 40 CFR Part 63.425(f) or (g) before repair work is performed on the cargo tank; or
 - ii. passes the annual certification test described in 40 CFR Part 63.425(e) after the repair work is performed on the cargo tank or before or during the tests in 40 CFR Part 63.425(f) or (g).
5. Any liquid gasoline returned to a stationary storage tank located at the terminal from the vapor processing system shall be free of entrained air to the extent possible with good engineering design.
6. The vapor processing system shall be equipped with a means to prevent drainage of gasoline from the loading device when it is not in use or to accomplish complete drainage before the device is disconnected during transfer of gasoline to a delivery vessel.
7. [40 CFR Part 63.424(g)]
The permittee shall not allow gasoline to be handled in a manner that would result in vapor releases to the atmosphere for extended periods of time. Measures to be taken include, but are not limited to, the following:
 - a. minimize gasoline spills;
 - b. clean up spills as expeditiously as practicable;
 - c. cover all open gasoline containers with a gasketed seal when not in use; and
 - d. minimize gasoline sent to open waste collection systems that collect and transport gasoline to reclamation and recycling devices.
8. The permittee shall repair, within 15 days, any leak from the vapor control system when such a leak is equal to or greater than 100% of the lower explosive limit as propane, pursuant to the compliance testing requirements found in OAC rule 3745-21-10(K).
9. The permittee shall only utilize the R.A. Nichols Engineering Portable Equalizer/Vapor Burner System (Model No. RAN PEVB15 - Serial No. PEVB15 - 03 - 05). An alternative Vapor Burner System may be used provided the permittee has demonstrated compliance with the emission limitations and applicable requirements specified in this permit using the alternate VBS under the same conditions as its intended use in accordance with section A.V.3. The permittee shall operate any vapor burner system in a manner such that it operates in conformance with the design of the device and according to manufacturer recommendations and specifications.
10. The VBS shall be operated at all times when emissions are being vented to it.
11. The VBS shall be operated with a flame present at all times.
12. Only gases with a net heating value of 11.2 MJ/scm (300 Btu/scf) or greater shall be burned in this emissions unit. Net heating value shall be calculated as specified in 40 CFR Part 63.18(f)(3).

It shall be operated with an exit velocity less than 18.3 m/sec (60 ft./sec.) except as specified in sections A.II.4 and A.II.5.

II. Operational Restrictions (continued)

13. If the net heating value of the gas being combusted is greater than 37.3 MJ/scm (1000 Btu/scf), the permittee may operate the flare at an exit velocity equal to or greater than 18.3 m/sec (60 ft/sec), but less than 122 m/sec (400 ft/sec).

III. Monitoring and/or Record Keeping Requirements

1. [40CFR Part 63.427(a)]
The permittee shall operate, certify, maintain, and calibrate a continuous monitoring system as specified below in accordance with the manufacturer's specifications and 40 CFR Part 63.8. The continuous emission monitoring system (CEMS) shall continuously measure OC concentration in percent and shall be used to demonstrate compliance with the 10 milligrams of total organic compounds per liter of gasoline loaded limitation.
2. The permittee shall operate and maintain the existing equipment to continuously monitor and record the VOC emissions from this emissions unit, in percent, with the detection principle of the reference method specified in this permit. Such continuous monitoring and recording equipment shall comply with the requirements specified in 40 CFR Part 60.13.
3. The permittee shall maintain records of all data obtained by the VOC CEMS including, but not limited to, percent VOC, by volume, on an instantaneous basis in 6-hour averaging periods, results of daily zero/span calibration checks, and the magnitude of manual calibration adjustments.
4. A statement of certification of the existing VOC CEMS shall be maintained on site and shall consist of a letter from the Ohio EPA detailing the results of an Agency review of the certification tests and a statement by the Agency that the system is considered certified in accordance with the requirements of 40 CFR Part 60, Appendix B, Performance Specification 8. Proof of certification shall be made available to the Director of Ohio EPA or the Canton local air agency upon request.
5. For purposes of demonstrating compliance with the allowable VOC emission limitation of 10 mg of VOC/liter of fuel loaded, the permittee has demonstrated that a VOC concentration in the exhaust gases of 0.48%, by volume, is equivalent to the allowable VOC emission limitation. This equivalent value may be revised based upon additional testing by the permittee and the written approval of the Ohio EPA.
6. The permittee shall maintain records of the most recently determined CEM equivalent percent for the 10 mg VOC/Liter fuel loaded number, an analysis demonstrating how the number was developed, and any support documentation including stack test reports.
7. [40 CFR Part 60.502(e)(2) and 40 CFR Part 60.502(e)(3)]
The permittee shall require the tank identification number to be recorded as each gasoline cargo tank is loaded at the affected facility. The permittee shall cross check each tank identification number to be recorded with the file of tank vapor tightness documentation within 2 weeks after the corresponding tank is loaded.

