**RE: Preliminary Proposed Title V  
Chapter 3745-77 permit**

15-76-01-0081  
T&W Forge, Inc.  
Ray McCarron  
930 West Ely Street  
P.O. Box 2630  
Alliance, OH 44601

Dear Ray McCarron:

Enclosed is the Ohio EPA Preliminary Proposed Title V permit that was issued in draft form on 04/22/99. The comment period has ended. We are now ready to submit this permit to USEPA for approval.

We are submitting this for your review and comment. If you do not agree with the Preliminary Proposed Title V permit as written or with agreed-upon changes, then you have the opportunity to schedule a meeting with us to discuss your concerns.

Please contact Jim Orlemann, Engineering Section Manager, 614-644-3592, or you can telefax your request to (614) 644-3681, within fourteen (14) days from receipt of this letter if a meeting is desired. If a request for a meeting is not received within fourteen (14) days of receipt of this letter, we will forward this proposed permit (as written, or with agreed-upon changes) to USEPA for approval.

Very truly yours,

A handwritten signature in black ink that reads "Thomas G. Rigo". The signature is written in a cursive, flowing style.

Thomas G. Rigo, Manager  
Field Operations and Permit Section  
Division of Air Pollution Control

Heat Treat Furnace

You will be contacted approximately eighteen (18) months prior to the expiration date regarding the renewal of this permit. If you are not contacted, please contact the appropriate Ohio EPA District Office or local air agency listed below. This permit and the authorization to operate the air contaminant sources (emissions units) at this facility shall expire at midnight on the expiration date shown above. If a renewal permit is not issued prior to the expiration date, the permittee may continue to operate pursuant to OAC rule 3745-77-04(A) and in accordance with the terms of this permit beyond the expiration date, provided that a complete renewal application is submitted no earlier than eighteen (18) months and no later than one-hundred eighty (180) days prior to the expiration date.

Described below is the current Ohio EPA District Office or local air agency that is responsible for processing and administering your Title V permit:

Canton Division of Air Pollution Control  
420 Market Avnue N.  
Canton, OH 44702-1544  
(330) 489-3385

OHIO ENVIRONMENTAL PROTECTION AGENCY

Christopher Jones  
Director

# PART I - GENERAL TERMS AND CONDITIONS

## A. State and Federally Enforceable Section

### 1. Monitoring and Related Recordkeeping and Reporting Requirements

- a. Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall maintain records that include the following, where applicable, for any required monitoring under this permit:
  - i. The date, place (as defined in the permit), and time of sampling or measurements.
  - ii. The date(s) analyses were performed.
  - iii. The company or entity that performed the analyses.
  - iv. The analytical techniques or methods used.
  - v. The results of such analyses.
  - vi. The operating conditions existing at the time of sampling or measurement.
- b. Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.
- c. Except as may otherwise be provided in the terms and conditions for a specific emissions unit, the permittee shall submit required reports in the following manner:
  - i. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
  - ii. Quarterly written reports of (i) any deviations from federally enforceable emission limitations, operational restrictions, and control device operating parameter limitations, excluding deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06, that have been detected by the testing, monitoring and recordkeeping requirements specified in this permit, (ii) the probable cause of such deviations, and (iii) any corrective actions or preventive measures taken, shall be promptly made to the appropriate Ohio EPA District Office or local air agency. These quarterly written reports shall satisfy the requirements of OAC rule 3745-77-07(A)(3)(c)(i) and (ii) pertaining to the submission of monitoring reports every six months and OAC rule 3745-77-07(A)(3)(c)(iii) pertaining to the prompt reporting of all deviations except malfunctions, which shall be reported in accordance with OAC rule 3745-15-06. The written reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.) See B.8 below if no deviations occurred during the quarter.
  - iii. Written reports, which identify any deviations from the federally enforceable monitoring, recordkeeping, and reporting requirements contained in this permit shall be submitted to the appropriate Ohio EPA District Office or local air agency every six months, i.e., by January 31 and July 31 of each year for the previous six calendar months. These semi-annual written reports shall satisfy the requirements of OAC rule 3745-77-07(A)(3)(c)(i) and (ii) pertaining to the reporting of any deviations related to the monitoring, recordkeeping, and reporting requirements. If no deviations occurred during a six-month period, the permittee shall submit a semi-annual report, which states that no deviations occurred during that period.

- iv. Each written report shall be signed by a responsible official certifying that, based on information and belief formed after reasonable inquiry, the statements and information in the report are true, accurate, and complete.

## **2. Scheduled Maintenance/Malfunction Reporting**

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction, i.e., upset, of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. (The definition of an upset condition shall be the same as that used in OAC rule 3745-15-06(B)(1) for a malfunction.) The verbal and written reports submitted pursuant to OAC rule 3745-15-06 shall satisfy the requirements of OAC rule 3745-77-07(A)(3)(c)(iii) pertaining to the prompt reporting of deviations caused by malfunctions or upsets.

Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emission unit(s) that is (are) served by such control system(s).

## **3. Risk Management Plans**

If the permittee is required to develop and register a risk management plan pursuant to section 112(r) of the Clean Air Act, as amended, 42 U.S.C. 7401 et seq. ("Act"), the permittee shall comply with the requirement to register such a plan.

## **4. Title IV Provisions**

If the permittee is subject to the requirements of 40 CFR Part 72 concerning acid rain, the permittee shall ensure that any affected emissions unit complies with those requirements. Emissions exceeding any allowances that are lawfully held under Title IV of the Act, or any regulations adopted thereunder, are prohibited.

## **5. Severability Clause**

A determination that any term or condition of this permit is invalid shall not invalidate the force or effect of any other term or condition thereof, except to the extent that any other term or condition depends in whole or in part for its operation or implementation upon the term or condition declared invalid.

## **6. General Requirements**

- a. The permittee must comply with all terms and conditions of this permit. Any noncompliance with the federally enforceable terms and conditions of this permit constitutes a violation of the Act, and is grounds for enforcement action or for permit revocation, revocation and reissuance, or modification, or for denial of a permit renewal application.
- b. It shall not be a defense for the permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the federally enforceable terms and conditions of this permit.
- c. This permit may be modified, reopened, revoked, or revoked and reissued, for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or

revocation, or of a notification of planned changes or anticipated noncompliance does not stay any term and condition of this permit.

- d. This permit does not convey any property rights of any sort, or any exclusive privilege.
- e. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon request, the permittee shall also furnish to the Director or an authorized representative of the Director, copies of records required to be kept by this permit. For information claimed to be confidential in the submittal to the Director, if the Administrator of the U.S. EPA requests such information, the permittee may furnish such records directly to the Administrator along with a claim of confidentiality.

## **7. Fees**

The permittee shall pay fees to the Director of the Ohio EPA in accordance with ORC section 3745.11 and OAC Chapter 3745-78.

## **8. Marketable Permit Programs**

No revision of this permit is required under any approved economic incentive, marketable permits, emissions trading, and other similar programs or processes for changes that are provided for in this permit.

## **9. Reasonably Anticipated Operating Scenarios**

The permittee is hereby authorized to make changes among operating scenarios authorized in this permit without notice to the Ohio EPA, but, contemporaneous with making a change from one operating scenario to another, the permittee must record in a log at the permitted facility the scenario under which the permittee is operating. The permit shield provided in these general terms and conditions shall apply to all operating scenarios authorized in this permit.

