Are you concerned about liability risks and financial risks associated with conducting a brownfield cleanup as the volunteer or the grant holder?

Are you worried about exceeding your contingency funds if you end up finding contamination during the brownfield cleanup that was unexpected at the beginning?

Are you concerned about neighbors filing a lawsuit against you if contamination has migrated off your site?

If any of these worries sound familiar, the discounted VAP Environmental Insurance (EI) Incentive may be just what you're looking for! Call the Ohio EPA VAP and see how you can obtain discounted EI through the VAP Process.
