

John R. Kasich, Governor
Mary Taylor, Lt. Governor
Craig W. Butler, Director

October 8, 2014

Dear Air Services User:

Please click this link to [see the letter from Ohio Environmental Protection Agency \(Ohio EPA\) Director Craig Butler](#) outlining Agency plans to rotate staff facility assignments. The purpose of rotating staff is to make sure we are doing our job in a fair and responsible way and to provide you with the best customer service. We believe staff rotation will enhance the uniformity of our inspection while also providing new perspectives and ideas, greatly improving the effectiveness of our efforts.

For the Division of Air Pollution Control, this means that inspections will no longer be performed by the same individual, but other district and local air agency staff will also participate in the inspections. No person will inspect your facility for more than five years.

In the permitting area, the permit writer will be responsible for no more than one permit cycle or a five-year period for Title V sources. To improve continuity, the existing permit writer will hand off or assist the new permit writer with the renewal permit.

Overall, this change will benefit both facilities and the Agency by establishing backups in the event of an unexpected departure of an employee or some other change.

Please let me know if you have any questions or concerns.

Central District Office	Kelly Toth	(614) 728-3778
Northeast District Office	Ed Fasko	(330) 963-1161
Northwest District Office	Mark Budge	(419) 352-8461
