RE: COUNTYWIDE RDF, STARK COUNTY
OAC RULE 3745-27-10(C)(7)(g) APPROVAL

Dear Mr. Vandersall:

The Ohio EPA Division of Solid and Infectious Waste Management (DSIWM) Northeast District Office (NEDO) received a document from Countywide RDF (Facility) titled *Statistical Analysis Program, Revision 2 (Statistical Analysis Program) for Groundwater Quality Monitoring*. It is dated May 2008 and was received at NEDO on June 4, 2008.

The revised document was submitted to Ohio EPA as an OAC Rule 3745-27-10(C)(7)(g) request to update background data at the Facility's groundwater monitoring wells. Historically the statistical analysis of groundwater monitoring data acquired at the Facility had indicated the presence of statistically significant differences. As provided by OAC Rule 3745-27-10(D)(7)(c)(ii), the Facility has demonstrated that an alternate source (natural/spatial variability and/or artifact of statistical analysis applied) was responsible for the initial statistically significant differences and that the initial statistically significant differences were false positives.

Pursuant to Ohio Administrative Code (OAC) Rule 3745-7-10(C)(7)(g), background data can only be added in blocks of data resulting from the analysis of four or more statistically independent samples after the data have been statistically compared to current background data and no statistical differences are detected, unless another method is deemed acceptable by the director.

Ohio EPA has reviewed the information provided and concurs that this data can be added to the background data group. Therefore, pursuant to OAC Rule 3745-27-10(C)(7)(g), the Facility is hereby authorized to update the background database as detailed in the May 2008 document.