III. Monitoring and/or Record Keeping Requirements (continued)

8. [40 CFR Part 60.505(b) as referenced from 40 CFR Part 60.502(e)(1)]
The permittee shall obtain vapor tightness documentation for each gasoline cargo tank. It shall be maintained in a documentation file and updated at least once per year to reflect current test results as determined by Method 27. This documentation shall include, as a minimum, the following information:
- a. test title: Gasoline Delivery Tank Pressure Test - EPA Reference Method 27;
 - b. tank owner and address;
 - c. tank identification number;
 - d. testing location;
 - e. date of test;
 - f. tester name and signature;
 - g. witnessing inspector, if any: name, signature, and affiliation; and
 - h. test results: actual pressure change in 5 minutes, mm of water (average for 2 runs).
9. [40 CFR Part 60.505(c)]
The permittee shall maintain records of the following information in a readily accessible location for at least 5 years and shall immediately make these records available to the Director upon verbal or written request:
- a. the daily quantity of all gasoline loaded into gasoline tank trucks; and
 - b. the results of any leak checks, including, at a minimum, the following information:
 - i. the date of the inspection;
 - ii. the findings (may indicate no leaks discovered or location, nature, and severity of each leak);
 - iii. the leak determination method;
 - iv. the corrective action (date each leak repaired and reasons for any repair interval in excess of fifteen calendar days); and
 - v. the inspector's name and signature.

III. Monitoring and/or Record Keeping Requirements (continued)

- 10.** [40 CFR Part 63.428(b)]
The permittee shall keep records of the test results for each gasoline cargo tank loading at the facility as follows:
- a. annual certification testing performed under section A.V.4;
 - b. continuous performance testing performed at any time at the facility under section A.V; and
 - c. the documentation for each test shall include, as a minimum, the following information:
 - i. name of test: Annual Certification Test (Method 27, Annual Certification Test) Internal Vapor Valve, Leak Detection Test, Nitrogen Pressure Decay Field Test or Continuous Performance Pressure Decay Test;
 - ii. cargo tank owner's name and address;
 - iii. cargo tank identification number;
 - iv. test location and date;
 - v. tester name and signature;
 - vi. witnessing inspector, if any: name, signature, and affiliation; and
 - vii. vapor tightness repair: nature of repair work and when performed in relation to vapor tightness testing.

The documentation file shall be kept up-to-date for each gasoline cargo tank loading at the facility.

- 11.** [40 CFR Part 63.428(c)(1)]
The permittee shall keep an up-to-date, readily accessible record of all continuous monitoring data. This record shall indicate the time intervals during which loadings of gasoline cargo tanks have occurred or, alternatively, shall record the operating parameter data only during such loadings. The date and time of day shall also be indicated at reasonable intervals on this record.
- 12.** [40 CFR Part 63.428(c)(2)]
The permittee shall maintain records of the following:
- a. all data and calculations, engineering assessments, and manufacturing recommendations used in determining the operating parameter value; and
 - b. the following information when using a flare under provisions of 40 CFR Part 63.11(b):
 - i. flare design (i.e., steam assisted, air assisted, or non-assisted); and
 - ii. all visible emissions readings, heat content determinations, flow rate measurements, and exit velocity determinations made during the compliance determinations.
- 13.** [40 CFR Part 63.424(a)]
The permittee shall perform a monthly leak inspection of all equipment in gasoline service. For this inspection, detection methods incorporating sight, sound, and smell are acceptable. Each piece of equipment shall be inspected during the loading of a gasoline cargo tank.

