Perchloroethylene Dry Cleaning Facility

Ohio Consolidated Report Form

Fulfills reporting requirements for:

Initial Notification Report

Compliance Report for Control Requirements

Compliance Report for Pollution Prevention

Required by 40 CFR Part 63, Subpart M

Submit completed original and two copies of this form by Registered Mail to:

Perc Dry Cleaner Ohio Consolidated Report

(Fulfills the Initial Notification Report, Compliance Report for Control Requirements, and Compliance Report for Pollution Prevention required by 40 CFR 63, Subpart M)

1. Print or type the following for each separately located dry cleaning plant (facility). The owner of more than one plant must fill out a separate form for each plant.

   Owner/Operator______________________________________________________________

   Company Name___________________________________________________________

   Mailing Address____________________________________________________________________

   City__________________________ State________________ Zip_______________________

   Plant Address (If Different Than Mailing Address)

   Street Address____________________________________________________________________

   City__________________________ State________________ Zip_______________________

   Phone Number________________________ E-mail______________________________

2. Check the box below if:

   ☐ your dry cleaner is a pick-up store.

   ☐ your dry cleaning plant has only coin-operated dry cleaning machines that are operated by the customers.

   If you checked either box above, you can STOP HERE and return the form to the address given in the accompanying letter.

3. Write in the total volume of perchloroethylene (perc) purchased for ALL of the machines at the dry cleaning plant over the past 12 months:

   _______________ gallons

   NOTE: If this is a new plant or if perchloroethylene purchase records have not been kept at the plant, the volume may be estimated for this initial report.

   Method of determining gallons (circle one):

   actual __________ estimated __________

4. Next to each machine type listed below, write the number of machines of that type located at your plant:

   _____ Dry-to-Dry       _____ Transfer
5. Provide the following information for EACH MACHINE at your plant. If you have more than 4 machines at your plant, make additional copies of this page.

<table>
<thead>
<tr>
<th>Machine Type (Circle One)</th>
<th>Machine 1</th>
<th>Machine 2</th>
<th>Machine 3</th>

</table>

6. If you listed a required control in Question 5 for any machine at your plant, you must monitor your control. To find out what type of monitoring is required, check all boxes that apply:

- I use a refrigerated condenser on a dry-to-dry machine to meet the required control.
  
  *If you checked this box, you are required to perform a weekly monitoring test to show that the temperature on the outlet side of the refrigerated condenser is less than or equal to 45 degrees Fahrenheit.*

- I use a refrigerator condenser on a transfer machine to meet the required control.
  
  *If you checked this box, you are required to perform a weekly monitoring test to show that the temperature on the outlet side of the refrigerated condenser on the transfer dryer is less than or equal to 45 degrees Fahrenheit AND that the difference between the inlet and the outlet temperature of the refrigerated condenser on the transfer washer is greater than or equal to 20 degrees Fahrenheit.*

- I use a carbon adsorber on a dry-to-dry or a transfer machine to meet the required control, OR
  
  I use a supplemental carbon adsorber on a dry-to-dry machine and the exhaust passes through the carbon adsorber IMMEDIATELY UPON door opening.

  *If you checked either of the two boxes above, you are required to perform a weekly monitoring test with a colorimetric detector tube to show that the concentration of perc in the exhaust from the carbon adsorber is not over 100 parts per million.*
☐ I use a supplemental carbon adsorber on a dry-to-dry machine and the exhaust passes through the carbon adsorber BEFORE the machine door is opened.

*If you checked this box, you are required to perform a weekly monitoring test with a colorimetric detector tube to show that the concentration of perc inside the dry cleaning machine drum at the end of the drying cycle is not over 300 parts per million.*

☐ I use a room enclosure on a transfer machine.

*If you checked this box, you are required to vent all air from inside the room enclosure through a carbon adsorber. The room enclosure must be constructed of materials impermeable to perc, must be designed and operated to maintain a negative pressure at all times while the transfer is operating, and must exhaust to a carbon adsorber.*

7. If a room enclosure is installed on a transfer machine as stated in Question 6, the following information about the room enclosure must be attached to this report.

- Description of the materials that the room enclosure is constructed of to show that it is impermeable to perchloroethylene, and

- Explanation of how the room enclosure is operated to maintain a negative pressure at all times while the transfer machine is operating.

- Explanation of how the room enclosure exhausts into a carbon adsorber.

8. The following pollution prevention practices must be performed at your plant beginning at startup.

- Conduct a weekly leak detection and repair program to inspect all dry cleaning equipment for leaks that are obvious from sight, smell, or touch. NOTE: This program is required every other week if you wrote NO CONTROL REQUIRED in the shaded box in Question 5.

- Repair leaks within 24 hours after they are found, or order repair parts within 2 working days after detecting a leak that needs repair parts. Install the repair parts by 5 working days after they are received.

- Keep a log of the weekly (or biweekly) results of the leak detection and repair program.

- Follow good housekeeping practices, which include keeping all perc and wastes containing perc in covered containers with no leaks, draining cartridge filters in closed containers, and keeping machine doors shut when clothing is not being transferred.

- Operate and maintain all dry cleaning equipment according to manufacturers’ instructions.

