RE: COUNTYWIDE RECYCLING AND DISPOSAL FACILITY (RDF), STARK COUNTY OHIO ADMINISTRATIVE CODE (OAC) RULE 3745-27-10(D)(7)(c)(ii) APPROVAL

Dear Mr. Vandersall:

On February 5, 2013, the Ohio Environmental Protection Agency (Ohio EPA), Division of Materials and Waste Management (DMWM), Northeast District Office (NEDO) received a document titled *2012 Second Semiannual Ground Water Monitoring OAC Rule 3745-27-10(D)(7)(c)(ii) Demonstration* dated January 31, 2013, for the Countywide RDF (Facility) located in Stark County. This document was submitted by Eagon and Associates on behalf of Republic Services of Ohio II, LLC, and contains the ground water sampling results and the statistical analysis from the October/November 2012 ground water sampling event at the Facility.

According to the document, analysis of the ground water detection monitoring data indicated that the following statistically significant changes were detected: chloride in MW-101A; chloride in MW-104B; selenium in MW-110A; potassium in MW-113A; ammonia, potassium and sodium in MW-114A; potassium and sodium in MW-116A; cobalt, nickel, potassium, and zinc in MW-117A; chloride in MW-118B; potassium in MW-121A; and, sodium in MW-121.

Verification sampling was performed on November 19, 2012. Analysis of the re-sampling data demonstrated that the statistically significant changes for selenium in MW-110A and chloride in MW-118B were false positives. Therefore, the following monitoring wells were automatically returned to the detection monitoring program pursuant to OAC Rule 3745-27-10(D)(7)(c)(i) for the initial SSDs in the October/November 2012 sampling event: MW-110A and MW-118B. Ohio EPA acknowledges the return of these wells to the detection monitoring program. However, the re-sampling data verified the statistically significant changes for chloride in MW-101A; chloride in MW-104B; potassium in MW-113A; ammonia, potassium and sodium in MW-114A; potassium and sodium in MW-116A; cobalt, nickel, potassium, and zinc in MW-117A; potassium in MW-121A; and, sodium in MW-121.

Pursuant to OAC Rule 3745-27-10(D)(7)(c)(ii), the owner or operator may demonstrate that a source other than the sanitary landfill facility caused the contamination, or that the statistically significant change resulted from error in sampling, analysis, or statistical evaluation or natural variation in ground water quality. A report documenting this demonstration must be submitted to and approved by Ohio EPA. If the owner or operator does not obtain approval to continue detection monitoring within two hundred ten (210) days from initial sampling, the owner or operator is required to comply with the provisions of OAC Rule 3745-27-10(E) for ground water quality assessment monitoring.

The January 31, 2013, document concluded that the statistically significant changes for chloride in MW-101A; chloride in MW-104B; potassium in MW-113A; ammonia, potassium and sodium in MW-114A; potassium and sodium in MW-116A; cobalt, nickel, potassium, and zinc in MW-117A; potassium in MW-121A; and, sodium in MW-121 were due to natural and spatial variation within the uppermost aquifer system (UAS) and the significant zone of saturation (SZS), statistical analyses, and/or a source other than the landfill and not as a result of impact from the landfill. Monitoring wells MW-101A, MW-104B, MW-113A, MW-114A, MW-116A, MW-117A, MW-121A, and MW-121 were initially sampled on October 8, 2012.

Ohio EPA has reviewed the applicable information and concurs with the demonstration included in the January 31, 2013, document for monitoring wells MW-101A, MW-104B, MW-113A, MW-114A, MW-116A, MW-117A, MW-121A, and MW-121. Therefore, pursuant to OAC Rule 3745-27-10(D)(7)(c)(ii), the owner or operator is hereby authorized to continue the detection monitoring program at the Facility for monitoring wells MW-101A, MW-104B, MW-113A, MW-114A, MW-116A, MW-117A, MW-121A, and MW-121.

Should future or existing ground water sampling results indicate statistically significant changes in ground water monitoring parameters, the owner or operator will be required to either enter into assessment monitoring in accordance with OAC Rule 3745-27-10(E) or obtain approval to remain in the detection monitoring program.

You are hereby notified that this action of the Director is final and may be appealed to the Environmental Review Appeals Commission pursuant to ORC Section 3745.04. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. The appeal must be filed with the commission within thirty (30) days after notice of the Director's action. The appeal must be accompanied by a filing fee of \$70.00, made payable to "Treasurer, State of Ohio." The Commission, in its discretion, may reduce if by affidavit you demonstrate that payment of the full amount of the fee would cause extreme hardship. Notice of the filing of the appeal shall be filed with the Director within three (3) days of filing with the Commission. Ohio EPA requests