## **10. Reopening for Cause**

This Title V permit will be reopened prior to its expiration date under the following conditions:

- a. Additional applicable requirements under the Act become applicable to one or more emissions units covered by this permit, and this permit has a remaining term of three or more years. Such a reopening shall be completed not later than eighteen months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions has been extended pursuant to paragraph (E)(1) of OAC rule 3745-77-08.
- b. This permit is issued to an affected source under the acid rain program and additional requirements (including excess emissions requirements) become applicable. Upon approval by the Administrator, excess emissions offset plans shall be deemed to be incorporated into the permit, and shall not require a reopening of this permit.
- c. The Director of the Ohio EPA or the Administrator of the U.S. EPA determines that the federally applicable requirements in this permit are based on a material mistake, or that

inaccurate statements were made in establishing the emissions standards or other terms and conditions of this permit related to such federally applicable requirements.

- d. The Administrator of the U.S. EPA or the Director of the Ohio EPA determines that this permit must be revised or revoked to assure compliance with the applicable requirements.

## **11. Federal and State Enforceability**

Only those terms and conditions designated in this permit as federally enforceable, that are required under the Act, or any of its applicable requirements, including relevant provisions designed to limit the potential to emit of a source, are enforceable by the Administrator of the U.S. EPA, the State, and citizens under the Act. All other terms and conditions of this permit shall not be federally enforceable and shall be enforceable under State law only.

## **12. Compliance Requirements**

- a. Any document (including reports) required to be submitted and required by a federally applicable requirement in this Title V permit shall include a certification by a responsible official that, based on information and belief formed after reasonable inquiry, the statements in the document are true, accurate, and complete.
- b. Upon presentation of credentials and other documents as may be required by law, the permittee shall allow the Director of the Ohio EPA or an authorized representative of the Director to:
  - i. At reasonable times, enter upon the permittee's premises where a source is located or the emissions-related activity is conducted, or where records must be kept under the conditions of this permit.
  - ii. Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit, subject to the protection from disclosure to the public of confidential information consistent with paragraph (E) of OAC rule 3745-77-03.
  - iii. Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit.
  - iv. As authorized by the Act, sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit and applicable requirements.
- c. The permittee shall submit progress reports to the appropriate Ohio EPA District Office or local air agency concerning any schedule of compliance for meeting an applicable requirement. Progress reports shall be submitted semiannually, or more frequently if specified in the applicable requirement or by the Director of the Ohio EPA. Progress reports shall contain the following:
  - i. Dates for achieving the activities, milestones, or compliance required in any schedule of compliance, and dates when such activities, milestones, or compliance were achieved.
  - ii. An explanation of why any dates in any schedule of compliance were not or will not be met, and any preventive or corrective measures adopted.
- d. Compliance certifications concerning the terms and conditions contained in this permit that are federally enforceable emission limitations, standards, or work practices, shall be submitted

to the appropriate Ohio EPA District Office or local air agency in the following manner and with the following content:

- i. Compliance certifications shall be submitted annually on a calendar year basis. The annual certification shall be submitted on or before April 30th of each year during the permit term.
- ii. Compliance certifications shall include the following:
  - (a) An identification of each term or condition of this permit that is the basis of the certification.
  - (b) The permittee's current compliance status.
  - (c) Whether compliance was continuous or intermittent.
  - (d) The method(s) used for determining the compliance status of the source currently and over the required reporting period.
  - (e) Such other facts as the Director of the Ohio EPA may require in the permit to determine the compliance status of the source.
- iii. Compliance certifications shall contain such additional requirements as may be specified pursuant to sections 114(a)(3) and 504(b) of the Act.

### **13. Permit Shield**

- a. Compliance with the terms and conditions of this permit (including terms and conditions established for alternate operating scenarios, emissions trading, and emissions averaging, but excluding terms and conditions for which the permit shield is expressly prohibited under OAC rule 3745-77-07) shall be deemed compliance with the applicable requirements identified and addressed in this permit as of the date of permit issuance.
- b. This permit shield provision shall apply to any requirement identified in this permit pursuant to OAC rule 3745-77-07(F)(2), as a requirement that does not apply to the source or to one or more emissions units within the source.

### **14. Operational Flexibility**

The permittee is authorized to make the changes identified in OAC rule 3745-77-07(H)(1)(a) to (H)(1)(c) within the permitted stationary source without obtaining a permit revision, if such change is not a modification under any provision of Title I of the Act [as defined in OAC rule 3745-77-01(JJ)], and does not result in an exceedance of the emissions allowed under this permit (whether expressed therein as a rate of emissions or in terms of total emissions), and the permittee provides the Administrator of the U.S. EPA and the appropriate Ohio EPA District Office or local air agency with written notification within a minimum of seven days in advance of the proposed changes, unless the change is associated with, or in response to, emergency conditions. If less than seven days notice is provided because of a need to respond more quickly to such emergency conditions, the permittee shall provide notice to the Administrator of the U.S. EPA and the appropriate District Office of the Ohio EPA or local air agency as soon as possible after learning of the need to make the change. The notification shall contain the items required under OAC rule 3745-77-07(H)(2)(d).

### **15. Emergencies**

The permittee shall have an affirmative defense of emergency to an action brought for noncompliance with technology-based emission limitations if the conditions of OAC rule 3745-77-

07(G)(3) are met. This emergency defense provision is in addition to any emergency or upset provision contained in any applicable requirement.

## **16. Off Permit Changes**

The owner or operator of a Title V source may make any change in its operations or emissions at the source that is not specifically addressed or prohibited in the Title V permit, without obtaining an amendment or modification of the permit, provided that the following conditions are met:

- a. The change does not result in conditions that violate any applicable requirements or that violate any existing federally enforceable permit term or condition;
- b. The permittee provides contemporaneous written notice of the change to the director and the administrator, except that no such notice shall be required for changes that qualify as insignificant emission levels or activities as defined in OAC rule 3745-77-01(U). Such written notice shall describe each such change, the date of such change, any change in emissions or pollutants emitted, and any federally applicable requirement that would apply as a result of the change;
- c. The change shall not qualify for the permit shield under OAC rule 3745-77-07(F);
- d. The permittee shall keep a record describing all changes made at the source that result in emissions of a regulated air pollutant subject to an applicable requirement, but not otherwise regulated under the permit, and the emissions resulting from those changes; and
- e. The change is not subject to any applicable requirement under Title IV of the Act or is not a modification under any provision of Title I of the Act.

Paragraph (I) of rule 3745-77-07 of the Administrative Code applies only to modification or amendment of the permittee's Title V permit. The change made may require a permit to install under Chapter 3745-31 of the Administrative Code if the change constitutes a modification as defined in that Chapter. Nothing in paragraph (I) of rule 3745-77-07 of the Administrative Code shall affect any applicable obligation under Chapter 3745-31 of the Administrative Code.

(For further clarification, the permittee can refer to Engineering Guide #63 that is available in their STARSHIP software package.)

## **17. Compliance Method Requirements**

Nothing in this permit shall alter or affect the ability of any person to establish compliance with, or a violation of, any applicable requirement through the use of credible evidence to the extent authorized by law. Nothing in this permit shall be construed to waive any defenses otherwise available to the permittee, including but not limited to, any challenge to the Credible Evidence Rule (see 62 Fed. Reg. 8314, Feb. 24, 1997), in the context of any future proceeding.

