Director's Final Findings and Orders

PREAMBLE

It is agreed by the parties hereto as follows:

I. JURISDICTION

These Director's Final Findings and Orders (Orders) are issued to Bramhi, Inc. (Respondent) pursuant to the authority vested in the Director of the Ohio Environmental Protection Agency (Ohio EPA) under Ohio Revised Code (ORC) §§ 3734.13 and 3745.01.

II. PARTIES BOUND

These Orders shall apply to and be binding upon Respondent and successors in interest liable under Ohio law. No change in ownership of Respondent or of the Facility shall in any way alter Respondent's obligations under these Orders.

III. DEFINITIONS

Unless otherwise stated, all terms used in these Orders shall have the same meaning as defined in ORC Chapter 3734, and the rules promulgated there under.

I certify this to be a true and accurate copy of the official documents as filed in the records of the Ohio Environmental Protection Agency.

IV. FINDINGS

The Director of Ohio EPA has determined the following findings:

1. Respondent owns and operates a business that processes and sells coal for residential and commercial purposes and is located at 17987 State Route 124, Jackson County, Wellston, Ohio (Facility).

2. Respondent is a “person” as defined in ORC § 3734.01(G) and OAC rule 3745-50-10(A) and is authorized to do business in Ohio.

3. On March 21, 2008, Ohio EPA was notified of a fire at the Facility. Ohio EPA subsequently conducted an investigation at the Facility and observed an area where nine 55-gallon drums containing unknown materials had been burned. Ohio EPA also observed an additional location where drums had been burned that appeared to contain similar materials.

4. Ohio EPA collected samples in both locations to determine if the wastes which had been burned were hazardous waste. Analytical results from the samples indicated that waste in the area where the nine 55-gallon drums were burned contained waste which was hazardous waste due to chromium toxicity (D007).

5. Based on the results of the investigation and sampling, Ohio EPA determined that the Respondent had, *inter alia*;

   a. Unlawfully treated and disposed of waste which was hazardous waste due to chromium toxicity (D007), by burning the waste in drums, without a permit, in violation of ORC § 3734.02(E) and (F); and

   b. Failed to evaluate wastes to determine if they are hazardous wastes, in violation of OAC rule 3745-52-11.

6. On May 7, 2008, Ohio EPA personnel removed the hazardous waste D007 and visible contamination from the ground in the vicinity of the burned drums, placed it into a 55-gallon drum, and labeled the drum, “D007 hazardous waste.” This area of contamination was located on “coal fines” which are produced at the Facility as a result of the mechanized processing of larger pieces of coal into smaller sizes. Ohio EPA personnel
collected a composite sample from the excavation where the hazardous waste D007 and coal fines were removed. The analytical results from this composite sample indicated that no detectable levels chromium remained in the area where the hazardous waste D007 was released.

7. Respondent was notified of the violations in Finding No. 5. by letter from Ohio EPA dated June 17, 2008. In this letter, Ohio EPA also notified Respondent that due to the unpermitted treatment and disposal of hazardous waste, Respondent was in violation of the land disposal restriction requirements in OAC rule 3745-270-07(A) and 3745-270-09(A).

8. Based on the information in Finding No. 5.a., the Director has determined Respondent failed to comply with the general waste analysis requirements, in violation of OAC rule 3745-54-13.

10. Respondent was issued generator identification number OHR000149674 to ship the D007 hazardous waste from its Facility.

11. On July 18, 2008, the drum of D007 hazardous waste referenced in Finding No. 6. was shipped off-site to a permitted hazardous waste facility in accordance with Chapter 3734. of the ORC. Therefore, the Director has determined no further action is required of Respondent to abate the violations of OAC rules 3745-270-07(A), 3745-270-09(A) and 3745-54-13 referenced in Finding Nos. 7. and 8. of these Orders.

12. Because the analytical results from the sample collected by Ohio EPA and referenced in Finding No. 6. indicate that the D007 hazardous waste has been removed from the area where the drums were burned, the Director has determined that it is unnecessary to reserve closure for this area and that no further action is required of Respondent to abate the violation of ORC § 3734.02(E) and (F) referenced in Finding No. 5.a. of these Orders.
