The purpose of this rulemaking is to propose new rules, rule amendments, and rule rescissions to match the Ohio Hazardous Waste Management rules to recent amendments to their federal counterpart rules in 40 CFR Parts 260, 261, 262, 263, 264, 265, 266, 268, 270, 273, and 279 under the Federal Resource Conservation and Recovery Act (RCRA), as those federal rules were promulgated in the Federal Registers (FR) shown below. Ohio statute requires Ohio's rules to be equivalent to their federal counterpart regulations. This rulemaking also accomplishes the required 5-year review of a number of the Ohio rules in this rulemaking.

These rules address Hazardous Waste Management rules. The FRs listed below created, rescinded, or amended the federal RCRA counterpart regulations that correspond to the Ohio rules listed in this notice.

Ohio EPA has proposed amended, rescinded, and new Hazardous Waste Management Program rules to achieve consistency with U.S. EPA's RCRA Subtitle C Program and increase regulatory flexibility. For example, the proposed rules allow, under certain conditions, consolidation of Very Small Quantity Generator waste at a Large Quantity Generator and episodic generation. The proposed rulemaking improves hazardous waste risk communication and ensures that emergency management requirements meet today's needs.

The Generator Improvements rules include reorganization of the generator regulations, improving readability for the regulated community.

The Management Standards for Hazardous Waste Pharmaceuticals is composed of three main concepts: streamlined standards for handling hazardous waste pharmaceuticals; a prohibition on sewerage hazardous waste pharmaceuticals, which is already in effect in Ohio; and, the nicotine waste listing (P075) will be amended to no longer include FDA-approved over-the-counter nicotine replacement therapies, reducing the burden of managing these types of nicotine wastes.

The Safe Management of Recalled Airbags rules address the public health issue posed by recalled Takata airbag inflators still installed in vehicles. These rules expedite the removal of defective Takata airbag inflators from vehicles and direct this waste for safe and environmentally sound disposal. These rules consist of conditions that must be met to remain exempt from hazardous waste requirements.

There are several other subjects of Federal rulemaking that are addressed in this Ohio rule proposal to achieve consistency between U.S. EPA's RCRA Subtitle C Program and the Ohio Hazardous Waste Program; see the public notice for a complete list.

Comments on the proposed rules must be received by 5:00 p.m. on August 17, 2020. For information on the virtual public hearing and comment submittal, see the public notice.
