**Re: Hazardous Waste Permit Modification
Modification Classification Determination & Class 1A Approval
BP Products North America
Premcor Refining Group, Inc.
U.S. EPA ID# OHD 005 051 826 / Ohio Permit #03-02-0390**

Dear Mr. Darr:

On March 23, 2007, Ohio EPA received a request for a Class 1A (Class 1 requiring prior approval) hazardous waste permit modification (tracking number – 070323-1A-1) from BP Products North America, Inc., and Premcor Refining Group, Inc., requesting to remove ethylene dibromide from the list of potential contaminants of concern for the performance-based groundwater monitoring currently being performed at the facility.

As the modification referenced above is not explicitly listed in the Appendix to Ohio Administrative Code (OAC) Rule 3745-50-51, Ohio EPA has evaluated the classification of the modification application pursuant to OAC Rule 3745-50-51(E). BP Products North America, Inc. and Premcor Refining Group, Inc., are hereby notified that Ohio EPA concurs with the classification as a Class 1A prior approval permit modification. In addition, with this letter, Ohio EPA approves the above referenced Class 1A modification, submitted pursuant to OAC Rule 3745-50-51.

The following modification has been made to your June 20, 2003, Ohio Hazardous Waste Facility Installation and Operation Permit. Also, the records of Ohio EPA have been changed accordingly:

- Reference to ethylene dibromide has been removed from Table 3 of Module E.

Enclosed is a copy of the revised permit terms and conditions. This has been included to ensure that all involved parties have written confirmation of the change.*
