

Wastewater Treatment and Compliance Assistance

Working with local wastewater treatment staff to help identify, troubleshoot and resolve operational issues affecting performance and compliance.

Free Onsite Assistance

The WWTP Compliance Assistance Unit (CAU) is a non-regulatory program within the Division of Environmental and Financial Assistance (DEFA).

Many plants not only achieve compliance, but also lower their operating costs as a result of implementing the program's recommendations.

Services

- Evaluate treatment systems to identify causes of compliance issues.
- Troubleshoot complex operational issues.
- Help calculate current plant loadings and capacities and assess impacts of inflow and infiltration.
- Investigate impacts of industrial dischargers on the system.
- Recommend innovative and cost-effective solutions for improving performance.
- Recommend improvements for sludge handling and disposal.
- Assist in developing and implementing preventive maintenance programs.
- On-site training of personnel in process control procedures.

Cooperation and Partnership

We recommend improvements.

You decide the plan of action.
