<sup>1</sup> Design flows that are greater than 1.0 million gallons per day (MGD) classify a facility as a major discharger.

<sup>2</sup> The first letter indicates the number of permit cycles that have occurred for the facility, where “A” represent the first and “B” represents the second and so on. Permit cycles typically occur over five year time periods.

<sup>3</sup> This facility has ceased to operate. It will be issued a “no permit required” notice in the future.
