\* Chemical that drives the advisory.

# The Tuscarawas River had a one meal per month fish advisory due to hexachlorobenzene through 2005. Data collected in 2004 indicate that, although some hexachlorobenzene is still found in fish from the Tuscarawas River, the levels are not a threat to human health if one meal per week or less is consumed.

^ The Middle Fork Little Beaver Creek had a Do Not Eat fish advisory due to mirex through 2006. Data collected from 1998 through 2004 indicate that, although some mirex is still found in fish in the Middle Fork Little Beaver Creek, the levels are no longer high enough to require a no consumption advisory. All fish in Middle Fork Little Beaver Creek should be consumed no more than once a week, as some species still contain mirex.
