Introduction

The Sewer and Water Rate Survey's central purpose is to collect and publish Ohio residential sewer and water rates. Year 2003 rates were collected from the twentieth annual Sewer and Water Rate Survey, conducted by the Ohio Environmental Protection Agency. Ohio EPA sent survey questionnaires to 558 municipalities and districts and received 407 responses (73%).

The 2003 Sewer and Water Rate Survey also gathered information regarding the following:

- Sewer tap-in fees.
- Water tap-in fees.
- Number and type of public drinking water employees.

Historic survey data and sewer and water rates for over 500 cities, villages and districts during the 1984-2003 periods are available online at Ohio EPA's Office of Fiscal Administration web page located at <http://www.epa.state.oh.us/ofa/>.

Contact economic.analysis@epa.state.oh.us to receive a copy of the survey by e-mail. Or call Ohio EPA, Office of Fiscal Administration, Economic Analysis Unit at 614-644-3760 to receive a hard copy or request additional information.

Sewer and Water Rate Calculations

Sewer and water charges usually depend on consumption measured in gallons or cubic feet, and are billed monthly, bimonthly or quarterly. In order to standardize sewer and water rates across Ohio and to allow for comparisons among systems, the 2003 Sewer and Water Rate Survey presents rates calculated for an assumed level of consumption.

Annual rates were calculated for residential customers within municipal limits, assuming that a household consists of three (3) people individually consuming 85 gallons of water each day. Community annual sewer and water rate calculations assumed one of the following as the average water consumption per household:

- 7,756 gallons per month (1,037 cubic feet per month)
- 23,268 gallons per quarter (3,111 cubic feet per quarter)

The rates in Appendices 2 and 3 include charges levied for direct use of sewer and water systems. Charges unrelated to sewer and water use, such as income and property taxes, have not been included in rate calculations. Information about other revenue sources has been noted in the appendices, when available.

Actual sewer and water charges for individual households will be higher (or lower) than those listed in Appendices 2 and 3 for those households with average, metered water use more (or less) than 7,756 gallons per month.

Tap-in Fees

Appendix 4 contains the sewer and water tap-in fees submitted by respondents for residential customers inside and outside municipal limits. The fees are generally presented as they were reported on the questionnaires, without correction or interpretation. As a result, they may not be comparable across communities.

For example, several systems' tap-in charges included labor and materials for tap installation. Whereas, other systems charged only an administrative fee, but a customer also would have paid a private contractor for the lines and taps. In other cases, tap-in fees were a source of revenue for debt repayment or a mechanism for new customers to pay toward the capital cost of the existing system.

Sewer Rates

The 2003 average annual residential sewer rate in Ohio was \$399, a 3.6% increase over 2002. Half of all sewer systems charged rates lower than \$381 per year. Table 1 shows annual sewer rate averages for 1983 through 2003, along with the percentage change in average rates and the consumer price index (CPI-U: Midwest urban prices for all items). Figure 1 displays average annual sewer rate data and a trend line adjusting the base year (1984) average sewer rate for inflation. Figure 2 displays the range of sewer rates charged by communities.

Water Rates

The 2003 average annual residential water rate in Ohio was \$371, a 5.7% increase over 2002. Half of all water systems charged rates lower than \$343. Table 2 displays annual water rate data for 1984 through 2003, along with the percentage change in average rates and the consumer price index (CPI-U: Midwest urban prices for all items). Figure 3 displays average annual water rate data and a trend line adjusting the base year (1985) average water rate for inflation. Figure 4 displays the range of water rates charged by communities in 2003.