III. Monitoring and/or Record Keeping Requirements (continued)

14. [40 CFR Part 63.428(e) as referenced from 40 CFR Part 63.424(b)]

The permittee shall maintain a log book containing records of each leak inspection. The log records shall contain a list, summary description, or diagram showing the location of all equipment in gasoline service at the facility. It shall also contain the following for each leak detected:

 - a. the equipment type and identification number;
 - b. the nature of the leak (i.e., vapor or liquid) and the method of detection;
 - c. the date the leak was detected and the date of each attempt to repair the leak;
 - d. the repair methods applied in each attempt to repair the leak;
 - e. "repair delayed" and the reason for the delay if the leak is not repaired within 15 days after discovery;
 - f. the expected date of successful repair of the leak; and
 - g. the date of successful repair of the leak.
15. [40 CFR Part 63.425(f)]

As an alternative to the leak monitoring requirements in the terms and conditions of this emissions unit, the permittee may implement the equipment leak provisions required under the facility section of this permit.
16. [40 CFR Part 63.424(c)]

The permittee shall record the detection of a liquid or vapor leak in a log book. When a leak is detected, an initial attempt at repair shall be made as soon as practicable, but no later than 5 calendar days after the leak is detected. Repair or replacement of leaking equipment shall be completed within 15 calendar days after the detection of each leak, except as provided in section A.III.13.
17. [40 CFR Part 63.424(d)]

Delay of repair of leaking equipment will be allowed upon a demonstration to the Administrator that repair within 15 days is not feasible. The permittee shall provide reasons for the delay and the date by which each repair is expected to be completed.
18. The permittee shall conduct monitoring as specified in 40 CFR Part 60.105(Subpart J) unless the permittee has demonstrated compliance with the hydrogen sulfide emission limitation using the alternative monitoring strategy as described in section A.VI.1. The permittee shall be exempt from hydrogen sulfide monitoring for this emission unit as specified in 40 CFR Part 60.105(Subpart J) when utilizing a portable vapor burner system for controlling VOC emissions only if the permittee has demonstrated compliance using the alternative monitoring strategy for sulfur dioxide emissions as described in section A.VI.1 and as specified in section A.III.18. The permittee will have to have demonstrated compliance with the applicable hydrogen sulfide emission limitation any time there is a change in the type of product or sulfur content of a product being transferred while using a VBS to control emissions that could result in a violation of the hydrogen sulfide emission limitation. If compliance with the applicable hydrogen sulfide emission limit cannot be demonstrated using the alternative monitoring plan, the permittee shall monitor the refinery fuel gas stream pursuant to 40 CFR Part 60.105 (Subpart J).
19. [40 CFR Part 63.427(a)(4)]

The permittee shall properly operate and maintain a heat-sensing device, such as an ultraviolet beam sensor or a thermocouple, in proximity to the pilot light to indicate the presence of a flame.
20. [40 CFR Part 63.428(c)(1)]

The permittee shall keep an up-to-date, readily accessible record of the continuous monitoring data required under 40 CFR Part 63.427(a) (see section A.III.19) during transfer of product. The date and time of day shall also be indicated at reasonable intervals on this record.

III. Monitoring and/or Record Keeping Requirements (continued)

21. The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible particulate emissions from the flare. The presence or absence of any visible emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
- the location and color of the emissions;
 - whether the emissions are representative of normal operations;
 - if the emissions are not representative of normal operations, the cause of the abnormal emissions;
 - the total duration of any visible emission incident; and
 - any corrective actions taken to eliminate the visible emissions.

At any time the permittee observes visible emissions from the VBS, the permittee shall monitor the visible emissions for a minimum period of 30 minutes in accordance with the methods and procedures specified in 40 CFR Part 60, Appendix A, Method 22 and record the results in an operations log. Visible emissions shall be read at a point in the plume immediately after the steam has dissipated.

IV. Reporting Requirements

- [40 CFR Part 60.502(e)(4)]
The permittee shall notify the owner or operator of each non-vapor-tight gasoline cargo tank loaded at the affected facility within 3 weeks after the loading has occurred. The permittee shall take steps assuring that the non-vapor-tight gasoline cargo tank will not be reloaded at the affected facility until vapor tightness documentation for that tank is obtained which documents that the gasoline cargo tank meets the applicable test requirements in section A.V.
- The permittee shall submit a deviation report indicating any equipment leaks of vapor or liquid that are not repaired within 15 days after identification. The permittee shall provide reasons why the repairs could not be completed in 15 days after identification and the date when the repair will be completed. The report shall be submitted within 30 days after identification of the leak.
- [40 CFR Part 63.428(g)]
The permittee shall submit a semi-annual report to the Canton local air agency of each loading occurrence of a gasoline cargo tank for which vapor tightness documentation had not been previously obtained by the facility. This report shall also include the number of equipment leaks not repaired within 5 days after detecting the leak.
- [40 CFR Part 63.428(h) and 40 CFR Part 63.10(e)(3)]
The permittee shall submit an excess emissions report to the Canton local air agency in accordance with 40 CFR Part 63.10(e)(3). The permittee shall submit all reports to the Canton local air agency on a quarterly basis.

