

## Davis-Besse Nuclear Power Station

The NRC waste confidence decision could have an impact on the DBNPS license renewal. The concern being that the NRC will not be issuing power plant licenses or renewals until the waste confidence decision has been resolved. This link: <http://www.nrc.gov/waste/spent-fuel-storage/wcd.html> has all the information on the waste confidence decision including its projected schedule. Presently the NRC is estimating the waste confidence decision will be resolved by August 2014. The DBNPS license expires in 2017 so assuming the waste confidence schedule is maintained it shouldn't interfere with the issuance of a renewed license for DBNPS.
