Introduction

The Sewer and Water Rate Survey's central purpose is to collect and publish Ohio residential sewer and water rates. Year 2006 rates were collected from the twenty-third annual Sewer and Water Rate Survey, conducted by the Ohio Environmental Protection Agency. Ohio EPA sent survey questionnaires to 566 municipalities and districts and received 432 responses (76%).

The 2006 Sewer and Water Rate Survey also gathered information regarding the following:

- Water System Expenses

Historic survey data and sewer and water rates for over 500 cities, villages and districts during the 1984-2006 periods are available online at Ohio EPA's Office of Fiscal Administration web page located at <http://www.epa.state.oh.us/ofa/>.

Contact economic.analysis@epa.state.oh.us to receive a copy of the survey by e-mail. Or call Ohio EPA, Office of Fiscal Administration, Economic Analysis Unit at 614-644-3760 to receive a hard copy or request additional information.

Sewer and Water Rate Calculations

Sewer and water charges usually depend on consumption measured in gallons or cubic feet, and are billed monthly, bimonthly or quarterly. In order to standardize sewer and water rates across Ohio and to allow for comparisons among systems, the 2006 Sewer and Water Rate Survey presents rates calculated for an assumed level of consumption.

Annual rates were calculated for residential customers within municipal limits, assuming that a household consists of three (3) people individually consuming 85 gallons of water each day. Community annual sewer and water rate calculations assumed one of the following as the average water consumption per household:

- 7,756 gallons per month (1,037 cubic feet per month)
- 15,512 gallons bi-monthly (2,074 cubic feet bi-monthly)
- 23,268 gallons per quarter (3,111 cubic feet per quarter)

The rates in Appendices 2 and 3 include charges levied for direct use of sewer and water systems. Charges unrelated to sewer and water use, such as income and property taxes, have not been included in rate calculations. Information about other revenue sources has been noted in the appendices, when available.

Actual sewer and water charges for individual households will be higher (or lower) than those listed in Appendices 2 and 3 for those households with average, metered water use more (or less) than 7,756 gallons per month.

Sewer Rates

The 2006 average annual residential sewer rate in Ohio was \$442, a 3.8% increase over 2005. Half of all sewer systems charged rates lower than \$426 per year. Table 1 shows annual sewer rate averages for 1983 through 2006, along with the percentage change in average rates and the consumer price index (CPI-U: Midwest urban prices for all items). Figure 1 displays average annual sewer rate data and a trend line adjusting the base year (1984) average sewer rate for inflation. Figure 2 displays the range of sewer rates charged by communities in 2006.

Water Rates

The 2006 average annual residential water rate in Ohio was \$410, a 3.3% increase over 2005. Half of all water systems charged rates lower than \$386. Table 2 displays annual water rate data for 1984 through 2006, along with the percentage change in average rates and the consumer price index (CPI-U: Midwest urban prices for all items). Figure 3 displays average annual water rate data and a trend line adjusting the base year (1985) average water rate for inflation. Figure 4 displays the range of water rates charged by communities in 2006.

Sewer and Water Rate Increases

Of 370 sewer systems, 143, or 39%, reported a rate increase during 2006. One sewer system reported a rate decrease in 2006.

Of 386 water systems, 161, or 42%, reported a rate increase during 2006. One water system reported a rate decrease in 2006.

Water System Expenses

The third question on the survey asked for financial data for the respondent's water system. It specifically asked for operating expenses and non-operating expenses for the water system. The complete results can be found in Appendix 4.

Although not defined within the survey: Operating expenses are typically defined as those costs directly related to providing water system services, such as plant labor, chemicals, energy and maintenance. Non-operating expenses typically include transfers-out, debt service, insurance, billing and administration.

In 2006 water system respondents indicated operating expenses averaged \$2,100,550.

In 2006 water system respondents indicated non-operating expenses averaged \$814,173.