All excess emissions and monitoring system performance reports shall be post marked on the 30th day following the end of the quarter. The reports shall include all the information required in 40 CFR Parts 63.10(c)(5) through 40 CFR Parts 63.10(c)(13) and sections 40 CFR Parts 63.8(c)(7) and 63.8(c)(8). These reports shall contain the name, title, and signature of the responsible official who is certifying the accuracy of the report. The reports shall also specify if there are no exceedances or that the VOC CEMS is out of service and provide the reason why it is out of service.

The permittee shall submit one summary report identifying the VOC monitored at the emissions unit. The summary report shall be entitled "Summary Report-Gaseous Excess Emission and Continuous Monitoring System Performance " and shall contain the items specified below:

IV. Reporting Requirements (continued)

- a. the company name and address;
- b. an identification of each hazardous air pollutant monitored at the emission unit;
- c. the beginning and ending dates of the reporting period;
- d. a brief description of the process units;
- e. the emission and operating parameter limitations specified in the relevant standard(s), including an identification of all 6-hour rolling average % VOC values that exceeded the % VOC, by volume, value that is equivalent to the allowable VOC emission limitation;
- f. the monitoring equipment manufacturer(s) and model number(s);
- g. the date of the latest CMS certification or audit;
- h. the total operating time of the affected source during the reporting period;
- i. an emission data summary (or similar summary if the owner or operator monitors control system parameters), including the total duration of excess emissions during the reporting period (recorded in minutes for opacity and hours for gases), the total duration of excess emissions expressed as a percent of the total source operating time during that reporting period, and a breakdown of the total duration of excess emissions during the reporting period into those that are due to startup/shutdown, control equipment problems, process problems, other known causes, and other unknown causes;
- j. a CMS performance summary (or similar summary if the owner or operator monitors control system parameters), including the total CMS downtime during the reporting period (recorded in minutes for opacity and hours for gases), the total duration of CMS downtime expressed as a percent of the total source operating time during that reporting period, and a breakdown of the total CMS downtime during the reporting period into periods that are due to monitoring equipment malfunctions, nonmonitoring equipment malfunctions, quality assurance/quality control calibrations, other known causes, and other unknown causes;
- k. a description of any changes in CMS, processes, or controls since the last reporting period;
- l. the name, title, and signature of the responsible official who is certifying the accuracy of the report; and
- m. the date of the report.

If the total duration of process operating parameter exceedances for the reporting period is less than 1 percent of the total operating time for the reporting period, and the CMS downtime for the reporting period is less than 5 percent of the total operating time for the reporting period, only a summary report shall be submitted. The full excess emissions and continuous monitoring system performance report need not be submitted under these circumstances.