## **B. State Only Enforceable Section**

### **1. Permit to Install Requirement**

Prior to the “installation” or “modification” of any “air contaminant source,” as those terms are defined in OAC rule 3745-31-01, a permit to install must be obtained from the Ohio EPA pursuant to OAC Chapter 3745-31.

### **2. Reporting Requirements Related to Monitoring and Recordkeeping Requirements**

The permittee shall submit required reports in the following manner:

- a. Reports of any required monitoring and/or recordkeeping information shall be submitted to the appropriate Ohio EPA District Office or local air agency.
- b. Except as otherwise may be provided in the terms and conditions for a specific emissions unit, quarterly written reports of (a) any deviations (excursions) from emission limitations, operational restrictions, and control device operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in this permit, (b) the probable cause of such deviations, and (c) any corrective actions or preventive measures which have been or will be taken, shall be submitted to the appropriate Ohio EPA District Office or local air agency. If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters. (These quarterly reports shall exclude deviations resulting from malfunctions reported in accordance with OAC rule 3745-15-06.)

### **3. Records Retention Requirements**

Each record of any monitoring data, testing data, and support information required pursuant to this permit shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit. Such records may be maintained in computerized form.

### **4. Inspections and Information Requests**

The Director of the Ohio EPA, or an authorized representative of the Director, may, subject to the safety requirements of the permittee and without undue delay, enter upon the premises of this source at any reasonable time for purposes of making inspections, conducting tests, examining records or reports pertaining to any emission of air contaminants, and determining compliance with any applicable State air pollution laws and regulations and the terms and conditions of this permit. The permittee shall furnish to the Director of the Ohio EPA, or an authorized representative of the Director, upon receipt of a written request and within a reasonable time, any information that may be requested to determine whether cause exists for modifying, reopening or revoking this permit or to determine compliance with this permit. Upon verbal or written request, the permittee shall also furnish to the Director of the Ohio EPA, or an authorized representative of the Director, copies of records required to be kept by this permit.

## **5. Scheduled Maintenance/Malfunction Reporting**

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of OAC rule 3745-15-06. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the appropriate Ohio EPA District Office or local air agency in accordance with paragraph (B) of OAC rule 3745-15-06. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is (are) served by such control system(s).

## **6. Permit Transfers**

Any transferee of this permit shall assume the responsibilities of the prior permit holder. The appropriate Ohio EPA District Office or local air agency must be notified in writing of any transfer of this permit.

## **7. Air Pollution Nuisance**

The air contaminants emitted by the emissions units covered by this permit shall not cause a public nuisance, in violation of OAC rule 3745-15-07.

## **8. Additional Reporting Requirements When There Are No Deviations of Federally Enforceable Emission Limitations, Operational Restrictions, or Control Device Operating Parameter Limitations (See Section A of This Permit)**

If no deviations occurred during a calendar quarter, the permittee shall submit a quarterly report, which states that no deviations occurred during that quarter. The reports shall be submitted quarterly, i.e., by January 31, April 30, July 31, and October 31 of each year and shall cover the previous calendar quarters.

## Part II - Specific Facility Terms and Conditions

### A. State and Federally Enforceable Section

None

### B. State Only Enforceable Section

1. The following insignificant emissions units are located at this facility:

B006 - 6 mmBtu/hr natural gas-fired boiler  
F001 - roadways  
P006 - hand held grinders  
P007 - grinders  
P008 - floor grinders  
P009 - Rotoblast 1019  
P011 - Tumbblast 1063  
P012 - Tumbblast 1013  
P014 - annealing furnace, equipment no. 193  
P017 - grinder  
P018 - sulfuric acid pickling  
P019 - nitric acid pickling  
T001 - 72,000-gallon oil storage tank #1  
Z018 - 3.06 mmBtu/hr natural gas-fired furnace #387  
Z019 - 3.06 mmBtu/hr natural gas-fired furnace #406  
Z020 - 3.06 mmBtu/hr natural gas-fired heat treat furnace  
Z026 - 4.2 mmBtu/hr natural gas-fired furnace #14  
Z028 - 6.0 mmBtu/hr natural gas-fired furnace #19  
Z029 - 5.40 mmBtu/hr natural gas-fired normalizing furnace  
Z030 - 6.0 mmBtu/hr natural gas-fired normalizing furnace  
Z031 - 7.5 mmBtu/hr natural gas-fired normalizing furnace  
Z032 - 3.75 mmBtu natural gas-fired furnace #326  
Z033 - 0.7 mmBtu/hr natural gas-fired boiler #2  
Z034 - 6.18 mmBtu/hr natural gas-fired heat treat furnace  
Z035 - 7.3 mmBtu/hr forging furnace #4  
Z036 - 3.09 mmBtu/hr natural gas-fired furnace #353  
Z037 - 3.09 mmBtu/hr natural gas-fired heat treat furnace  
Z038 - 5.4 mmBtu/hr natural gas-fired furnace #11  
Z039 - 5.4 mmBtu/hr natural gas-fired normalizing furnace

Each insignificant emissions unit at this facility must comply with all applicable State and federal regulations, as well as any emission limitations and/or control requirements contained within a permit to install for the emissions unit.

### Part III - Terms and Conditions for Emissions Units

**Emissions Unit ID:** #1Compressor (P020)

**Activity Description:** #1 Natural Gas Fired Air Compressor

#### A. State and Federally Enforceable Section

##### I. Applicable Emissions Limitations and/or Control Requirements

- The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
600 HP natural gas-fired, engine-driven air compressor with air/fuel ratio controller and catalytic converter. This engine is a small, bore type with 12 cylinders and a combined displacement of 1649 cubic inches.	OAC rule 3745-31-05(A)(3) (PTI 15-1101)	1.7 grams of nitrogen oxides (NOx)/bhp - hr 2.25 lbs/hr of NOx 9.86 tpy of NOx
		0.2 gram of organic compounds (OC)/bhp - hr 0.26 lb/hr of OC 1.14 tpy of OC
		3.7 grams of carbon monoxide (CO)/bhp - yr 4.89 lbs/hr of CO 21.42 tpy of CO
	OAC rule 3745-17-11(B)(5)(a)	0.31 pound of particulate emissions per mmBtu of actual heat input
	OAC rule 3745-17-07(A)(1)	See A.I.2.a below.
	OAC rule 3745-18-06(A)	Visible particulate emissions from any stack shall not exceed 20% opacity as a 6-minute average, except as provided by the rule.
		See A.II.1 below.

##### 2. Additional Terms and Conditions

- The emissions limitation specified in this rule citation has been revised based upon a change in the applicable emission factor contained in USEPA reference document AP-42, Fifth Edition, Compilation of Air Pollution Emission Factors. The revised rule was adopted by the Director of Ohio EPA in December, 1997. The USEPA has agreed to consider this revised rule as federally enforceable during the time from the effective date of this permit to the effective date of USEPA approval of this limitation as a revision to the Ohio SIP for particulate matter.

## II. Operational Restrictions

1. The permittee shall burn only natural gas as fuel in this emissions unit which has a heat content greater than 950 Btu per standard cubic foot and a sulfur content less than 0.6 pound per million standard cubic feet.

