**Re: Hazardous Waste Permit Modification/Class 1A/Approval
Delphi Automotive Systems (Wisconsin Boulevard Site)
OHD060928561 / 05-57-027**

Dear Mr. Ridd:

On July 10, 2008, Ohio EPA received a request for a Class 1A (Class 1 requiring prior approval) hazardous waste permit modification (tracking number – OHD060928561-080710-1A-~~12~~) from Delphi Automotive Systems, Wisconsin Boulevard Site. With this letter, Ohio EPA approves the above referenced Class 1A modification submitted pursuant to Ohio Administrative Code (OAC) Rule 3745-50-51.

The following modification has been made to your October 8, 2003, Ohio Hazardous Waste Facility Installation and Operation Permit. Also, the records of Ohio EPA have been changed accordingly:

Extension of due date for submission of the Corrective Measures Proposal to 90 days after receipt of Ohio EPA's comments on the RFI report.

Attached is a copy of the revised permit condition. This has been included to ensure that all involved parties have written confirmation of the change*.

If you have any questions concerning this action, please contact Jeff Smith at our Southwest District Office.

Sincerely,

A handwritten signature in black ink, appearing to read "Thomas A. Winston". The signature is fluid and cursive, with a large initial "T" and "W".

Thomas A. Winston, P.E.
Chief, Southwest District Office

*Also, in accordance with Ohio Administrative Code Rule 3745-50-51(D)(1)(a)(ii), the Permittee must send a notice within 90 days of an approved Class 1A Modification to all persons on the Agency mailing list. An updated mailing list can be obtained by contacting Dave Sholtis at (614) 644-2917, or by e-mail at dave.sholtis@epa.state.oh.us.

Harold O'Connell, SWDO

- (vi) Prepare a report, either prior to or as part of the Environmental Indicators Report, that describes and justifies any interim actions performed to meet the requirements of this Permit Condition, including sampling documentation, construction completion documentation and/or confirmatory sampling results. This report may contain other investigation information, including sample results, and risk assessments that are used to support the overall investigation process including sampling and evaluation results necessary to support submittals required for Permit Condition E.6. below.

In the event Interim Measures are determined not to be necessary, the Permittee will adjust their current schedule by submitting an Environmental Indicators Report by February 7, 2006.

E.6. FINAL CORRECTIVE MEASURES PROPOSAL

The Permittee must propose to Ohio EPA 90 days after receipt of Ohio EPA's comments on the RFI report, final corrective measures necessary to protect human health and the environment from all current and future unacceptable risks due to releases of hazardous waste or hazardous constituents at or from the Facility (the "Final Corrective Measures Proposal"). The proposal must describe all Interim Measures and corrective measures implemented at the Facility since the effective date of this Permit. It must also include a description of all other final corrective measures that the Permittee evaluated, a detailed explanation of why the Permittee preferred the proposed final corrective measures, and cost estimates for the final corrective measures evaluated.

As part of developing its proposal, the Permittee must propose appropriate risk screening criteria, cleanup objectives, and points of compliance under current and reasonably expected future land use scenarios and provide the basis and justification for these decisions.

Ohio EPA may request supplemental information from the Permittee if Ohio EPA determines that the proposal and supporting information do not provide an adequate basis to select final corrective measures that will protect human health and the environment from the release of hazardous waste and hazardous constituents at or from the Facility. The Permittee must provide timely any supplemental information that Ohio EPA requests in writing.

In the event Interim Measures are determined not to be necessary, the Permittee will adjust their current schedule to include submitting the Final Corrective Measures Proposal by July 21, 2007.
