What is the purpose of this index?

This document contains an alphabetical listing of the water bodies designated in rules 08 to 32 of Chapter 3745-1 of the Administrative Code (Ohio Water Quality Standards). Rules 08 to 30 designate beneficial uses for water bodies in the 23 major drainage basins in Ohio. Rule 31 designates beneficial uses for Lake Erie. Rule 32 designates beneficial uses for the Ohio River. This document is updated whenever those rules are changed.

Use this index to find the location of a water body within rules 08 to 32. For each water body in this index, the water body into which it flows is listed along with the rule number and page number within that rule where you can find its designated uses.

How can I use this index to find the use designations for a water body?

For example, if you want to find the beneficial use designations for Allen Run, find Allen Run on page 1 of this index. You will see that there are three Allen Runs listed in rules 08 to 32. If the Allen Run you are looking for is a tributary of Little Olive Green Creek, go to page 6 of rule 24 to find its designated uses. If you don't know what water body your Allen Creek is a tributary of, you can refer to the maps in the appendices to rules 08 through 30. The three Allen Creeks listed on page 1 of this index are in rules 24, 13 and 12. Use the state map in the appendix to rule 08 and the basin maps in the appendices to rules 08 to 30 to identify which rule contains the particular Allen Run for which you are searching.

Anderson Run is listed twice in the same rule (rule 13). How do I find the use designations for my Anderson Run?

If you don't know whether the Anderson Run you are searching for is a tributary of Captina Creek or Neffs Run, go to the pages in rule 13 on which the Anderson Runs are listed and try to determine which is your Anderson Run based on water bodies listed nearby. The water bodies in rules 08 to 30 are ordered from downstream to upstream and tributaries of a water body are indented.

What if the water body I'm looking for isn't listed in the index?

Lakes, beaches and areas near drinking water intakes carry certain use designations by definition. See rule 3745-1-07 for details. For all other water bodies not listed in this index, there are no specific designated uses. Note, however, that the chemical criteria for the protection of human health, aquatic life (warmwater), and wildlife apply to undesignated water bodies.

What if I have trouble finding the use designations for a water body?

If you have trouble finding the use designations for a water body, or if you have any questions about use designations, contact Chris Skalski at (614) 644-2144.