## III. Monitoring and/or Record Keeping Requirements

1. For each day during which the permittee burns a fuel in this emissions unit other than natural gas having a heat content greater than 950 Btu/standard cubic foot and a sulfur content less than 0.6 pound per million standard cubic feet, the permittee shall maintain a record of the type and quantity of fuel burned in this emissions unit.
2. The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible particulate emissions from the stack servicing this emissions unit. The presence or absence of any visible emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
  - a. the color of the emissions;
  - b. whether the emissions are representative of normal operations;
  - c. if the emissions are not representative of normal operations, the cause of the abnormal emissions;
  - d. the total duration of any visible emission incident; and
  - e. any corrective actions taken to eliminate the visible emissions.

## IV. Reporting Requirements

1. The permittee shall submit deviation (excursion) reports that identify each day when a fuel other than natural gas or natural gas having a heat content less than 950 Btu/scf and a sulfur content greater than 0.6 pound per MMscf is burned in this emissions unit. Each report shall be submitted within 30 days after the deviation occurs.
2. The permittee shall submit semiannual written reports which (a) identify all days during which any visible particulate emissions were observed from the stack serving this emissions unit and (b) describe any corrective actions taken to eliminate the visible particulate emissions. These reports shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) by January 31 and July 31 of each year and shall cover the previous 6-month period.

## V. Testing Requirements

1. Compliance with the emission limitations in section A.I.1 of these terms and conditions shall be determined in accordance with the following methods:
  - 1.a Emission Limitation:  
  
0.31 pound of particulate emissions per mmBtu of actual heat input  
  
Applicable Compliance Method:  
  
Compliance shall be demonstrated based upon the particulate emission factor of 0.029 pound of particulate emissions per mmBtu of actual heat input as found in AP42, 5th Edition, Chapter 3, Table 3.2-2, revised 10/96  
  
If required, the permittee shall demonstrate compliance with the above particulate emissions limitation in accordance with the procedures and methods specified in OAC rule 3745-17-03(B)(10).
  - 1.b Emission Limitation:  
  
20% opacity as a 6-minute average  
  
Applicable Compliance Method:  
  
If required, compliance shall be determined through visible emission observations performed in accordance with Test Method 9, 40 CFR 60, Appendix A and the procedures specified in OAC rule 3745-17-03(B)(1) and OAC rule 3745-15-04(A).

**V. Testing Requirements (continued)**

**1.c** Emission Limitation:

1.7 grams of NO<sub>x</sub> per bhp - hr

Applicable Compliance Method:

The permittee shall demonstrate compliance with the emission limitation above in accordance with USEPA Test Method 7 (40 CFR Part 60, Appendix A). The stack test conducted on February 12, 1995 indicated a NO<sub>x</sub> emission rate of 0.1 gram of NO<sub>x</sub> per bhp - hr.

**1.d** Emission Limitation:

2.25 lbs/hr of NO<sub>x</sub>

Applicable Compliance Method:

The permittee shall demonstrate compliance with the emission limitation above in accordance with USEPA Test Method 7 (40 CFR Part 60, Appendix A).

**1.e** Emission Limitation:

0.2 gram of OC per bhp - hr

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the above emission limitation in accordance with USEPA Test Method 25 (40 CFR Part 60, Appendix A).

**1.f** Emission Limitation:

0.26 lb/hr of OC

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the above emission limitation in accordance with USEPA Test Method 25 (40 CFR Part 60, Appendix A).

**1.g** Emission Limitation:

3.7 grams of CO per bhp - hr

Applicable Compliance Method:

The permittee shall demonstrate compliance with the above emission limitation in accordance with USEPA Test Method 10 (40 CFR Part 60, Appendix A). The stack test conducted on February 12, 1995 indicated a CO concentration of 1.6 grams of CO per bhp - hr.

**1.h** Emission Limitation:

4.89 lbs/hr of CO

Applicable Compliance Method:

The permittee shall demonstrate compliance with the above emission limitation in accordance with USEPA Test Method 10 (40 CFR Part 60, Appendix A).

## V. Testing Requirements (continued)

### 1.i Emission Limitation:

9.86 tpy of NO<sub>x</sub>  
1.14 tpy of OC  
21.42 tpy of CO

### Applicable Compliance Method:

The permittee shall demonstrate compliance with the above emission limitations by multiplying the allowable emission limitation by the actual hours of operation per year, and dividing by 2000 lbs/ton:

$(2.25 \text{ lbs/hr of NO}_x \times \text{actual hrs/yr}) / 2000 \text{ lbs/ton} = \text{tpy of NO}_x$   
 $(0.26 \text{ lb/hr of OC} \times \text{actual hrs/yr}) / 2000 \text{ lbs/ton} = \text{tpy of OC}$   
 $(4.89 \text{ lbs/hr of CO} \times \text{actual hrs/yr}) / 2000 \text{ lbs/ton} = \text{tpy of CO}$

### 2. The permittee shall conduct emission testing for this emissions unit in accordance with the following requirements:

a. Emissions testing shall be conducted within 6 months after the issuance of this permit and within 6 months of the expiration of this permit.

b. The emissions testing shall be conducted to demonstrate compliance with the allowable mass emission rates for NO<sub>x</sub> and CO.

c. The following test methods or approved modifications are from 40 CFR Part 60, Appendix A and shall be employed to demonstrate compliance with the allowable mass emission rates:

Method 19 in lieu of Methods 1 - 4 of 40 CFR Part 60, Appendix A  
Method 7 for NO<sub>x</sub>  
Method 10 for CO

d. The tests shall be conducted while the emissions unit is operating at its maximum capacity, unless otherwise specified or approved by the Canton City Health Department, Air Pollution Control Division.

e. The permittee shall record the bhp - hr during each test.

Not later than 30 days prior to the proposed test date(s), the permittee shall submit an "Intent to Test" notification to the Canton local air agency. The "Intent to Test" notification shall describe in detail the proposed test methods and procedures, the emissions unit's operating parameters, the time(s) and dates of the tests and the persons who will be conducting the tests. Failure to submit such notification for review and approval prior to the test may result in the Canton local air agency's refusal to accept the results of the emissions test.

Personnel from the Canton local air agency shall be permitted to witness the tests, examine the testing equipment, and acquire data and information necessary to ensure that the operation of the emissions unit and the testing procedures provide a valid characterization of the emissions from the emissions unit and/or the performance of the control equipment.

A comprehensive written report on the results of the emissions test shall be signed by the person or persons responsible for the tests and submitted to the Canton local air agency within 30 days following completion of the tests.

## VI. Miscellaneous Requirements

**None**

**B. State Enforceable Section**

**I. Applicable Emissions Limitations and/or Control Requirements**

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

### Part III - Terms and Conditions for Emissions Units

**Emissions Unit ID:** #2Compressor (P021)

**Activity Description:** #2 Natural Gas Fired Air Compressor

#### A. State and Federally Enforceable Section

##### I. Applicable Emissions Limitations and/or Control Requirements

- The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
600 HP natural gas-fired, engine-driven air compressor with air/fuel ratio controller and catalytic converter. This engine is a small, bore type with 12 cylinders and a combined displacement of 1649 cubic inches.	OAC rule 3745-31-05(A)(3) (PTI 15-1101)	1.7 grams of nitrogen oxides (NOx)/bhp - hr 2.25 lbs/hr of NOx 9.86 tpy of NOx
		0.2 gram of organic compounds (OC)/bhp - hr 0.26 lb/hr of OC 1.14 tpy of OC
		3.7 grams of carbon monoxide (CO)/bhp - yr 4.89 lbs/hr of CO 21.42 tpy of CO
	OAC rule 3745-17-11(B)(5)(a)	0.31 pound of particulate emissions per mmBtu of actual heat input  See A.I.2.a below.
	OAC rule 3745-17-07(A)(1)	Visible particulate emissions from any stack shall not exceed 20% opacity as a 6-minute average, except as provided by the rule.
	OAC rule 3745-18-06(A)	See A.II.1 below.