IV. Reporting Requirements (continued)

5. [40 CFR Part 63.428(h)]
The following are reportable excess emissions events. Documentation of these occurrences shall be included in the excess emissions report:
- a. Each exceedance or failure to maintain, as appropriate, the monitored operating parameter value determined under section A.V.1.b. The report shall include the monitoring data for the days on which exceedances or failures to maintain have occurred, and a description and timing of the steps taken to repair or perform maintenance on the vapor collection and processing systems or the CEM.
 - b. Each instance of a non-vapor-tight gasoline cargo tank loading at the facility in which the permittee failed to take steps to assure that such cargo tank would not be reloaded at the facility before vapor tightness documentation for that cargo tank was obtained.
 - c. Each reloading of a non-vapor-tight gasoline cargo tank at the facility before vapor tightness documentation for that cargo tank is obtained by the facility.
 - d. For each occurrence of an equipment leak for which no repair attempt was made within 5 days or for which repair was not completed within 15 days after detection:
 - i. the date on which the leak was detected;
 - ii. the date of each attempt to repair the leak;
 - iii. the reasons for the delay of repair; and
 - iv. the date of successful repair.
6. The permittee shall submit a deviation report to the Canton local air agency of any change in the description, types, identification numbers, and locations of the equipment in gasoline service at the facility.
7. The permittee shall submit quarterly deviation (excursion) reports that identify all periods during which the pilot flame was not functioning properly. The reports shall include the date, time, and duration of each such period.
8. The permittee shall submit quarterly deviation reports which include visible emission readings conducted pursuant to the methods and procedures specified in 40 CFR Part 60, Appendix A, Method 22 as a result of the presence of visible emissions from the flare and that exceed a total time of five minutes during any consecutive two hour period. These quarterly deviation reports shall be submitted by January 30, April 30, July 30, and October 30 of each year and shall address the data obtained during the previous calendar quarter.
9. The permittee shall submit deviation reports in accordance with sections A.IV.4, A.IV.5, and A.IV.7 when the vapor burner system is in operation. The permittee shall submit deviation reports as specified in section A.IV.10 through A.IV.11 for periods when a VBS is used to control VOC emissions and compliance with the hydrogen sulfide emission limit was not demonstrated using the alternative monitoring plan described in section A.VI.1.
10. The permittee shall notify the Canton LAA, in writing, when a vapor burner system (VBS) shall be used to control VOC emissions from this emission unit thirty (30) days prior to a planned usage of a vapor burner system and within fourteen (14) days following an unplanned usage of a VBS. This notification shall include the following information:
- a. The dates and times of startup of the VBS.
 - b. The reason for using the VBS.
 - c. If the VBS is not the system specified in section A.I.2 and why an another system is being used.
 - d. The date(s) when a different VBS from the one specified in section A.I.2 was tested and all stack test report(s).
 - e. The approximate length of time a VBS shall be used to control VOC emissions.
 - f. If there will be a change in the type of emissions to be controlled by the VBS.

V. Testing Requirements

1. Compliance with the emission limitations and control measures in section A.I.1 of these terms and conditions shall be determined in accordance with the following methods:

- a. Emission Limitation:

Emissions from the vapor collection and processing system due to the loading of gasoline cargo tanks (tank trucks or railroad cars) shall not exceed 10 milligrams of total OC per liter of gasoline loaded (0.083 pound of OC per 1000 gallons of gasoline loaded).

Applicable Compliance Method:

The permittee shall demonstrate compliance based on the monitoring and record keeping requirements specified in section A.III.1.

If required, the permittee shall demonstrate compliance by conducting a stack test in accordance with the procedures specified in 40 CFR Part 60.503 or an alternative method approved by the Canton local air agency.

- b. Control Measure:

The vapor collection and liquid loading equipment shall be designed and operated to prevent the gauge pressure in the delivery tank from exceeding 4,500 pascals (450 mm of water) during loading.

Applicable Compliance Method:

The permittee shall demonstrate compliance during performance tests where the pressure shall be recorded every 5 minutes while a gasoline truck is being loaded; the highest instantaneous pressure that occurs during each loading shall also be recorded.

Control Measure:

The permittee may utilize an R.A. Nichols portable equalizer/vapor burner system during planned VRU maintenance or emergency VRU downtime as specified in section A.II.9. The permittee shall comply with all applicable emission limitations and requirements specified in this permit during the operation of this control device. The permittee shall also notify the Canton LAA any time a Vapor Burner System is used to comply with the provisions of this permit in accordance with section A.IV. The vapor burner system shall be used only as a temporary control measure for VOC emissions. The use of a vapor burner system to control VOC emissions from this emissions unit may be re-evaluated at any time by the Canton LAA, based on information provided by MAP as specified in sections A.III or AIV or as requested by the Canton LAA.

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance by conducting a stack test in accordance with the methods and procedures specified in section A.V.2 for VOC emissions. The permittee shall also demonstrate compliance with the alternative monitoring plan described in section A.VI.1 and specified in section A.III .18 whenever the permittee changes the type of product or product specifications transferred through J001.

V. Testing Requirements (continued)

2. Within twelve (12) months following the issue date of this permit and twelve (12) months prior to the expiration of this permit, the permittee shall conduct an emission test for this emissions unit in order to determine continuing compliance with the allowable emission rate for OC and to reestablish the operating parameter value for this emissions unit in accordance with section A.V.3. This test shall be conducted between the months of May through August.

The permittee shall use as reference methods and procedures the test methods in Appendix A of 40 CFR Part 60 or other methods and procedures as specified in 40 CFR Part 60.503(c), except as provided in 40 CFR Part 60.8(b). During any performance test, the permittee shall document the reasons for any change in the operating parameter value since the previous performance test. The three run requirement in 40 CFR Part 60.8(f) does not apply to this emissions unit.

