**Re: Wyandot Sanitary Landfill, Wyandot County
Ohio Administrative Code (OAC) Rule 3745-27-10(D)(7)(c) Authorization**

Dear Mr. Gehle:

The Ohio Environmental Protection Agency (Ohio EPA) received a ground water demonstration, dated June 18, 2002, from Wyandot Sanitary Landfill. This demonstration was submitted due to a statistically significant increase of chloride in monitoring wells RW-1, RW-10, SW-9, and SW-10, which occurred during the first semi-annual sampling event for year eight, dated April 3-5, 2002, at the Wyandot Sanitary Landfill.

Pursuant to Ohio Administrative Code (OAC) Rule 3745-27-10(D)(7)(c), the owner or operator may demonstrate that a source other than the facility caused the contamination, or the increase resulted from error during sampling, analysis, or evaluation, or natural variation in the groundwater. The June 18, 2002, demonstration concluded that the statistically significant increase of chloride in the monitoring wells was due to a source other than the landfill.

Ohio EPA concurs with the demonstration and approves continuation of the detection monitoring program in accordance with OAC Rule 3745-27-10(D)(7)(c) for the wells and parameter specified above.

Should future or existing ground water sampling indicate statistically significant increase in ground water quality for other parameters, the facility owner/operator will be required to enter into assessment monitoring in accordance with OAC Rule 3745-27-10(E), or obtain similar approval to remain in detection monitoring.

You are hereby notified that this action of the Director of Environmental Protection is final and may be appealed to the Environmental Review Appeals Commission (Commission) pursuant to Ohio Revised Code Section 3745.04.