##### 2. Additional Terms and Conditions

- The emissions limitation specified in this rule citation has been revised based upon a change in the applicable emission factor contained in USEPA reference document AP-42, Fifth Edition, Compilation of Air Pollution Emission Factors. The revised rule was adopted by the Director of Ohio EPA in December, 1997. The USEPA has agreed to consider this revised rule as federally enforceable during the time from the effective date of this permit to the effective date of USEPA approval of this limitation as a revision to the Ohio SIP for particulate matter.

## II. Operational Restrictions

1. The permittee shall burn only natural gas as fuel in this emissions unit which has a heat content greater than 950 Btu per standard cubic foot and a sulfur content less than 0.6 pound per million standard cubic feet.

## III. Monitoring and/or Record Keeping Requirements

1. For each day during which the permittee burns a fuel in this emissions unit other than natural gas having a heat content greater than 950 Btu/standard cubic foot and a sulfur content less than 0.6 pound per million standard cubic feet, the permittee shall maintain a record of the type and quantity of fuel burned in this emissions unit.
2. The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible particulate emissions from the stack servicing this emissions unit. The presence or absence of any visible emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
  - a. the color of the emissions;
  - b. whether the emissions are representative of normal operations;
  - c. if the emissions are not representative of normal operations, the cause of the abnormal emissions;
  - d. the total duration of any visible emission incident; and
  - e. any corrective actions taken to eliminate the visible emissions.

## IV. Reporting Requirements

1. The permittee shall submit deviation (excursion) reports that identify each day when a fuel other than natural gas or natural gas having a heat content less than 950 Btu/scf and a sulfur content greater than 0.6 pound per MMscf is burned in this emissions unit. Each report shall be submitted within 30 days after the deviation occurs.
2. The permittee shall submit semiannual written reports which (a) identify all days during which any visible particulate emissions were observed from the stack serving this emissions unit and (b) describe any corrective actions taken to eliminate the visible particulate emissions. These reports shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) by January 31 and July 31 of each year and shall cover the previous 6-month period.

## V. Testing Requirements

1. Compliance with the emission limitations in section A.I.1 of these terms and conditions shall be determined in accordance with the following methods:
  - 1.a Emission Limitation:  
  
0.31 pound of particulate emissions per mmBtu of actual heat input  
  
Applicable Compliance Method:  
  
Compliance shall be demonstrated based upon the particulate emission factor of 0.029 pound of particulate emissions per mmBtu of actual heat input as found in AP42, 5th Edition, Chapter 3, Table 3.2-2, revised 10/96  
  
If required, the permittee shall demonstrate compliance with the above particulate emissions limitation in accordance with the procedures and methods specified in OAC rule 3745-17-03(B)(10).
  - 1.b Emission Limitation:  
  
20% opacity as a 6-minute average  
  
Applicable Compliance Method:  
  
If required, compliance shall be determined through visible emission observations performed in accordance with Test Method 9, 40 CFR 60, Appendix A and the procedures specified in OAC rule 3745-17-03(B)(1) and OAC rule 3745-15-04(A).

**V. Testing Requirements (continued)**

**1.c** Emission Limitation:

1.7 grams of NO<sub>x</sub> per bhp - hr

Applicable Compliance Method:

The permittee shall demonstrate compliance with the emission limitation above in accordance with USEPA Test Method 7 (40 CFR Part 60, Appendix A). The stack test conducted on February 12, 1995 indicated a NO<sub>x</sub> emission rate of 0.1 gram of NO<sub>x</sub> per bhp - hr.

**1.d** Emission Limitation:

2.25 lbs/hr of NO<sub>x</sub>

Applicable Compliance Method:

The permittee shall demonstrate compliance with the emission limitation above in accordance with USEPA Test Method 7 (40 CFR Part 60, Appendix A).

**1.e** Emission Limitation:

0.2 gram of OC per bhp - hr

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the above emission limitation in accordance with USEPA Test Method 25 (40 CFR Part 60, Appendix A).

**1.f** Emission Limitation:

0.26 lb/hr of OC

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the above emission limitation in accordance with USEPA Test Method 25 (40 CFR Part 60, Appendix A).

**1.g** Emission Limitation:

3.7 grams of CO per bhp - hr

Applicable Compliance Method:

The permittee shall demonstrate compliance with the above emission limitation in accordance with USEPA Test Method 10 (40 CFR Part 60, Appendix A). The stack test conducted on February 12, 1995 indicated a CO concentration of 1.6 grams of CO per bhp - hr.

**1.h** Emission Limitation:

4.89 lbs/hr of CO

Applicable Compliance Method:

The permittee shall demonstrate compliance with the above emission limitation in accordance with USEPA Test Method 10 (40 CFR Part 60, Appendix A).

## V. Testing Requirements (continued)

### 1.i Emission Limitation:

9.86 tpy of NO<sub>x</sub>  
1.14 tpy of OC  
21.42 tpy of CO

### Applicable Compliance Method:

The permittee shall demonstrate compliance with the above emission limitations by multiplying the allowable emission limitation by the actual hours of operation per year, and dividing by 2000 lbs/ton:

$(2.25 \text{ lbs/hr of NO}_x \times \text{actual hrs/yr}) / 2000 \text{ lbs/ton} = \text{tpy of NO}_x$   
 $(0.26 \text{ lb/hr of OC} \times \text{actual hrs/yr}) / 2000 \text{ lbs/ton} = \text{tpy of OC}$   
 $(4.89 \text{ lbs/hr of CO} \times \text{actual hrs/yr}) / 2000 \text{ lbs/ton} = \text{tpy of CO}$

### 2. The permittee shall conduct emission testing for this emissions unit in accordance with the following requirements:

a. Emissions testing shall be conducted within 6 months after the issuance of this permit and within 6 months of the expiration of this permit.

b. The emissions testing shall be conducted to demonstrate compliance with the allowable mass emission rates for NO<sub>x</sub> and CO.

c. The following test methods or approved modifications are from 40 CFR Part 60, Appendix A and shall be employed to demonstrate compliance with the allowable mass emission rates:

Method 19 in lieu of Methods 1 - 4 of 40 CFR Part 60, Appendix A  
Method 7 for NO<sub>x</sub>  
Method 10 for CO

d. The tests shall be conducted while the emissions unit is operating at its maximum capacity, unless otherwise specified or approved by the Canton City Health Department, Air Pollution Control Division.

e. The permittee shall record the bhp - hr during each test.

Not later than 30 days prior to the proposed test date(s), the permittee shall submit an "Intent to Test" notification to the Canton local air agency. The "Intent to Test" notification shall describe in detail the proposed test methods and procedures, the emissions unit's operating parameters, the time(s) and dates of the tests and the persons who will be conducting the tests. Failure to submit such notification for review and approval prior to the test may result in the Canton local air agency's refusal to accept the results of the emissions test.

