Environmental Protection Agency.

Date: 5.28.10

**Re: Closure Plan Approval
Preferred Airparts, LLC, Apple Creek, Ohio, Wayne County
OHR 000 040 857**

Dear Mr. Getz:

On November 12, 2008, Preferred Airparts, LLC (PAP) submitted to Ohio EPA a closure plan for an unpermitted hazardous waste management unit (HWMU) located at 11234 Hacket Road, Apple Creek, Ohio. Revisions to the closure plan were received on February 22, 2010. The closure plan was submitted pursuant the April 9, 2008, Director's Final Findings and Orders in order to demonstrate that PAP's proposal for closure complies with the substantive requirements of OAC rule 3745-55-11.

The owner or operator and the public were given the opportunity to submit written comments regarding the closure plan in accordance with the hazardous waste rule requirements. No public comments were received by Ohio EPA.

Based upon review of PAP's submittal and subsequent revisions, I conclude the closure plan for the hazardous waste facility at 11234 Hacket Road, Apple Creek, Ohio, as modified herein, meets the performance standard contained in OAC rule 3745-55-11, and complies with the pertinent parts of OAC rule 3745-66-12.

The closure plan submitted to Ohio EPA on November 12, 2008, and revised on February 22, 2010, by PAP is hereby approved with the following modifications:

1. Consistent with sections V.2.e. and V.2.g. of the Orders, the first 2 sentences of Section 2.5 Schedule For Closure shall be revised to read as follows: PAP will complete execution of the closure plan within 180 days of receiving approval of the plan from Ohio EPA. Within 90 days after completion of closure, PAP will submit certification of closure to Ohio EPA in accordance with OAC rule 3745-55-15.
2. Consistent with the Contained in Determination, the first paragraph on page 3-3 under Sand Filter Removal shall be revised to read as follows: The contained-in

Ted Strickland, Governor
Lee Fisher, Lieutenant Governor
Chris Korleski, Director

decision determined that environmental media such as soil within the sand filter no longer contain listed hazardous waste. Areas of the sand filter containing predominately sand in depths of 1 foot or greater, as indicated by boring logs, are considered sludge. This material will be removed and managed as a listed waste.

The sand filter and associated piping will be excavated from the HWMU. The media from the sand filter will be disposed in accordance with federal, state, and local regulations or reused on site for fill. Prior to excavating the sand filter media and disposing or reusing on site, PAP will contact Ohio EPA's Division of Solid and Infectious Waste Management to determine any requirements they may have with respect to environmental media in the sand filter and/or leach bed portions of the treatment system.

Compliance with the approved closure plan, including the modifications specified herein, is expected. Ohio EPA will monitor such compliance. Ohio EPA expressly reserves the right to take action, pursuant to chapters 3734. and 6111. of the Ohio Revised Code, and other applicable law, to enforce such compliance and to seek appropriate remedies in the event of noncompliance with the provisions and modifications of this Approved Closure Plan. Please be advised that approval of this closure plan does not release Preferred Airparts, LLC from any responsibilities regarding corrective action for all releases of hazardous waste or constituents from any waste management unit, regardless of the time at which waste was placed in the unit.

You are hereby notified that this action of the Director is final and may be appealed to the Environmental Review Appeals Commission pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the Commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00, made payable to "Ohio Treasurer Kevin Boyce," which the Commission, in its discretion, may reduce if by affidavit you demonstrate that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests that a copy of the appeal be served upon the Ohio Attorney General's Office, Environmental Enforcement Section. An appeal may be filed with the Environmental Review Appeals Commission at the following address:

Environmental Review Appeals Commission
309 South Fourth Street, Room 222
Columbus, Ohio 43215

When closure is completed, OAC rule 3745-55-15 requires the owner or operator of a facility to submit to the Director of Ohio EPA, certification by the owner or operator and an independent, registered professional engineer, that the facility has been closed in

accordance with the approved closure plan. The certification by the owner or operator shall include the statement found in OAC rule 3745-50-42(D). These certifications should be submitted to:

Jeremy A. Carroll, P.E., Manager
Ohio Environmental Protection Agency
Division of Hazardous Waste Management
Regulatory and Information Services Section
P.O. Box 1049
Columbus, Ohio 43216-1049

A copy should also be sent to:

Ohio Environmental Protection Agency
Division of Hazardous Waste Management
Neil Wasilk
Northeast District Office
2110 East Aurora Road
Twinsburg, Ohio 44087

Ohio EPA's Division of Hazardous Waste Management strongly encourages you to consider pollution prevention options for any processes at your facility that generate waste. While implementation of pollution prevention options is not required by Ohio laws and regulations, the application of waste minimization practices may help reduce the expense of remedial activities. Additionally, implementation of pollution prevention options may prevent the creation of new units and as a result eliminate the requirement to submit a closure plan in the future. For assistance in identifying and implementing pollution prevention options or if you have any questions about implementing this closure plan, contact Neil Wasilk at (330) 425-9171.

Sincerely,

Chris Korleski
Director