9. The following records must be kept at your plant:

- A log of the results of the leak detection and repair program.

- A log of the amount of perc purchased for the past 12 months, calculated each month.

- The operation and maintenance manuals for all dry cleaning equipment at the plant.
10. I, the undersigned, as the Responsible Official of this dry cleaning facility certify that the information contained in this report is accurate and true to the best of my knowledge.

A Responsible Official can be:

- The president, vice president, secretary, or treasurer of the company that owns the dry cleaning plant,
- An owner of the dry cleaning plant,
- The manager of the dry cleaning plant, or
- A government official if the dry cleaning plant is owned by the Federal, State, City, or County government.
- A ranking military officer if the dry cleaning plant is located at a military base.
WORKSHEET for Question #5

A. To find out if control is required:

Check all boxes that apply:

☐ I reported less than 140 gallons in Question 3.
☐ I reported less than 200 gallons in Question 3 AND reported only transfer machines in Question 4.

If you checked either box above and all your machines were installed before 12/9/91, you can STOP HERE. Write NO CONTROL REQUIRED in the shaded box on page 2 for each machine at your plant that was installed before 12/9/91. For those machines installed on or after 12/9/91, continue with the rest of the worksheet.

YOU ARE FINISHED WITH THE WORKSHEET. GO TO QUESTION 6.

If you did not check a box above, go to Part B below.

B. Control is required. Fill out Part B for EACH MACHINE at your plant.

Check the appropriate box below:

☐ Machine was installed BEFORE 12/9/91.

If you checked this box, your required control is a refrigerated condenser or a carbon adsorber that was installed before 9/22/93. Write REFRIGERATED CONDENSER or CARBON ADSORBER in the shaded box below the machine in Question 5. Control must be installed by 9/22/96.

☐ Machine was installed ON OR AFTER 9/22/93.

If you checked this box, your required control is a dry-to-dry machine with refrigerated condenser.

Write DRY-TO-DRY MACHINE WITH REFRIGERATED CONDENSER in the shaded box below the machine in Question 5. NOTE: NO NEW OR USED TRANSFER MACHINES CAN BE INSTALLED AFTER 9/22/93. Control must be installed when machine is installed.

☐ Machine was installed ON OR AFTER 12/9/91 AND BEFORE 9/22/93 and is a dry-to-dry machine.

If you checked this box, your required control is a dry-to-dry machine with refrigerated condenser. Write DRY-TO-DRY MACHINE WITH REFRIGERATED CONDENSER in the shaded box below the machine in question 5.

If the machine you have is NOT a dry-to-dry machine with a refrigerated condenser, the machine must use either a refrigerated condenser or carbon adsorber from 9/22/93 until 9/22/96. On or after 9/22/96, any carbon adsorbers on dry-to-dry machines must be replaced with a refrigerated condenser.
If the machine is a transfer machine with a carbon adsorber or a refrigerated condenser, you may keep this installation until 9/22/96. If you plan to keep a dry-to-dry machine with a carbon adsorber or a transfer machine with either a refrigerated condenser or carbon adsorber until 9/22/96, also write this information in the shaded box.

C. To find out if additional control is required:

Check all boxes that apply:

□ I reported 1,800 gallons or less in Question 3.

□ I reported 2,100 gallons or less in Question 3 AND I reported only dry-to-dry machines in Question 4.

If you checked either box above, you can STOP HERE. No additional controls are required.

YOU ARE FINISHED WITH THE WORKSHEET. RETURN TO QUESTION 5 and write in the dates the controls were or will be installed.

If you did not check a box above, go to Part D below.

D. If additional control is required, fill out Part D for EACH machine at your plant:

Check a box below, if it applies:

□ Machine is a dry-to-dry machine that was installed ON or AFTER 12/9/91.

If you checked this box, you are also required to install a supplemental carbon adsorber.

Write SUPPLEMENTAL CARBON ADSORBER in the shaded box below the machine in Question 5.

□ Machine is a transfer machine.

If you checked this box, you are also required to install a room enclosure. Write ROOM ENCLOSURE in the shaded box below the machine in Question 5.

YOU ARE FINISHED WITH THE WORKSHEET. RETURN TO QUESTION 5 and write in the dates all controls were or will be installed.
GOOD HOUSEKEEPING PRACTICES

- Conduct a weekly leak detection and repair program to inspect all dry cleaning equipment for leaks that are obvious from sight, smell, or touch. Note: This program is required every other week if you are not required to install control.

- Repair leaks within 24 hours after they are found, or order repair parts within 2 working days after detecting a leak that needs repair parts. Install the repair parts by 5 working days after they are received.

- Keep a log of the weekly (or biweekly) results of the leak detection and repair program.

- Follow good housekeeping practices, which include keeping all PERC and wastes containing PERC in covered containers with no leaks, draining cartridge filters in closed containers, and keeping machine doors shut when clothing is not being transferred.

- Operate and maintain all dry cleaning equipment according to manufacturers’ instructions.

REQUIRED RECORDS

- A log of the results of the leak detection and repair program.

- A log of the amount of PERC purchased for the past 12 months, calculated each month.

- The operation and maintenance manuals for all dry cleaning equipment at the plant.