Personnel from the Canton local air agency shall be permitted to witness the tests, examine the testing equipment, and acquire data and information necessary to ensure that the operation of the emissions unit and the testing procedures provide a valid characterization of the emissions from the emissions unit and/or the performance of the control equipment.

A comprehensive written report on the results of the emissions test shall be signed by the person or persons responsible for the tests and submitted to the Canton local air agency within 30 days following completion of the tests.

	OAC rule 3745-17-07(A)(1)	See A.I.2.a below.
	OAC rule 3745-18-06(A)	Visible particulate emissions from any stack shall not exceed 20% opacity as a 6-minute average, except as provided by the rule.
		See A.II.1 below.

##### 2. Additional Terms and Conditions

- The emissions limitation specified in this rule citation has been revised based upon a change in the applicable emission factor contained in USEPA reference document AP-42, Fifth Edition, Compilation of Air Pollution Emission Factors. The revised rule was adopted by the Director of Ohio EPA in December, 1997. The USEPA has agreed to consider this revised rule as federally enforceable during the time from the effective date of this permit to the effective date of USEPA approval of this limitation as a revision to the Ohio SIP for particulate matter.

## II. Operational Restrictions

1. The permittee shall burn only natural gas as fuel in this emissions unit which has a heat content greater than 950 Btu per standard cubic foot and a sulfur content less than 0.6 pound per million standard cubic feet.

## III. Monitoring and/or Record Keeping Requirements

1. For each day during which the permittee burns a fuel in this emissions unit other than natural gas having a heat content greater than 950 Btu/standard cubic foot and a sulfur content less than 0.6 pound per million standard cubic feet, the permittee shall maintain a record of the type and quantity of fuel burned in this emissions unit.
2. The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible particulate emissions from the stack servicing this emissions unit. The presence or absence of any visible emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
  - a. the color of the emissions;
  - b. whether the emissions are representative of normal operations;
  - c. if the emissions are not representative of normal operations, the cause of the abnormal emissions;
  - d. the total duration of any visible emission incident; and
  - e. any corrective actions taken to eliminate the visible emissions.

## IV. Reporting Requirements

1. The permittee shall submit deviation (excursion) reports that identify each day when a fuel other than natural gas or natural gas having a heat content less than 950 Btu/scf and a sulfur content greater than 0.6 pound per MMscf is burned in this emissions unit. Each report shall be submitted within 30 days after the deviation occurs.
2. The permittee shall submit semiannual written reports which (a) identify all days during which any visible particulate emissions were observed from the stack serving this emissions unit and (b) describe any corrective actions taken to eliminate the visible particulate emissions. These reports shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) by January 31 and July 31 of each year and shall cover the previous 6-month period.

## V. Testing Requirements

1. Compliance with the emission limitations in section A.I.1 of these terms and conditions shall be determined in accordance with the following methods:
  - 1.a Emission Limitation:  
  
0.31 pound of particulate emissions per mmBtu of actual heat input  
  
Applicable Compliance Method:  
  
Compliance shall be demonstrated based upon the particulate emission factor of 0.029 pound of particulate emissions per mmBtu of actual heat input as found in AP42, 5th Edition, Chapter 3, Table 3.2-2, revised 10/96  
  
If required, the permittee shall demonstrate compliance with the above particulate emissions limitation in accordance with the procedures and methods specified in OAC rule 3745-17-03(B)(10).
  - 1.b Emission Limitation:  
  
20% opacity as a 6-minute average  
  
Applicable Compliance Method:  
  
If required, compliance shall be determined through visible emission observations performed in accordance with Test Method 9, 40 CFR 60, Appendix A and the procedures specified in OAC rule 3745-17-03(B)(1) and OAC rule 3745-15-04(A).

**V. Testing Requirements (continued)**

**1.c** Emission Limitation:

1.7 grams of NO<sub>x</sub> per bhp - hr

Applicable Compliance Method:

The permittee shall demonstrate compliance with the emission limitation above in accordance with USEPA Test Method 7 (40 CFR Part 60, Appendix A). The stack test conducted on February 12, 1995 indicated a NO<sub>x</sub> emission rate of 0.1 gram of NO<sub>x</sub> per bhp - hr.

**1.d** Emission Limitation:

2.25 lbs/hr of NO<sub>x</sub>

Applicable Compliance Method:

The permittee shall demonstrate compliance with the emission limitation above in accordance with USEPA Test Method 7 (40 CFR Part 60, Appendix A).

**1.e** Emission Limitation:

0.2 gram of OC per bhp - hr

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the above emission limitation in accordance with USEPA Test Method 25 (40 CFR Part 60, Appendix A).

**1.f** Emission Limitation:

0.26 lb/hr of OC

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the above emission limitation in accordance with USEPA Test Method 25 (40 CFR Part 60, Appendix A).

**1.g** Emission Limitation:

3.7 grams of CO per bhp - hr

Applicable Compliance Method:

The permittee shall demonstrate compliance with the above emission limitation in accordance with USEPA Test Method 10 (40 CFR Part 60, Appendix A). The stack test conducted on February 12, 1995 indicated a CO concentration of 1.6 grams of CO per bhp - hr.

**1.h** Emission Limitation:

4.89 lbs/hr of CO

Applicable Compliance Method:

The permittee shall demonstrate compliance with the above emission limitation in accordance with USEPA Test Method 10 (40 CFR Part 60, Appendix A).

## V. Testing Requirements (continued)

### 1.i Emission Limitation:

9.86 tpy of NO<sub>x</sub>  
1.14 tpy of OC  
21.42 tpy of CO

### Applicable Compliance Method:

The permittee shall demonstrate compliance with the above emission limitations by multiplying the allowable emission limitation by the actual hours of operation per year, and dividing by 2000 lbs/ton:

$(2.25 \text{ lbs/hr of NO}_x \times \text{actual hrs/yr}) / 2000 \text{ lbs/ton} = \text{tpy of NO}_x$   
 $(0.26 \text{ lb/hr of OC} \times \text{actual hrs/yr}) / 2000 \text{ lbs/ton} = \text{tpy of OC}$   
 $(4.89 \text{ lbs/hr of CO} \times \text{actual hrs/yr}) / 2000 \text{ lbs/ton} = \text{tpy of CO}$

### 2. The permittee shall conduct emission testing for this emissions unit in accordance with the following requirements:

a. Emissions testing shall be conducted within 6 months after the issuance of this permit and within 6 months of the expiration of this permit.

b. The emissions testing shall be conducted to demonstrate compliance with the allowable mass emission rates for NO<sub>x</sub> and CO.

c. The following test methods or approved modifications are from 40 CFR Part 60, Appendix A and shall be employed to demonstrate compliance with the allowable mass emission rates:

Method 19 in lieu of Methods 1 - 4 of 40 CFR Part 60, Appendix A  
Method 7 for NO<sub>x</sub>  
Method 10 for CO

d. The tests shall be conducted while the emissions unit is operating at its maximum capacity, unless otherwise specified or approved by the Canton City Health Department, Air Pollution Control Division.

e. The permittee shall record the bhp - hr during each test.

Not later than 30 days prior to the proposed test date(s), the permittee shall submit an "Intent to Test" notification to the Canton local air agency. The "Intent to Test" notification shall describe in detail the proposed test methods and procedures, the emissions unit's operating parameters, the time(s) and dates of the tests and the persons who will be conducting the tests. Failure to submit such notification for review and approval prior to the test may result in the Canton local air agency's refusal to accept the results of the emissions test.

