

Appendix U - District Rules

A. Existing Rules

Identify each provision in ORC Section 343.01(G) for which the SWMD is currently authorized to adopt rules

- Prohibiting or limiting the receipt of waste generated outside the SWMD;
- Governing the maintenance, protection, and use of solid waste collection, transfer, disposal, recycling, or resource recovery facilities;
- Governing a program to inspect out-of-state waste; and
- Exempting an owner or operator of a solid waste facility from compliance with local zoning requirements

Include the actual language of each SWMD rule that is current in effect and the date(s) when the rules were adopted.

B. Proposed Rules

List all areas of ORC Section 3734.53(C) that the policy committee authorizes the SWMD to adopt rules for during the planning period covered by this solid waste management plan. In addition, include the language of any proposed rules that will be adopted after Ohio EPA approves this solid waste management plan.

[NOTE: Even after Ohio EPA approves a solid waste management plan that authorizes a SWMD to adopt rules and/or contains proposed rules, the board of directors must still go through the process of adopting the rules. Approval of the solid waste management plan does not enact the rules. Once Ohio EPA approves the updated solid waste management plan, the board of directors must proceed with formal rule-making procedures at the local level. These procedures usually include providing a public comment period, holding a public hearing, and having the board of county commissioners/board of directors/board of trustees adopt a resolution that puts the rules into effect.]
