<sup>1</sup> Design flows that are greater than 1.0 million gallons per day (MGD) classify a facility as a major discharger.

<sup>2</sup> Average flow is based upon data reported from 2006 through 2010.

<sup>3</sup> The first letter indicates the number of permit cycles that have occurred for the facility, where "A" represent the first and "B" represents the second and so on. Permit cycles typically occur over five year time periods.