Personnel from the Canton local air agency shall be permitted to witness the tests, examine the testing equipment, and acquire data and information necessary to ensure that the operation of the emissions unit and the testing procedures provide a valid characterization of the emissions from the emissions unit and/or the performance of the control equipment.

A comprehensive written report on the results of the emissions test shall be signed by the person or persons responsible for the tests and submitted to the Canton local air agency within 30 days following completion of the tests.

### A. State and Federally Enforceable Section

#### I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
600 HP natural gas-fired, engine-driven air compressor with air/fuel ratio controller and catalytic converter. This engine is a small, bore type with 12 cylinders and a combined displacement of 1649 cubic inches.	OAC rule 3745-31-05(A)(3) (PTI 15-1101)	1.7 grams of nitrogen oxides (NOx)/bhp - hr 2.25 lbs/hr of NOx 9.86 tpy of NOx
		0.2 gram of organic compounds (OC)/bhp - hr 0.26 lb/hr of OC 1.14 tpy of OC
		3.7 grams of carbon monoxide (CO)/bhp - yr 4.89 lbs/hr of CO 21.42 tpy of CO
	OAC rule 3745-17-11(B)(5)(a)	0.31 pound of particulate emissions per mmBtu of actual heat input
	OAC rule 3745-17-07(A)(1)	Visible particulate emissions from any stack shall not exceed 20% opacity as a 6-minute average, except as provided by the rule.
	OAC rule 3745-18-06(A)	See A.II.1 below.

#### 2. Additional Terms and Conditions

- 2.a The emissions limitation specified in this rule citation has been revised based upon a change in the applicable emission factor contained in USEPA reference document AP-42, Fifth Edition, Compilation of Air Pollution Emission Factors. The revised rule was adopted by the Director of Ohio EPA in December, 1997. The USEPA has agreed to consider this revised rule as federally enforceable during the time from the effective date of this permit to the effective date of USEPA approval of this limitation as a revision to the Ohio SIP for particulate matter.

## II. Operational Restrictions

1. The permittee shall burn only natural gas as fuel in this emissions unit which has a heat content greater than 950 Btu per standard cubic foot and a sulfur content less than 0.6 pound per million standard cubic feet.

## III. Monitoring and/or Record Keeping Requirements

1. For each day during which the permittee burns a fuel in this emissions unit other than natural gas having a heat content greater than 950 Btu/standard cubic foot and a sulfur content less than 0.6 pound per million standard cubic feet, the permittee shall maintain a record of the type and quantity of fuel burned in this emissions unit.
2. The permittee shall perform daily checks, when the emissions unit is in operation and when the weather conditions allow, for any visible particulate emissions from the stack servicing this emissions unit. The presence or absence of any visible emissions shall be noted in an operations log. If visible emissions are observed, the permittee shall also note the following in the operations log:
  - a. the color of the emissions;
  - b. whether the emissions are representative of normal operations;
  - c. if the emissions are not representative of normal operations, the cause of the abnormal emissions;
  - d. the total duration of any visible emission incident; and
  - e. any corrective actions taken to eliminate the visible emissions.

## IV. Reporting Requirements

1. The permittee shall submit deviation (excursion) reports that identify each day when a fuel other than natural gas or natural gas having a heat content less than 950 Btu/scf and a sulfur content greater than 0.6 pound per MMscf is burned in this emissions unit. Each report shall be submitted within 30 days after the deviation occurs.
2. The permittee shall submit semiannual written reports which (a) identify all days during which any visible particulate emissions were observed from the stack serving this emissions unit and (b) describe any corrective actions taken to eliminate the visible particulate emissions. These reports shall be submitted to the Director (the appropriate Ohio EPA District Office or local air agency) by January 31 and July 31 of each year and shall cover the previous 6-month period.

## V. Testing Requirements

1. Compliance with the emission limitations in section A.I.1 of these terms and conditions shall be determined in accordance with the following methods:
  - 1.a Emission Limitation:  
  
0.31 pound of particulate emissions per mmBtu of actual heat input  
  
Applicable Compliance Method:  
  
Compliance shall be demonstrated based upon the particulate emission factor of 0.029 pound of particulate emissions per mmBtu of actual heat input as found in AP42, 5th Edition, Chapter 3, Table 3.2-2, revised 10/96  
  
If required, the permittee shall demonstrate compliance with the above particulate emissions limitation in accordance with the procedures and methods specified in OAC rule 3745-17-03(B)(10).
  - 1.b Emission Limitation:  
  
20% opacity as a 6-minute average  
  
Applicable Compliance Method:  
  
If required, compliance shall be determined through visible emission observations performed in accordance with Test Method 9, 40 CFR 60, Appendix A and the procedures specified in OAC rule 3745-17-03(B)(1) and OAC rule 3745-15-04(A).

**V. Testing Requirements (continued)**

**1.c** Emission Limitation:

1.7 grams of NO<sub>x</sub> per bhp - hr

Applicable Compliance Method:

The permittee shall demonstrate compliance with the emission limitation above in accordance with USEPA Test Method 7 (40 CFR Part 60, Appendix A). The stack test conducted on February 12, 1995 indicated a NO<sub>x</sub> emission rate of 0.1 gram of NO<sub>x</sub> per bhp - hr.

**1.d** Emission Limitation:

2.25 lbs/hr of NO<sub>x</sub>

Applicable Compliance Method:

The permittee shall demonstrate compliance with the emission limitation above in accordance with USEPA Test Method 7 (40 CFR Part 60, Appendix A).

**1.e** Emission Limitation:

0.2 gram of OC per bhp - hr

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the above emission limitation in accordance with USEPA Test Method 25 (40 CFR Part 60, Appendix A).

**1.f** Emission Limitation:

0.26 lb/hr of OC

Applicable Compliance Method:

If required, the permittee shall demonstrate compliance with the above emission limitation in accordance with USEPA Test Method 25 (40 CFR Part 60, Appendix A).

**1.g** Emission Limitation:

3.7 grams of CO per bhp - hr

Applicable Compliance Method:

The permittee shall demonstrate compliance with the above emission limitation in accordance with USEPA Test Method 10 (40 CFR Part 60, Appendix A). The stack test conducted on February 12, 1995 indicated a CO concentration of 1.6 grams of CO per bhp - hr.

**1.h** Emission Limitation:

4.89 lbs/hr of CO

Applicable Compliance Method:

The permittee shall demonstrate compliance with the above emission limitation in accordance with USEPA Test Method 10 (40 CFR Part 60, Appendix A).

