\* OAC rules 3745-279-70 to 3745-279-75 apply to used oil marketers. Any person subject to the marketer requirements must also comply with one of the following:

1. used oil generator requirements;
2. used oil transporter/transfer facility requirements;
3. used oil processor and re-refiner requirements; or
4. used oil burner requirements.

Therefore, rules concerning storage, labels, secondary containment, release response and closure are only applicable to marketers through the other handler requirements.
