

**Attachment 1: Log Form for Land Application of Hydro-demolition Wastewater**

Date:	Time Start:	Time Stop:	Field Conditions:
Wastewater source:	Applicator name:	Acres applied upon today (not total acreage):	
Method of Application:	Date and time of most recent forecast check (attach forecast document):	Planned rate (gal/acre):	Visual inspection to determine that water is clear prior to land application?
Show location of application site below (an 8 1/2 " x 11" cut sheet with the land application area should be attached):		Actual rate (gal/acre):	

--

Comments/problems:
--------------------

Name of individual filling out this form:
---

	Day 1 (application day):	Day 2:
Actual precipitation in inches:		

**Be sure to attach at least one printout of forecast to this record form.**

## **Log Form Instructions**

**Date:** Enter the date that land application of hydro-demolition wastewater took place.

**Time start:** Enter the time that land application of hydro-demolition wastewater began.

**Time stop:** Enter the time that land application of hydro-demolition wastewater ended.

**Field conditions:** Describe what the field conditions were at the time land application commenced.

**Wastewater source:** Describe where the hydro-demolition wastewater came from.

**Applicator name:** Write down the name of the individual(s) who performed the land application of the hydro-demolition wastewater.

**Acres applied upon today:** Enter the acreage utilized for land application of hydro-demolition wastewater.

**Method of Application:** Describe how the hydro-demolition wastewater was applied.

**Show location of application site below:** Attach a map showing the location of the land application in the space provided. **Setbacks and catch basins should be clearly marked.**

**Date and time of most recent forecast check:** Indicate the date and time that the weather forecast was checked prior to land application. Attach a print-out of the weather forecast to the log.

**Planned application rate:** Enter the rate that was proposed to be used for land application of wastewater.

**Actual application rate:** Enter the actual rate at which wastewater was land-applied.

**Visual inspection to determine that water is clear:** Indicate “yes” or “no” that the wastewater was monitored prior to being land-applied to ensure that the water was clear.

**Name of individual filling out this form:** Enter the name of the person who filled out the land application log form.

**Comments/problems:** List any comments or problems regarding the land application.

**Actual precipitation in inches:** List the actual amount of rain which fell at the land application site on the day of land application activities and one day after land application activities.