## V. Testing Requirements (continued)

### 1.i Emission Limitation:

9.86 tpy of NO<sub>x</sub>  
1.14 tpy of OC  
21.42 tpy of CO

Applicable Compliance Method:

The permittee shall demonstrate compliance with the above emission limitations by multiplying the allowable emission limitation by the actual hours of operation per year, and dividing by 2000 lbs/ton:

$(2.25 \text{ lbs/hr of NO}_x \times \text{actual hrs/yr}) / 2000 \text{ lbs/ton} = \text{tpy of NO}_x$   
 $(0.26 \text{ lb/hr of OC} \times \text{actual hrs/yr}) / 2000 \text{ lbs/ton} = \text{tpy of OC}$   
 $(4.89 \text{ lbs/hr of CO} \times \text{actual hrs/yr}) / 2000 \text{ lbs/ton} = \text{tpy of CO}$

### 2. The permittee shall conduct emission testing for this emissions unit in accordance with the following requirements:

a. Emissions testing shall be conducted within 6 months after the issuance of this permit and within 6 months of the expiration of this permit.

b. The emissions testing shall be conducted to demonstrate compliance with the allowable mass emission rates for NO<sub>x</sub> and CO.

c. The following test methods or approved modifications are from 40 CFR Part 60, Appendix A and shall be employed to demonstrate compliance with the allowable mass emission rates:

Method 19 in lieu of Methods 1 - 4 of 40 CFR Part 60, Appendix A  
Method 7 for NO<sub>x</sub>  
Method 10 for CO

d. The tests shall be conducted while the emissions unit is operating at its maximum capacity, unless otherwise specified or approved by the Canton City Health Department, Air Pollution Control Division.

e. The permittee shall record the bhp - hr during each test.

Not later than 30 days prior to the proposed test date(s), the permittee shall submit an "Intent to Test" notification to the Canton local air agency. The "Intent to Test" notification shall describe in detail the proposed test methods and procedures, the emissions unit's operating parameters, the time(s) and dates of the tests and the persons who will be conducting the tests. Failure to submit such notification for review and approval prior to the test may result in the Canton local air agency's refusal to accept the results of the emissions test.

Personnel from the Canton local air agency shall be permitted to witness the tests, examine the testing equipment, and acquire data and information necessary to ensure that the operation of the emissions unit and the testing procedures provide a valid characterization of the emissions from the emissions unit and/or the performance of the control equipment.

A comprehensive written report on the results of the emissions test shall be signed by the person or persons responsible for the tests and submitted to the Canton local air agency within 30 days following completion of the tests.

## VI. Miscellaneous Requirements

**None**

**B. State Enforceable Section**

**I. Applicable Emissions Limitations and/or Control Requirements**

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>

### Part III - Terms and Conditions for Emissions Units

**Emissions Unit ID:** Furnace#309 (P024)

**Activity Description:** Previously Source # P004 Heat Treat Furnace #309

#### A. State and Federally Enforceable Section

##### I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
12.75 mmBtu/hr natural gas-fired forge furnace	OAC rule 3745-17-11	See A.I.2.a below.

##### 2. Additional Terms and Conditions

- 2.a The uncontrolled mass rate of emissions (UMRE) for particulate matter (PM) from this emissions unit is less than 10 pounds per hour because the metal parts charged do not emit particulates and the only source of PM emissions from the forge furnace is from the combustion of natural gas, and natural gas is the only fuel burned in this emissions unit. Therefore, pursuant to OAC rule 3745-17-11 (A)(2)(a)(ii) and 17-11(A)(4), Figure II and Table I, respectively, do not apply to this emissions unit.

Since OAC rule 3745-17-11 is not applicable, the opacity limits in OAC rule 3745-17-07 are also not applicable.

##### II. Operational Restrictions

1. The permittee shall burn only natural gas as fuel in this emissions unit.
2. No oil or oil-based substance shall be applied to the product during processing through this device.

##### III. Monitoring and/or Record Keeping Requirements

1. For each day during which the permittee burns a fuel other than natural gas, the permittee shall maintain a record of the type and quantity of fuel burned in this emissions unit.

##### IV. Reporting Requirements

1. The permittee shall submit deviation (excursion) reports that identify each day when a fuel other than natural gas was burned in this emissions unit. Each report shall be submitted within 30 days after the deviation occurs.

Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
18.8 mmBtu/hr natural gas-fired forge furnace	OAC rule 3745-17-11	See A.I.2.a below.

#### 2. Additional Terms and Conditions

- 2.a The uncontrolled mass rate of emissions (UMRE) for particulate matter (PM) from this emissions unit is less than 10 pounds per hour because the metal parts charged do not emit particulates and the only source of PM emissions from the forge furnace is from the combustion of natural gas, and natural gas is the only fuel burned in this emissions unit. Therefore, pursuant to OAC rule 3745-17-11 (A)(2)(a)(ii) and 17-11(A)(4), Figure II and Table I, respectively, do not apply to this emissions unit.

Since OAC rule 3745-17-11 is not applicable, the opacity limits in OAC rule 3745-17-07 are also not applicable.

#### II. Operational Restrictions

1. The permittee shall burn only natural gas as fuel in this emissions unit.
2. No oil or oil-based substance shall be applied to the product during processing through this device.

#### III. Monitoring and/or Record Keeping Requirements

1. For each day during which the permittee burns a fuel other than natural gas, the permittee shall maintain a record of the type and quantity of fuel burned in this emissions unit.

#### IV. Reporting Requirements

1. The permittee shall submit deviation (excursion) reports that identify each day when a fuel other than natural gas was burned in this emissions unit. Each report shall be submitted within 30 days after the deviation occurs.

#### V. Testing Requirements

None

#### VI. Miscellaneous Requirements

None

**B. State Enforceable Section**

**I. Applicable Emissions Limitations and/or Control Requirements**

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

### Part III - Terms and Conditions for Emissions Units

**Emissions Unit ID:** Furnace#372 (P040)

**Activity Description:** Previously Source # P003 Furnace #64 No.3 Forge Shop

#### A. State and Federally Enforceable Section

##### I. Applicable Emissions Limitations and/or Control Requirements

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.

<u>Operations, Property, and/or Equipment</u>	<u>Applicable Rules/ Requirements</u>	<u>Applicable Emissions Limitations/Control Measures</u>
10.8 mmBtu/hr natural gas-fired forge furnace	OAC rule 3745-17-11	See A.I.2.a below.

##### 2. Additional Terms and Conditions

- 2.a The uncontrolled mass rate of emissions (UMRE) for particulate matter (PM) from this emissions unit is less than 10 pounds per hour because the metal parts charged do not emit particulates and the only source of PM emissions from the forge furnace is from the combustion of natural gas, and natural gas is the only fuel burned in this emissions unit. Therefore, pursuant to OAC rule 3745-17-11 (A)(2)(a)(ii) and 17-11(A)(4), Figure II and Table I, respectively, do not apply to this emissions unit.

Since OAC rule 3745-17-11 is not applicable, the opacity limits in OAC rule 3745-17-07 are also not applicable.

##### II. Operational Restrictions

1. The permittee shall burn only natural gas as fuel in this emissions unit.
2. No oil or oil-based substance shall be applied to the product during processing through this device.

##### III. Monitoring and/or Record Keeping Requirements

1. For each day during which the permittee burns a fuel other than natural gas, the permittee shall maintain a record of the type and quantity of fuel burned in this emissions unit.

##### IV. Reporting Requirements

1. The permittee shall submit deviation (excursion) reports that identify each day when a fuel other than natural gas was burned in this emissions unit. Each report shall be submitted within 30 days after the deviation occurs.

##### V. Testing Requirements

None

##### VI. Miscellaneous Requirements

None

**B. State Enforceable Section**

**I. Applicable Emissions Limitations and/or Control Requirements**

1. The specific operation(s), property, and/or equipment which constitute this emissions unit are listed in the following table along with the applicable rules and/or requirements and with the applicable emissions limitations and/or control measures. Emissions from this unit shall not exceed the listed limitations, and the listed control measures shall be employed. Additional applicable emissions limitations and/or control measures (if any) may be specified in narrative form following the table.