Not later than 30 days prior to the proposed test date, the permittee shall submit an "Intent to Test" (ITT) notification to the Canton local air agency. The notification shall describe in detail the proposed test methods and procedures, the emissions unit operating parameters, the time and date of the test, and the person(s) who will be conducting the test. Failure to submit such notification for review and approval prior to the test may result in the Canton local air agency's refusal to accept the results of the test.

A pressure measurement device capable of measuring up to 500 mm of water gauge pressure with plus or minus 2.5 mm of water precision shall be calibrated and installed on the terminal's vapor collection system at a pressure tap located as close as possible to the connection with the gasoline cargo tank. During the performance test, the pressure shall be recorded every 5 minutes while a gasoline truck is being loaded; the highest instantaneous pressure that occurs during each loading shall also be recorded. Every loading position in gasoline service must be tested at least once during the performance test in accordance with 40 CFR 60.503(d)(2). Personnel from the Canton local air agency shall be permitted to witness the test, examine the testing equipment, and acquire data and information necessary to ensure that the operation of the emissions unit and the testing procedures provide a valid characterization of the emissions from the emissions unit and/or performance of the control equipment.

A comprehensive written report on the results of the emissions test shall be signed by the person or persons responsible for the tests and submitted to the Canton local air agency within 30 days following completion of the test.

3. [40 CFR Part 63.425(b)]
For each performance test conducted, the permittee shall determine a monitored operating parameter value for the vapor processing system using the following procedure:
 - a. during the performance test, continuously record the VOC concentration operating parameter described in section A.III.1 of these terms and conditions.
 - b. determine an operating parameter value based on the parameter data monitored during the performance test, supplemented by engineering assessments and the manufacturer's recommendations; and
 - c. provide, for approval by the Administrator, the Canton local air agency and the Ohio EPA, the rationale for the selected operating parameter value and monitoring frequency and averaging time, develop the value and a description of why the value, monitoring frequency, and averaging time demonstrate continuous compliance with the emission standard in section A.I.2.a.
4. The permittee shall conduct an annual certification test for gasoline cargo tanks that shall consist of the following test methods and procedures:
 - a. 40 CFR Part 60, Appendix A, Method 27 and the test methods and procedures in 40 CFR Part 63.425(e); and
 - b. a pressure test of the cargo tank's internal vapor valve in accordance with 40 CFR Part 63.425(e).

V. Testing Requirements (continued)

5. The leak detection test shall be performed using 40 CFR Part 60, Appendix A, Method 21 and the test methods and procedures in 40 CFR 63.425(f).
6. For those cargo tanks with manifolded product lines, the permittee shall use the test procedure specified in 40 CFR Part 63.425(g).
7. The continuous performance pressure decay test shall be performed using 40 CFR Part 60, Appendix A, Method 27 and as specified in 40 CFR Part 63.425(h).

VI. Miscellaneous Requirements

1. In a letter dated June 24, 2002, from Marathon Ashland Petroleum LLC, Ohio Refining Division, Canton Ohio(MAP) to Mr. Charles Hall, USEPA Region V, Chicago, Ill., MAP requested approval of an Alternative Monitoring Plan for Combusted VOC vapors in a Portable Combustor during gasoline transfer at MAP's Loading Rack(emission unit J001). The plan was necessary in order to exempt MAP from conducting monitoring pursuant to 40 CFR Part 60.105(Subpart J) since the off gas from this emissions unit is defined as a refinery fuel gas pursuant to 40 CFR Part 60.101. The alternative monitoring plan was included in this letter. On July 17, 2002, in a letter from Mr. George Czerniak, Chief, Air Enforcement and Compliance Assurance Branch, US EPA Region V, US EPA approved MAP's alternative monitoring plan. The alternative monitoring plan is as follows:
 - a. Representative air samples are be collected at the inlet to the VBS or VRU.
 - b. Air samples shall be analyzed for hydrogen sulfide concentration. The samples are analyzed using a sensodyne air analyzer with a hydrogen sulfide detector tube.
 - c. Two weeks of sampling are conducted.
 - d. Test results are submitted for approval.

The alternative monitoring plan includes conducting the monitoring in accordance with the Alternative Monitoring Plan for NSPS Subpart J Refinery Fuel Gas Document entitled "Conditions For Approval of an Alternative Monitoring Plan for Miscellaneous Refinery Fuel Gas Streams", US EPA Sector Notebook, 1995.

B. State Enforceable Section

I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
